1 Introduction

Who this manual is for

This manual is for people with the **Accountant** role in Maal Help. Handles invoices, supplier bills, payments, receivables, payables, storage billing, expenses and valuation.

Maal Help is a warehouse operating system: stock by warehouse, location, batch and owner on a permanent ledger, plus purchasing, sales and fulfilment, billing, reports and an AI Copilot that answers from your own data.

Your role can

- ✓ View financial figures (value, margin, receivables)
- ✓ Record customer and supplier payments
- ✓ Manage storage contracts and invoices
- ✓ Record expenses; financial reports

Your role cannot

- ✗ Approve expenses above threshold (owner)
- ✗ Move or adjust stock
- ✗ Change company settings

Screens show the fictional demo company **ABC Trading & Warehousing**. Your company's names and numbers will differ. Menus show only what your role is allowed to use.

2 Access and navigation

Signing in

Maal Help runs in any modern browser on a computer, tablet or Android phone. Your company administrator creates your account and gives you a temporary password.

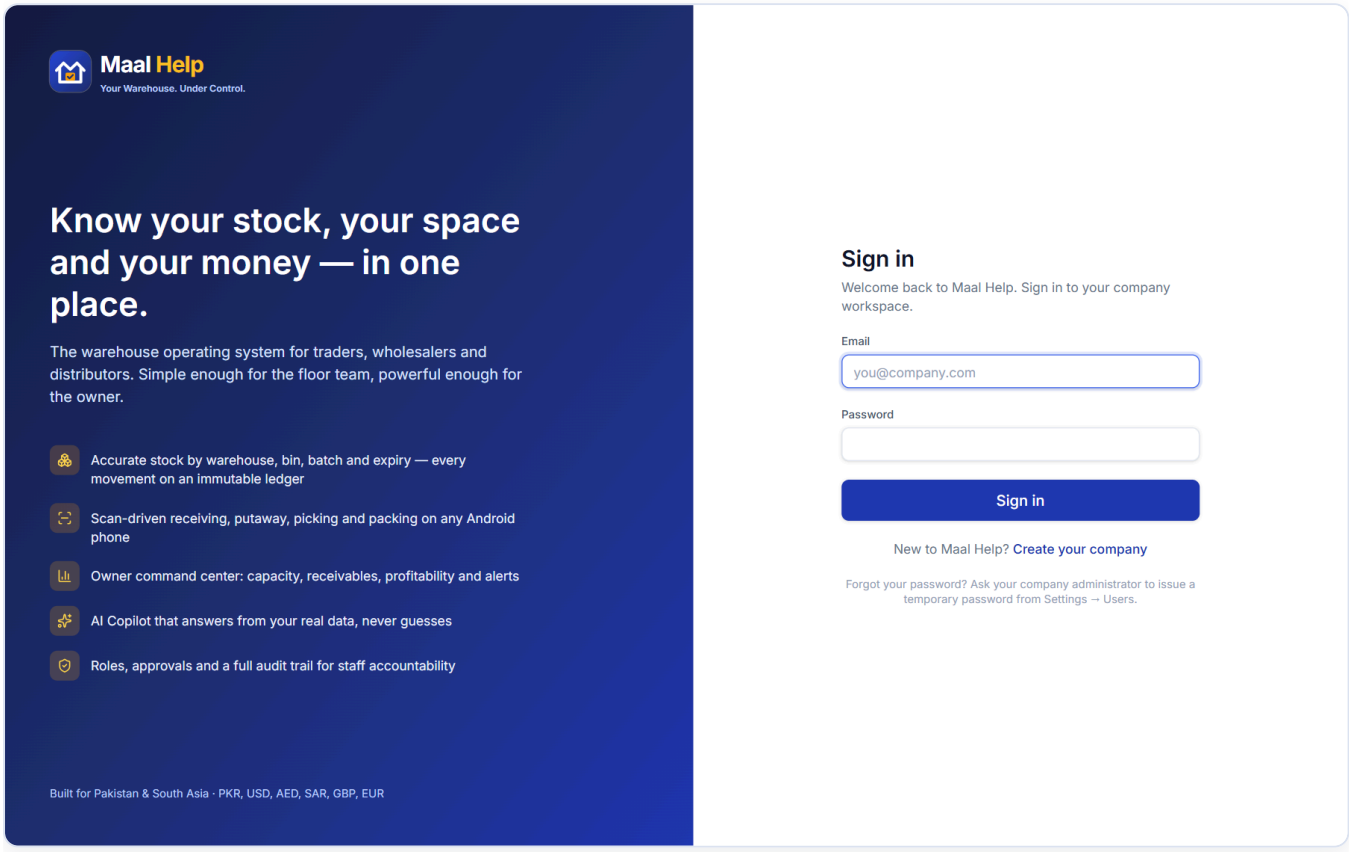

Figure 1. The Maal Help sign-in page.

1. Open the Maal Help address your company gave you.
2. Enter your work email and password, then select **Sign in**.
3. The first time, change your temporary password: **Settings** → **My profile** → **Change password** (at least 10 characters with letters and numbers).
4. Forgot your password? Ask your company administrator to issue a temporary one (**Settings** → **Users** → **Reset password**).

> After 8 wrong passwords the account is locked for a short time. Wait, then try again.

> Sign out on shared computers. Sessions also expire automatically.

Finding your way around

The left sidebar shows only the screens your role may use. Counts next to a menu item (for example Putaway 2) show open work.

