1 Introduction

Who this manual is for

This manual is for people with the **Auditor** role in Maal Help. Read-only access to all records and the complete audit history, for internal or external audit.

Maal Help is a warehouse operating system: stock by warehouse, location, batch and owner on a permanent ledger, plus purchasing, sales and fulfilment, billing, reports and an AI Copilot that answers from your own data.

Your role can

- ✓ View all records, including financial reports
- ✓ View the full audit trail and stock ledger
- ✓ Export reports

Your role cannot

- ✗ Create, change, approve or delete anything

Screens show the fictional demo company **ABC Trading & Warehousing**. Your company's names and numbers will differ. Menus show only what your role is allowed to use.

2 Access and navigation

Signing in

Maal Help runs in any modern browser on a computer, tablet or Android phone. Your company administrator creates your account and gives you a temporary password.

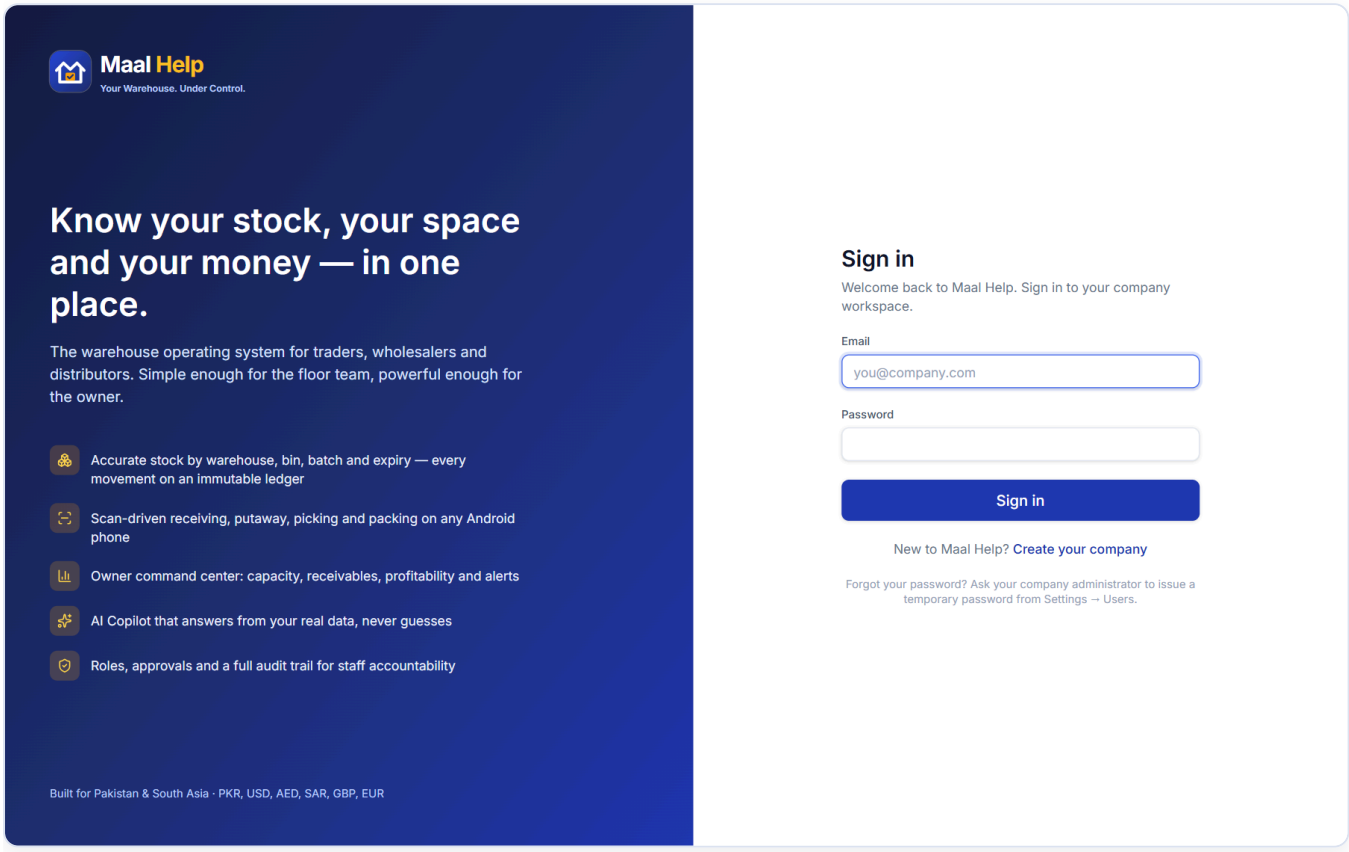

Figure 1. The Maal Help sign-in page.