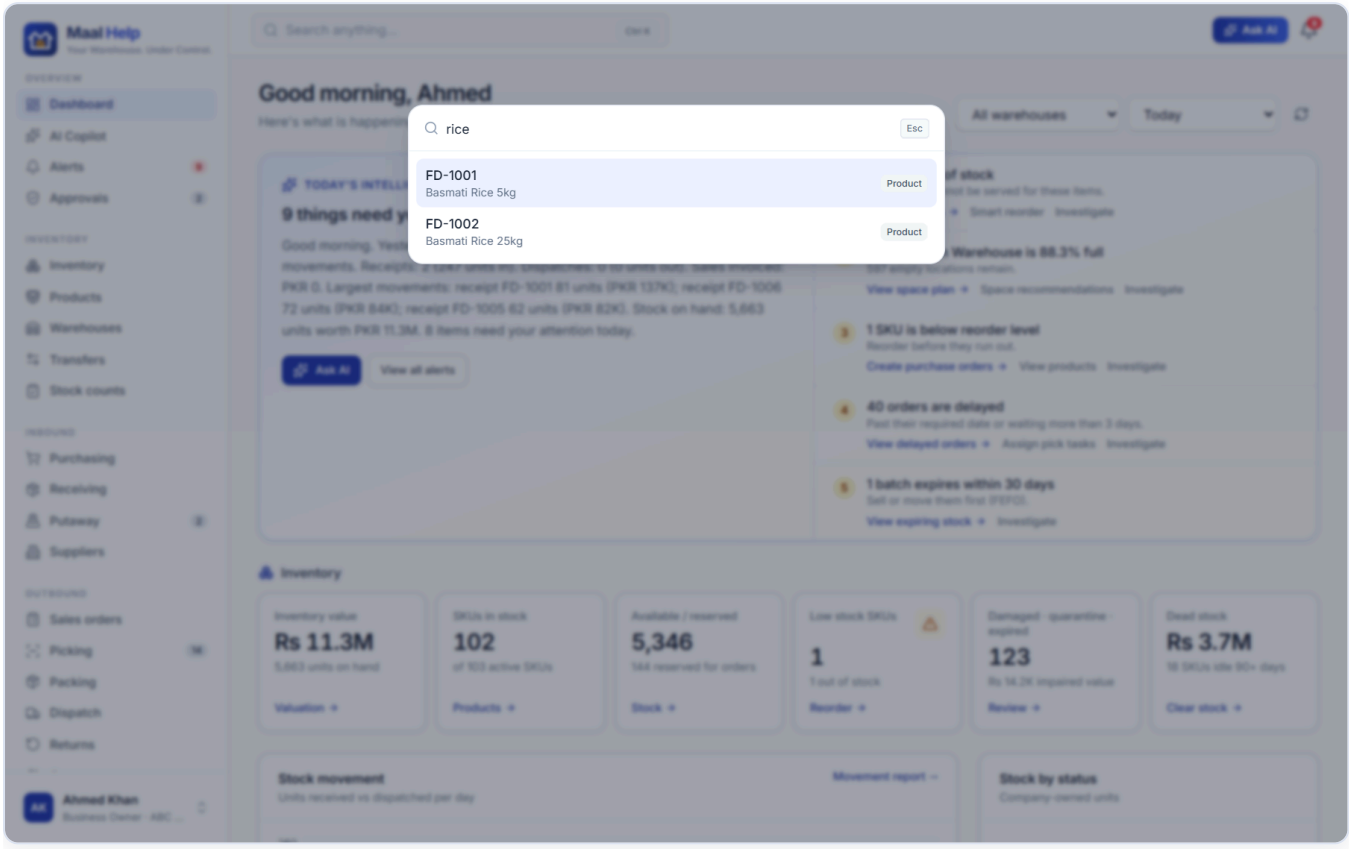

Figure 2. Press Ctrl + K anywhere to search products, orders, customers, locations and screens.

1. Use the **sidebar** to move between screens. Your name and role are at the bottom.
2. Use **Search anything...** at the top, or press **Ctrl + K**, then type a SKU, barcode, order number or name.
3. The **bell** opens your notifications. **Ask AI** opens the Copilot (if your role has it).
4. Tables support search, filters, sorting and paging. Click a row to open the record.

> If a screen or button you expect is missing, your role does not include that permission. Ask your administrator. The server enforces permissions, so hiding a menu is never the only control.

3 Your home screen

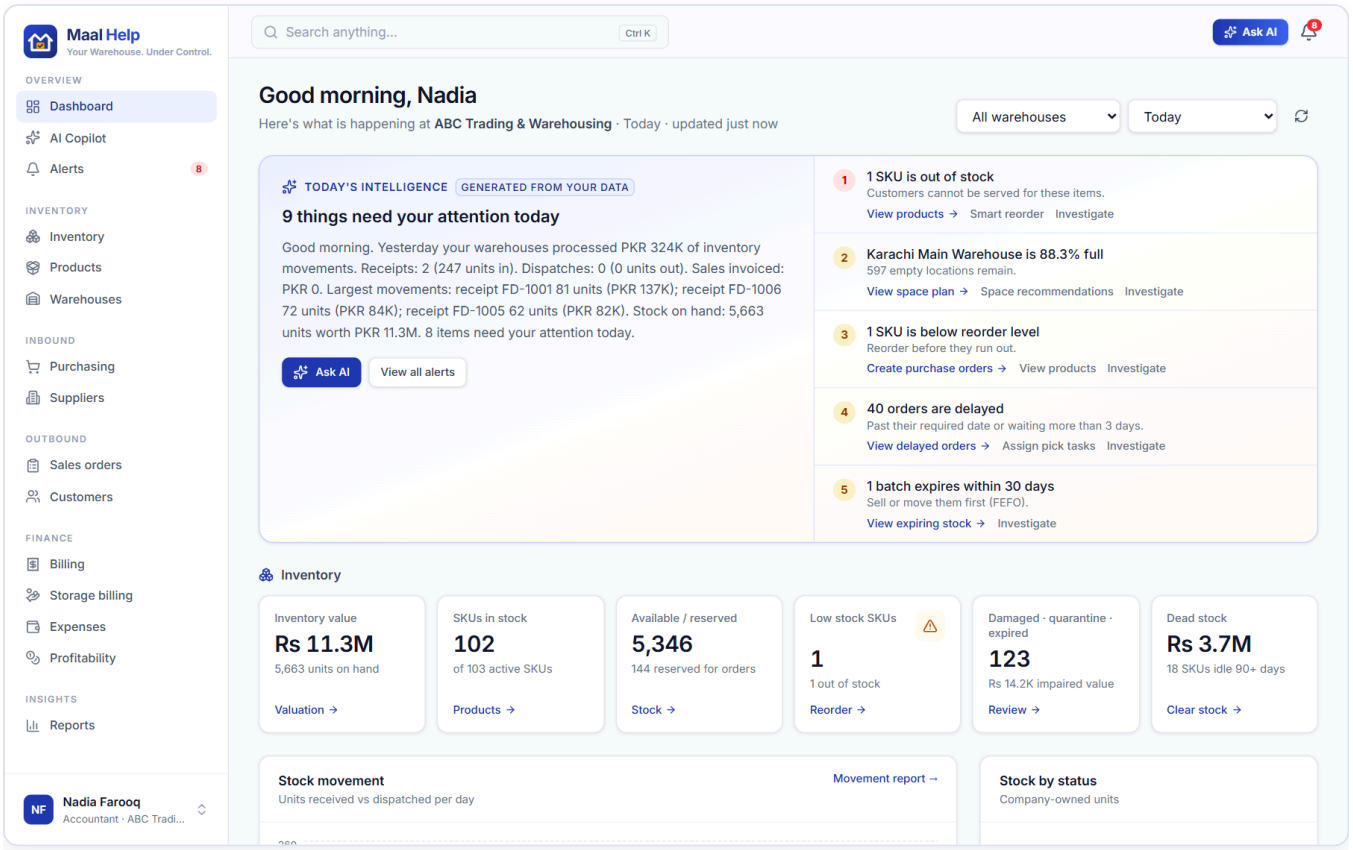

Figure 3. Accountant dashboard with financial KPIs.

- Financial cards: inventory value, receivables, overdue customers, payables and dead-stock value.

4 Features step by step

Invoices, bills, payments and aging

Invoices are issued automatically at dispatch; supplier bills on goods receipt.

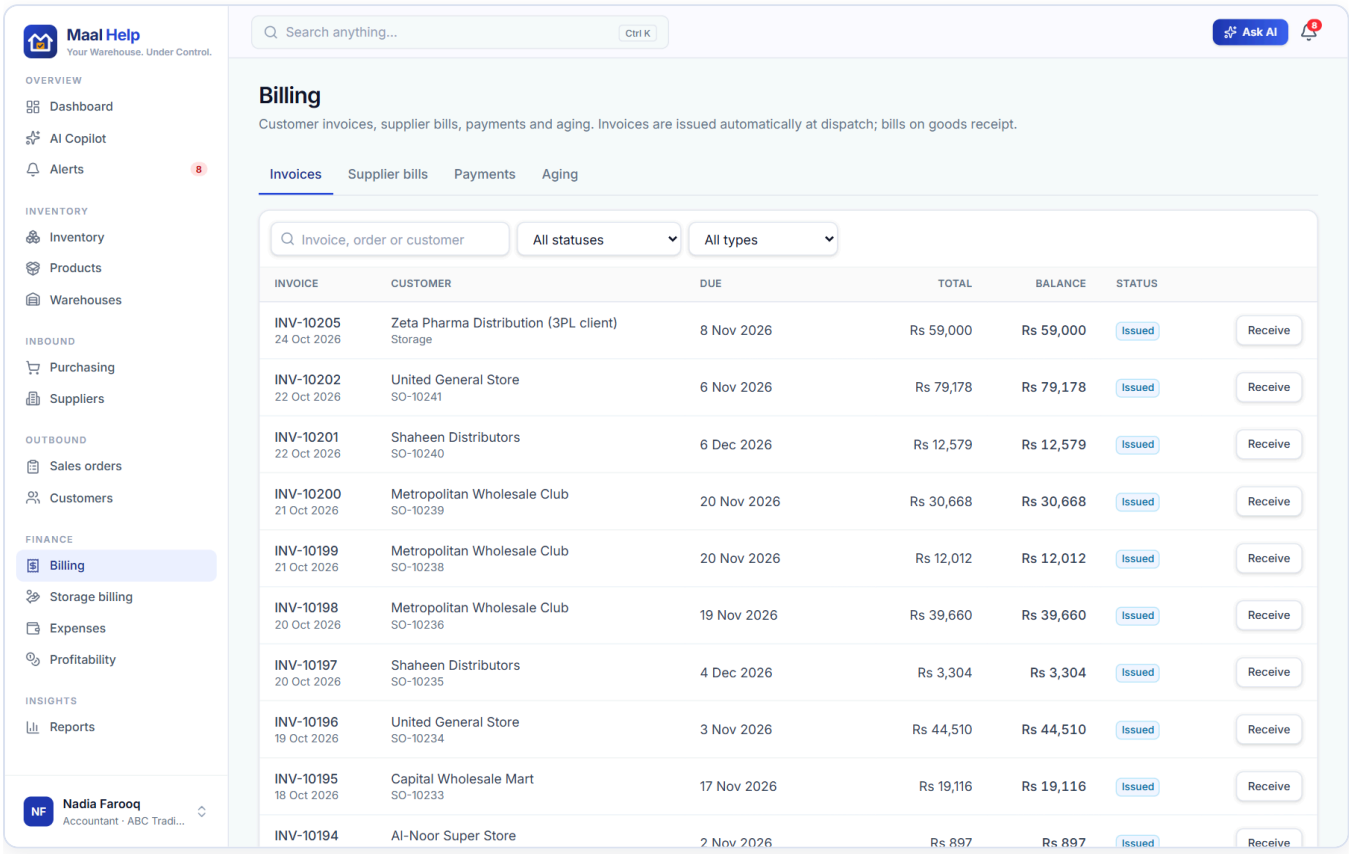

Figure 4. Billing: Invoices, Supplier bills, Payments, Aging.

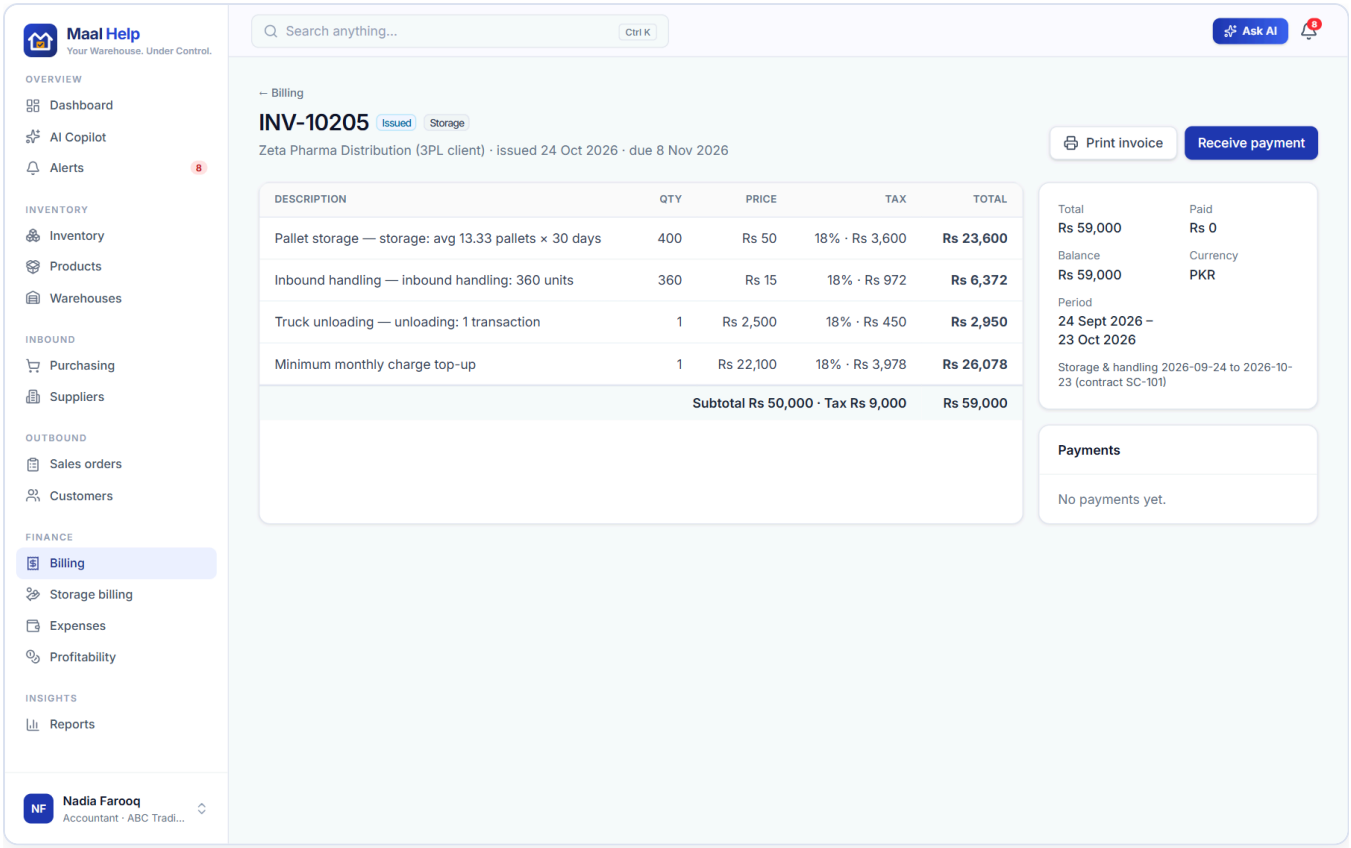

Figure 5. An invoice with lines, tax and payments.

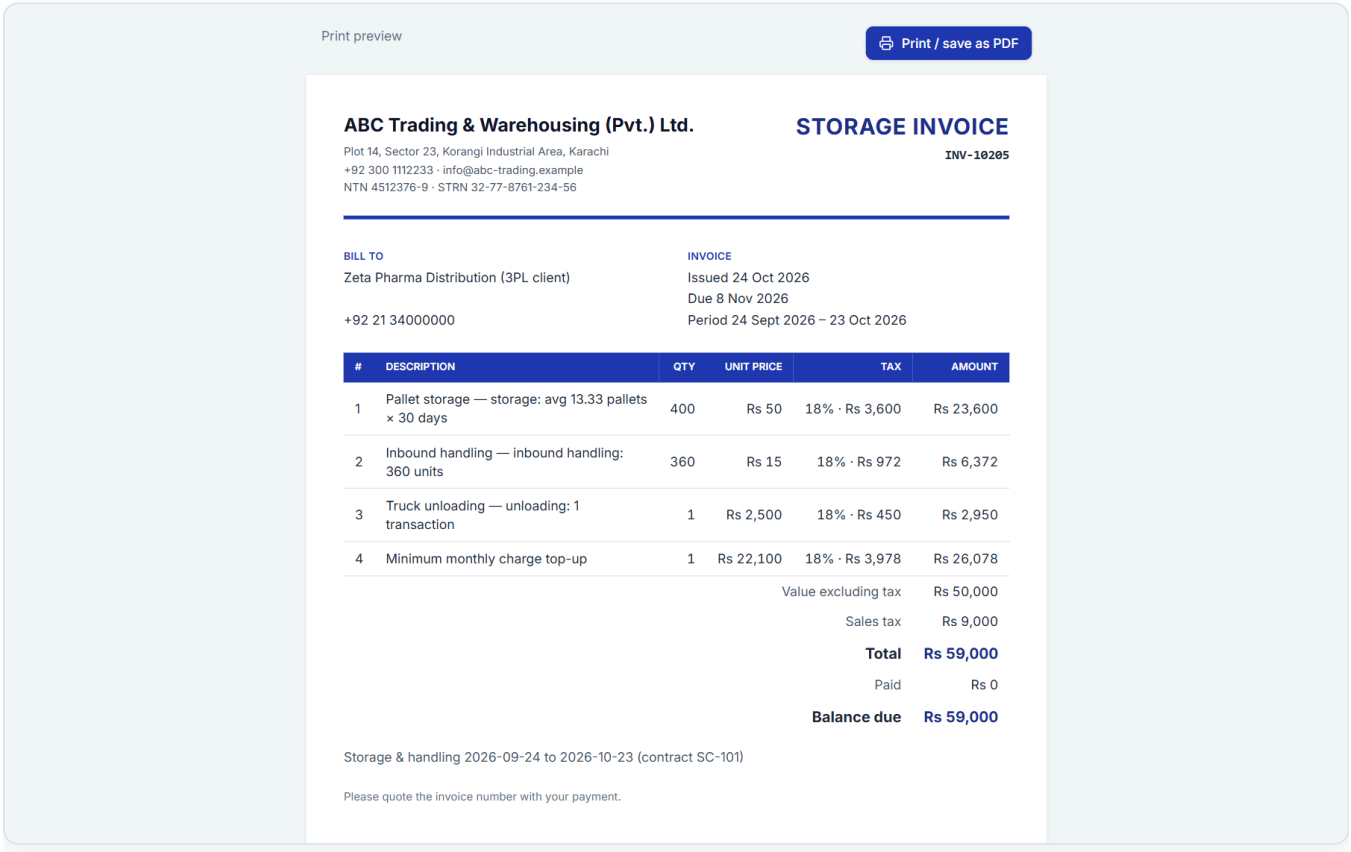

Figure 6. Printable invoice on the company letterhead.

1. Open **Billing**. Tabs: **Invoices**, **Supplier bills**, **Payments**, **Aging**.

2. Select **Receive** on an invoice to record a customer payment (method, amount, reference). Part payments are allowed.
3. Record supplier payments from **Supplier bills**.
4. Use **Aging** to see receivables and payables by days overdue.
5. Open an invoice and use print to produce a PDF or paper copy.

> FBR e-invoicing is not integrated in this version. Check your obligations with your tax adviser.

Storage billing (3PL)

If you rent warehouse space, charges are calculated from the ledger: pallets, boxes, m³, bins, kg or area per day, plus handling fees.

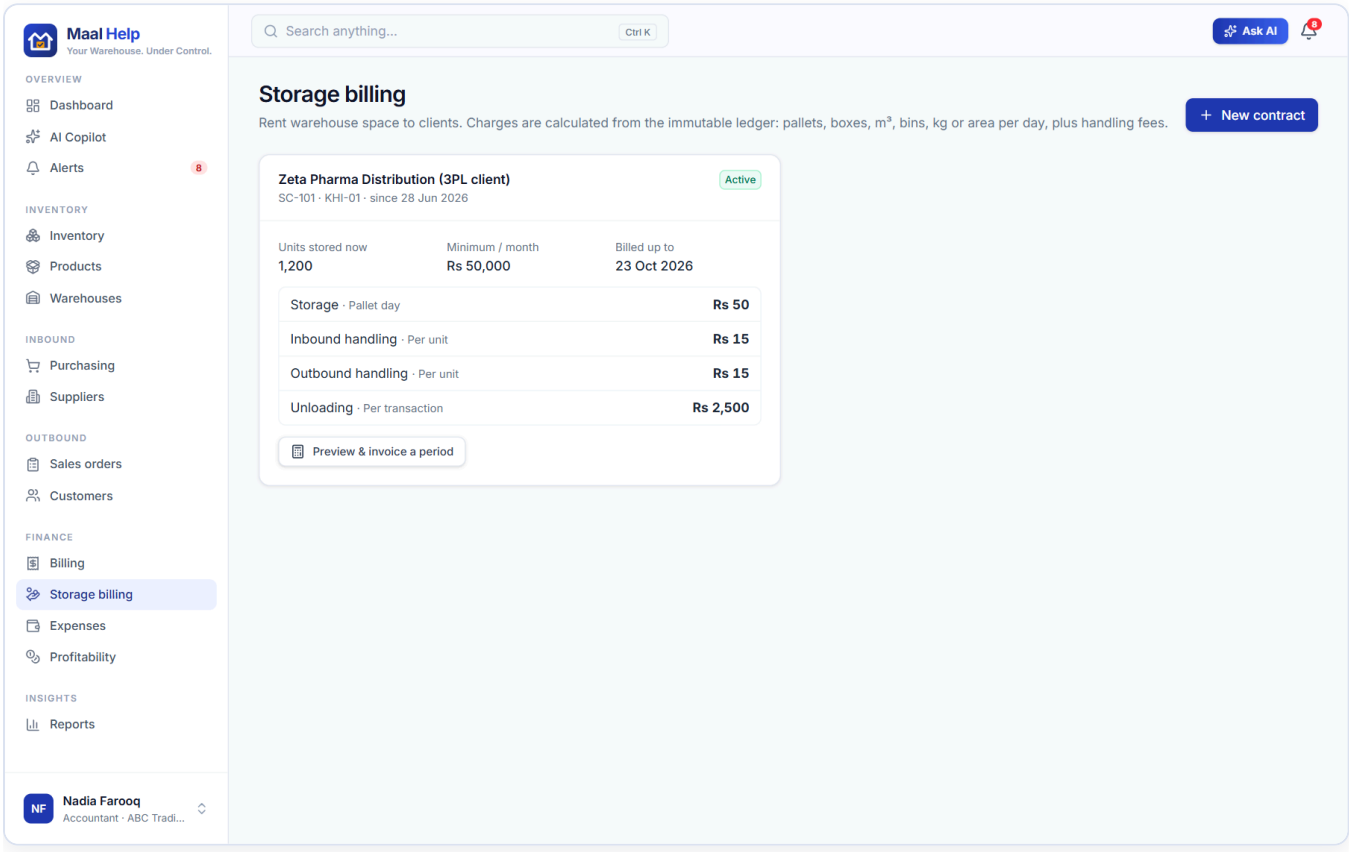

Figure 7. A storage contract for a 3PL client.

1. **Storage billing → New contract**: client, warehouse, start date, rates (storage basis and price; inbound/outbound handling; picking, packing, loading/unloading; minimum monthly charge).
2. Each period, choose **Preview & invoice a period** to check the calculation, then issue the invoice.
3. The invoice lists each charge with its quantity and rate.

Expenses

Warehouse operating costs by warehouse, department and cost center. Large expenses route for approval.

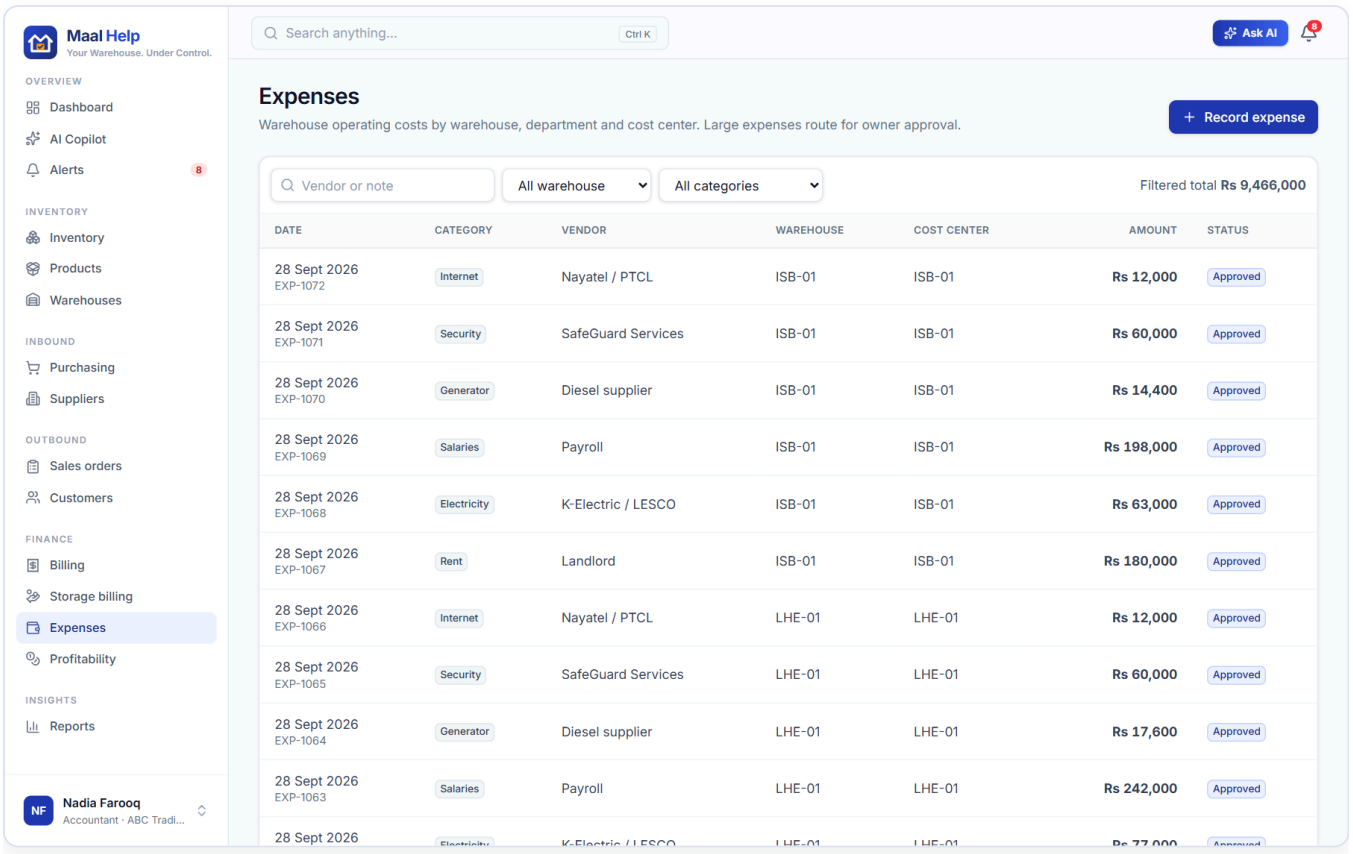

Figure 8. Expenses with category, vendor, warehouse and status.

1. **Expenses → Record expense**: date, category, vendor, warehouse, cost center, amount and notes.
2. Expenses over the threshold show *pending approval* until approved.

Profitability

Estimated management view: revenue from invoices, cost of goods from the ledger, operating costs from expenses and freight.

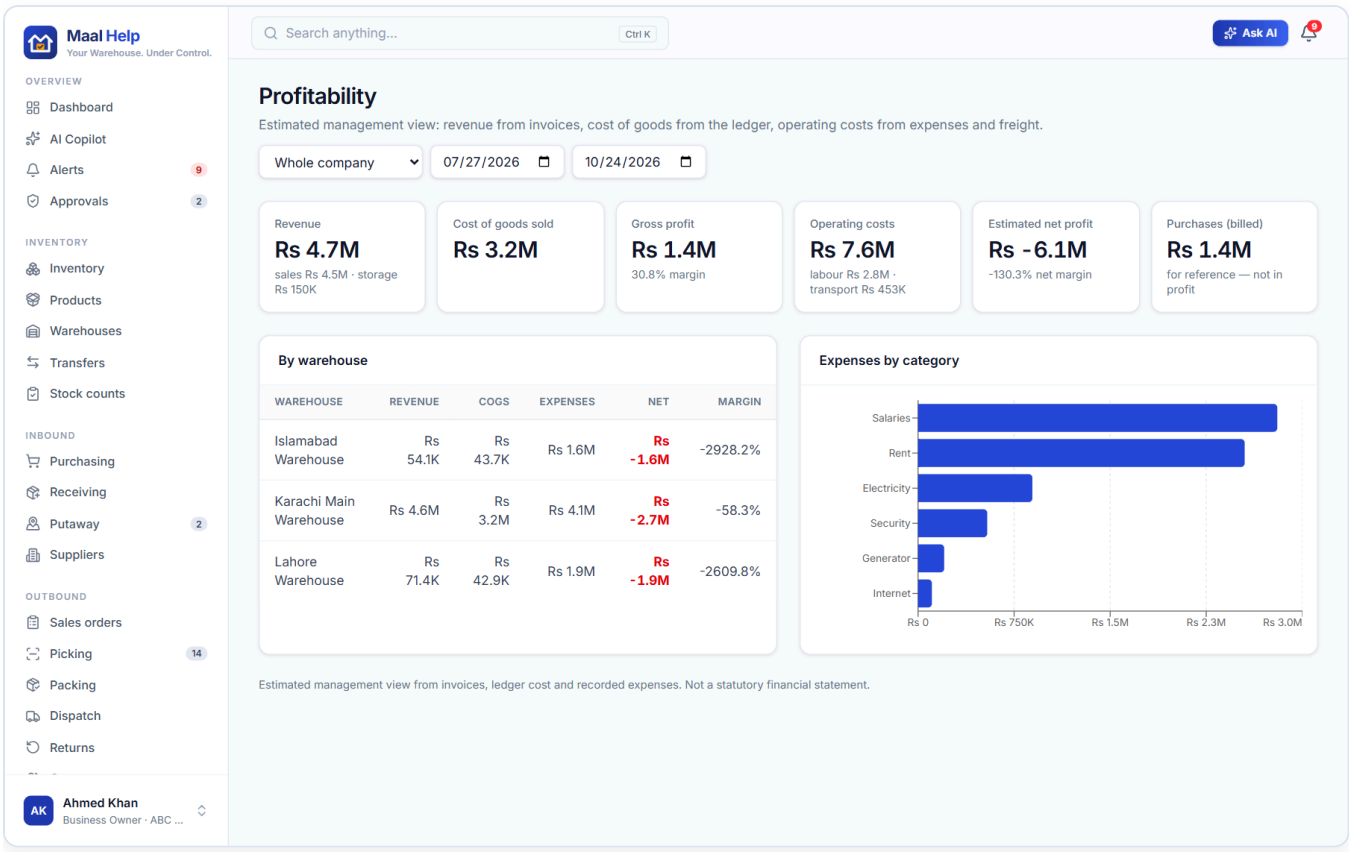

Figure 9. Profitability by warehouse and expenses by category.

1. Open **Profitability** and choose the period and warehouse.
2. Compare revenue, COGS, expenses, net and margin by warehouse.

> This is an estimate for decisions, not a statutory financial statement.

Customers

Buyers and storage clients, with balances and credit limits.

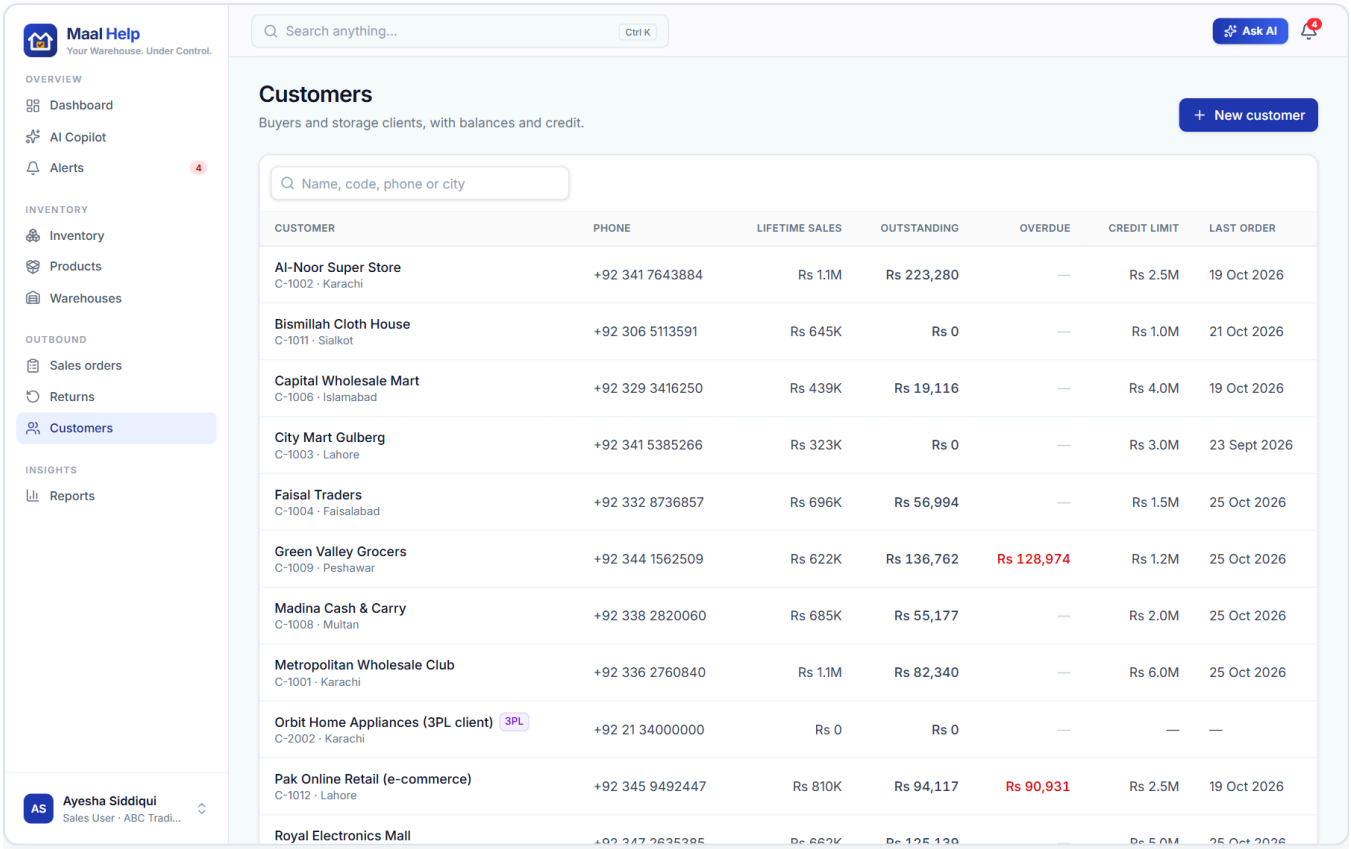

Figure 10. Customers with lifetime sales, outstanding, overdue and credit limit.

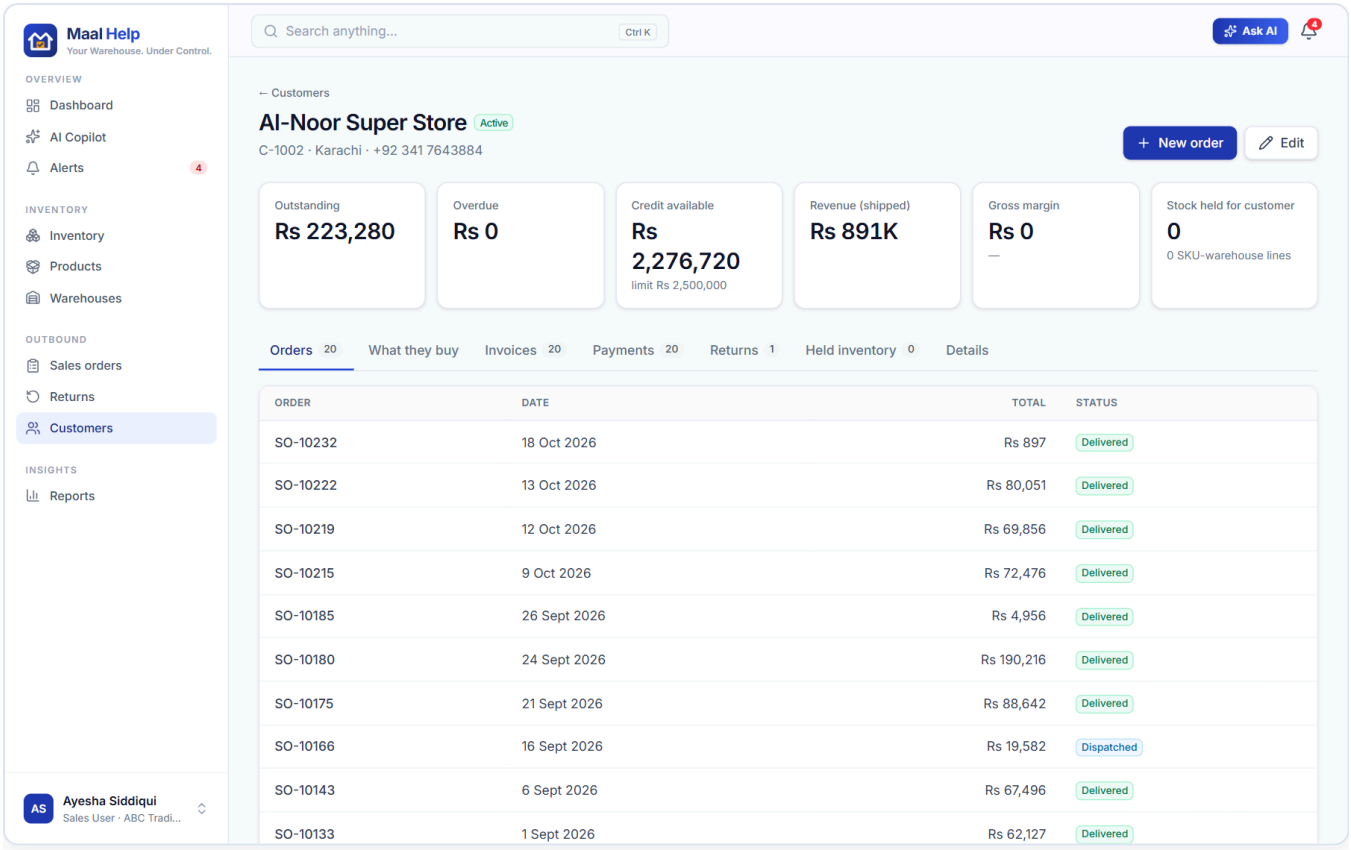

Figure 11. Customer 360°: orders, invoices, payments and stock held for them.

1. **Customers → New customer**: name, contact, phone, city, NTN/STRN, credit limit and payment terms. Mark storage (3PL) clients.
2. Open a customer to see orders, invoices, payments and balance.

Reports and exports

35 reports in five groups: Inventory, Warehouse, Sales, Purchasing and Financial. Every report supports filters, search, sorting, paging, Excel/CSV/PDF export and printing.

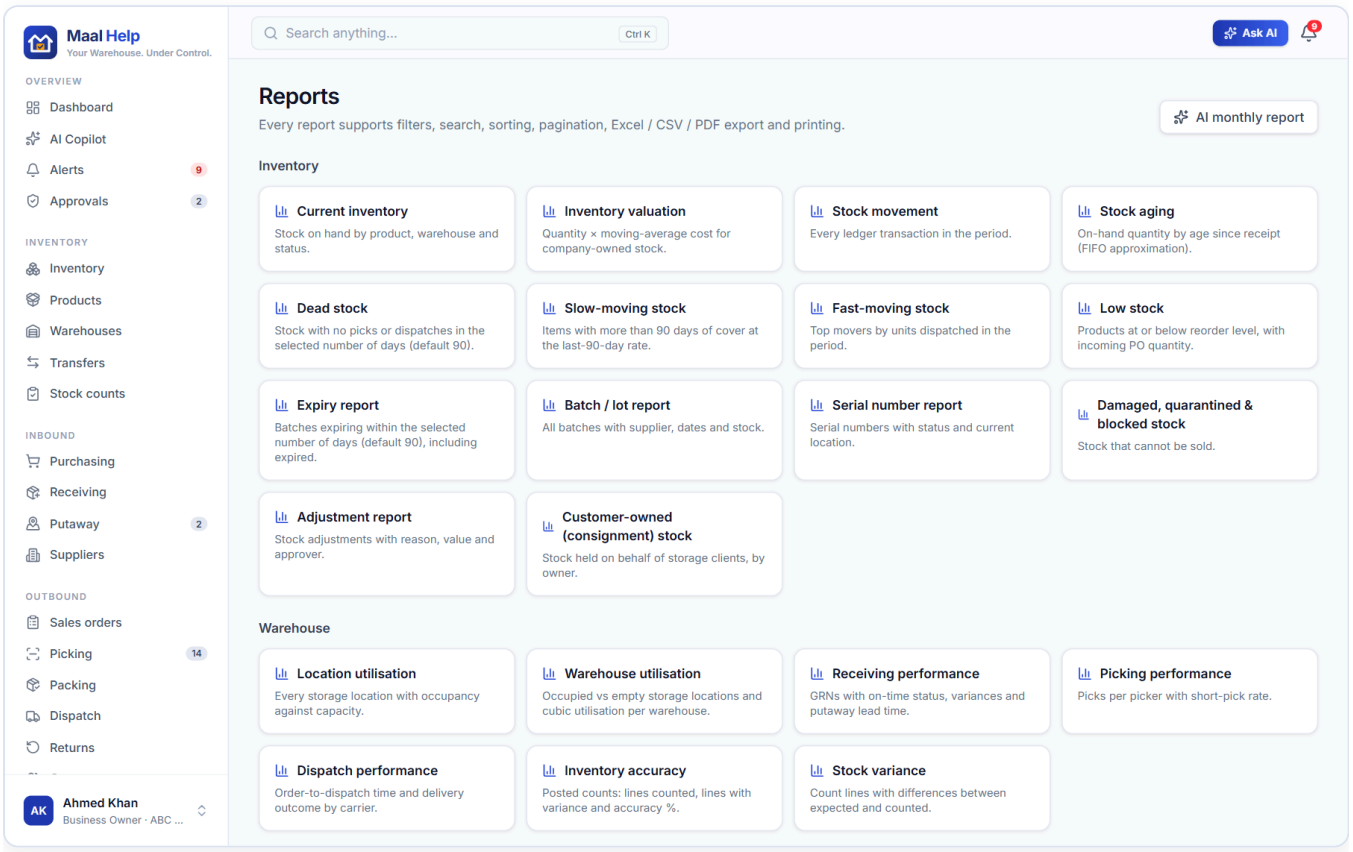

Figure 12. The report library.

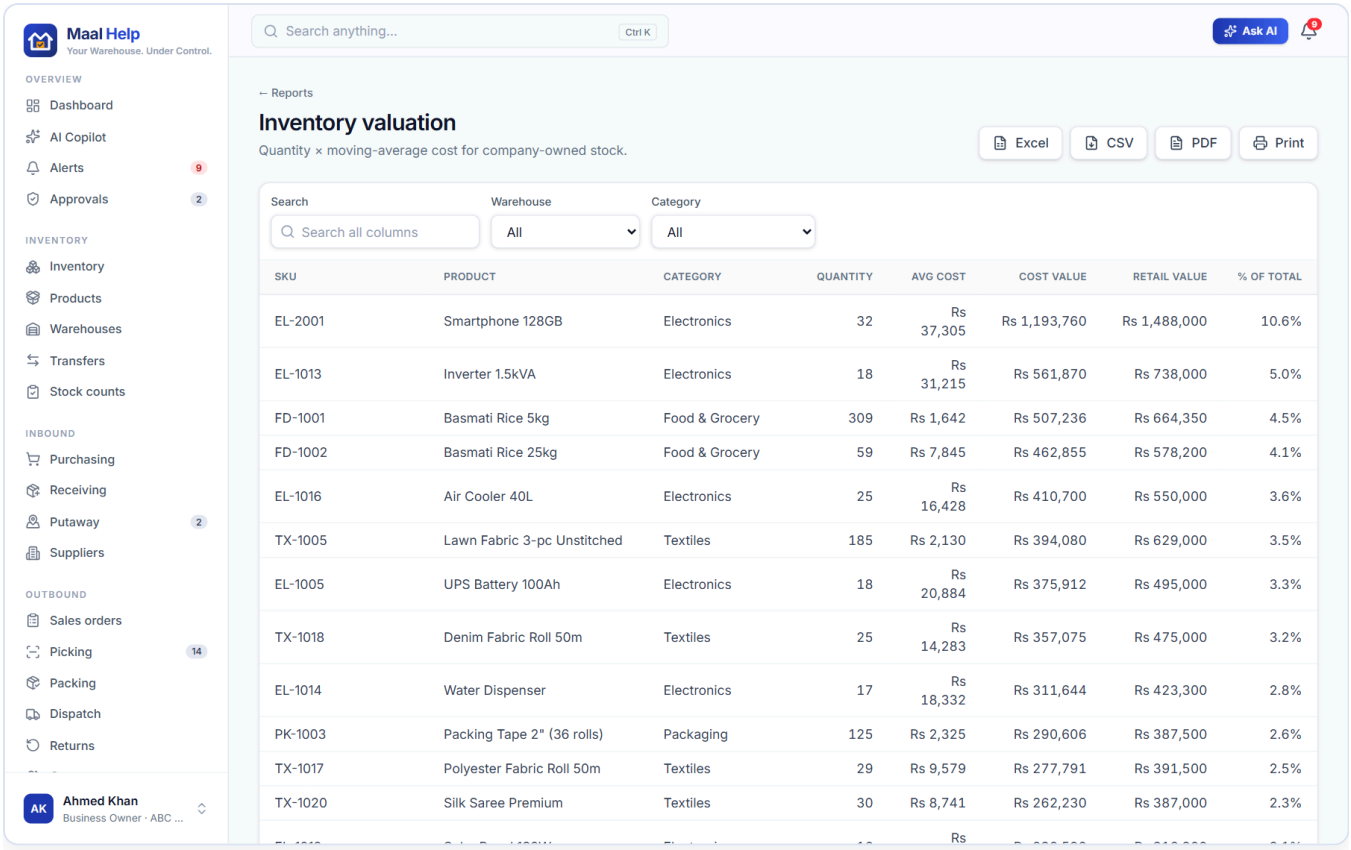

Figure 13. Inventory valuation with filters and export.

1. Open **Reports** and choose a report. You see only reports your role may view.
2. Set filters (dates, warehouse, product, customer…) and search or sort the table.
3. Export with **Excel**, **CSV** or **PDF**, or print. PDFs carry the Maal Help letterhead.
4. **AI monthly report** gives a written business summary for a month.

AI Copilot

Ask questions in plain English. The Copilot looks up facts with read-only tools limited to what your role may see, and shows its sources. It can recommend; you decide.

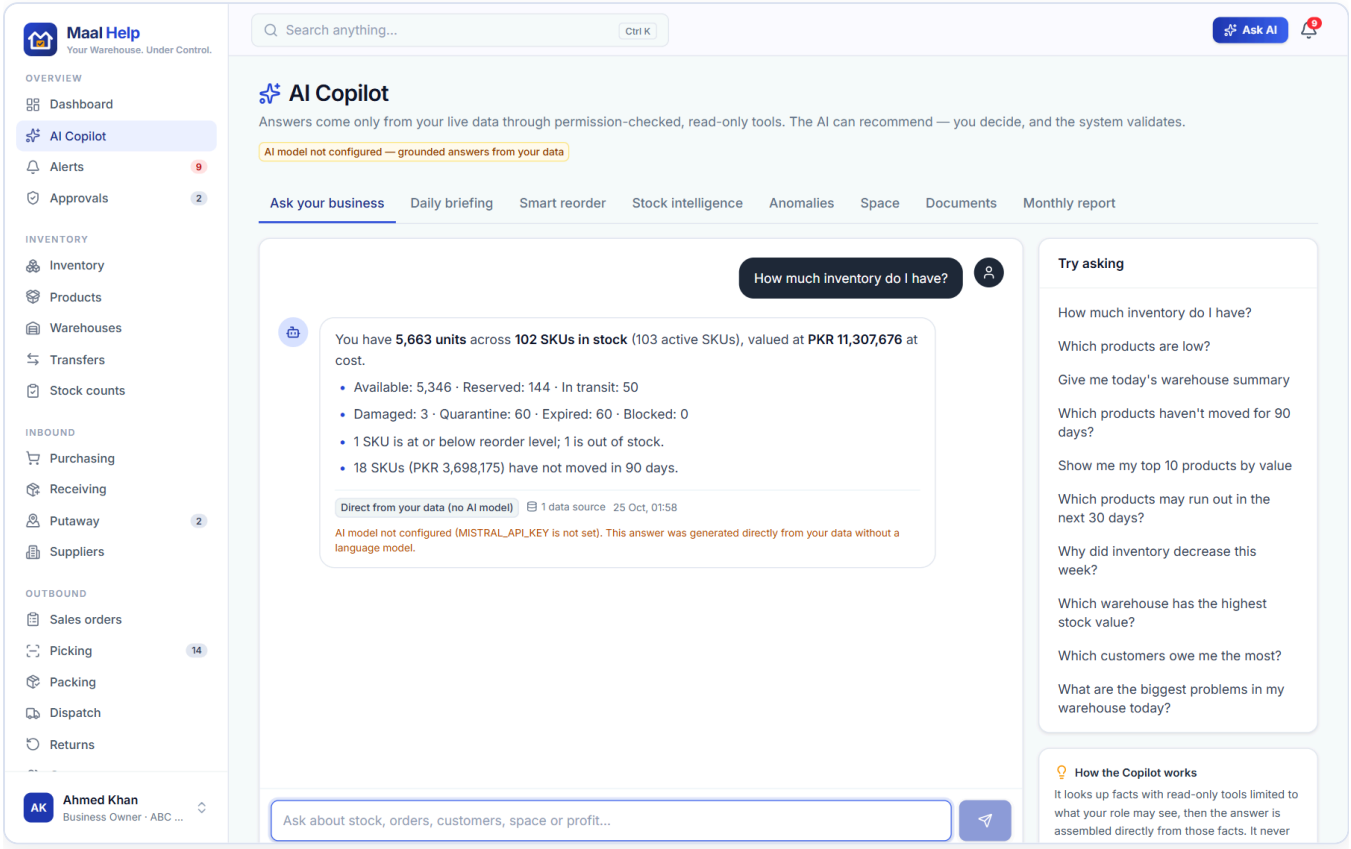

Figure 14. An answer built from live data, with its data source and mode shown.

1. Open **AI Copilot** (or select **Ask AI**).
2. Type a question, for example *How much inventory do I have?*, *Which products are low?* or *Which customers owe me the most?*, or tap a suggestion.
3. Check the badge under the answer: **Mistral AI · from your data** or **Direct from your data (no AI model)**. Open *data sources* to see what was used.
4. Other tabs: **Daily briefing**, **Smart reorder**, **Stock intelligence**, **Anomalies**, **Space**, **Documents**, **Monthly report**.

> The AI never changes stock, approves anything or posts financial entries. Suggested purchase orders open as drafts that a person must review and save.

> If your company has not configured the AI model, answers are assembled directly from your data and are clearly labelled.

> Anomalies are flags for review, never accusations. Write your findings when you mark one reviewed.

5 End-to-end workflows

Daily receipts

1. Open **Billing** → **Invoices**; filter unpaid.
2. Select **Receive**, enter method (cash, bank, JazzCash, Easypaisa, cheque), amount and reference.
3. Check **Aging** for customers to call.

Monthly 3PL billing

1. **Storage billing** → **Preview & invoice a period** for each client.
2. Check pallets, handling counts and minimum charge.
3. Issue and print the invoices.

6 Reports, notifications and exceptions

Reports and exports

Receivables, Payables, Revenue, Expenses, Inventory valuation, Inventory value by warehouse, Warehouse profitability, Storage billing.

Open **Reports**, choose a report, set filters and export to Excel, CSV or PDF, or print. You see only the reports your role may view.

Notifications and alerts

Overdue customers and large expenses pending approval.

The bell at the top right lists new notifications. In-app alerts are always on; email and WhatsApp alerts depend on your company's settings.

When something is refused

Message	Meaning	What to do
Insufficient stock	Not enough *available* units at that place	Check reserved, quarantine or dock stock; choose another location or wait
Wrong location / wrong product	The scan does not match the task	Go to the right place or item and scan again
Quantity exceeds the task	More than required	Enter the task quantity
Pending approval	Above the company threshold	An approver must approve; nothing is posted yet
You don't have permission	Your role lacks the action	Ask your administrator
Credit limit exceeded	Customer balance too high	Collect payment or ask the owner

7 FAQ and troubleshooting

Frequently asked questions

Can I edit an issued invoice?

Issued documents are kept for audit. Record a payment, credit or correction instead of editing.

Is the profitability screen my P&L?

No. It is an estimate for management. Use your accounting system for statutory statements.

Why can’t I see a menu or button?

Your role does not include that permission. Ask your administrator. Permissions are checked by the server.

Can I edit or delete a posted stock movement?

No. History is permanent. Corrections are new transactions (an adjustment or reversal) with a reason, so the audit trail stays complete.

Why does the screen say stock is not available?

It may be reserved for another order, in quarantine, damaged, expired, in transit or still at the receiving dock waiting for putaway.

Is my data visible to other companies?

No. Every company’s data is isolated, and requests for another company’s records are refused.

Troubleshooting

Problem	Solution
Invoice missing for a dispatched order	Invoices are created at dispatch. Check the order is Dispatched, not only Packed.
“Missing anti-forgery header” or 403 when saving	Refresh the page. If it persists, you may lack permission for the action.
Account locked	Too many wrong passwords. Wait a few minutes or ask your administrator to reset your password.

> Still stuck? Note the screen, the record number (for example SO-10245) and the exact message, and contact your company administrator.

8 Glossary and quick reference

Quick reference

I want to...	Go to
Record payment	**Billing → Invoices → Receive**
Overdue	**Billing → Aging**
3PL invoice	**Storage billing**
Expense	**Expenses → Record expense**
Search anything	**Ctrl + K**

Glossary

Term	Meaning
SKU	Stock-keeping unit: one product code.
GRN	Goods received note: the record of a delivery received.
PO	Purchase order to a supplier.
SO	Sales order from a customer.
Putaway	Moving received goods from the dock into a storage location.
FEFO	First-expiry-first-out: older-expiry batches are reserved and picked first.
Reserved	Units promised to a confirmed order; not available for other orders.
Quarantine	Units held for inspection; not sellable.
In transit	Units dispatched on a transfer but not yet received.
Ledger	The permanent, append-only list of every stock movement.
Wave	A group of pick tasks picked together (batch or zone).
Back-order	The part of an order that could not be reserved yet.
3PL / storage client	A business whose goods you store and bill for storage and handling.
NTN / STRN	Pakistan national tax number / sales tax registration number.
Blind count	A count where the counter does not see the expected quantity.