1. Open the Maal Help address your company gave you.
2. Enter your work email and password, then select **Sign in**.
3. The first time, change your temporary password: **Settings** → **My profile** → **Change password** (at least 10 characters with letters and numbers).
4. Forgot your password? Ask your company administrator to issue a temporary one (**Settings** → **Users** → **Reset password**).

> After 8 wrong passwords the account is locked for a short time. Wait, then try again.

> Sign out on shared computers. Sessions also expire automatically.

Finding your way around

The left sidebar shows only the screens your role may use. Counts next to a menu item (for example Putaway 2) show open work.

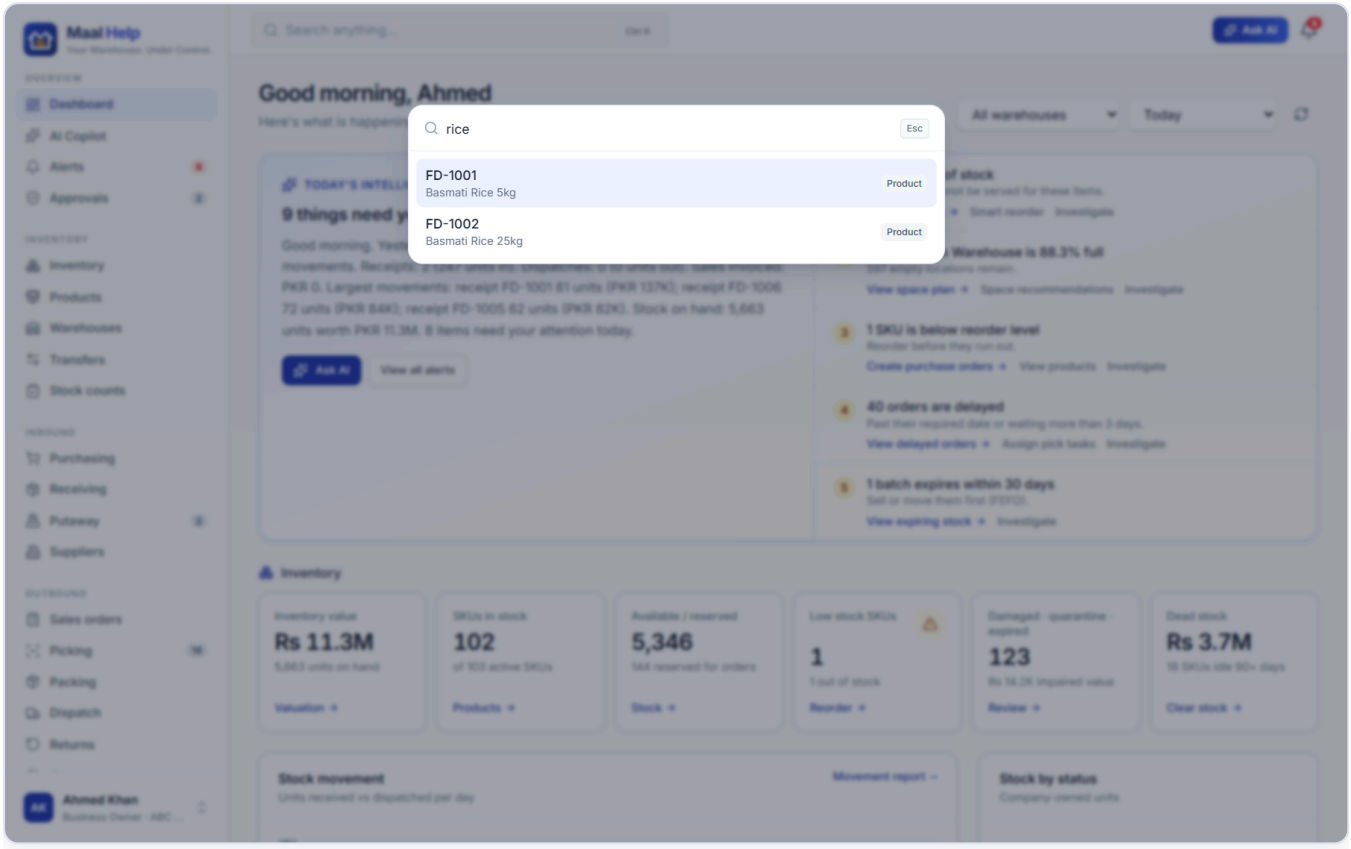

Figure 2. Press Ctrl + K anywhere to search products, orders, customers, locations and screens.

1. Use the **sidebar** to move between screens. Your name and role are at the bottom.
2. Use **Search anything...** at the top, or press **Ctrl + K**, then type a SKU, barcode, order number or name.
3. The **bell** opens your notifications. **Ask AI** opens the Copilot (if your role has it).
4. Tables support search, filters, sorting and paging. Click a row to open the record.

> If a screen or button you expect is missing, your role does not include that permission. Ask your administrator. The server enforces permissions, so hiding a menu is never the only control.

3 Your home screen

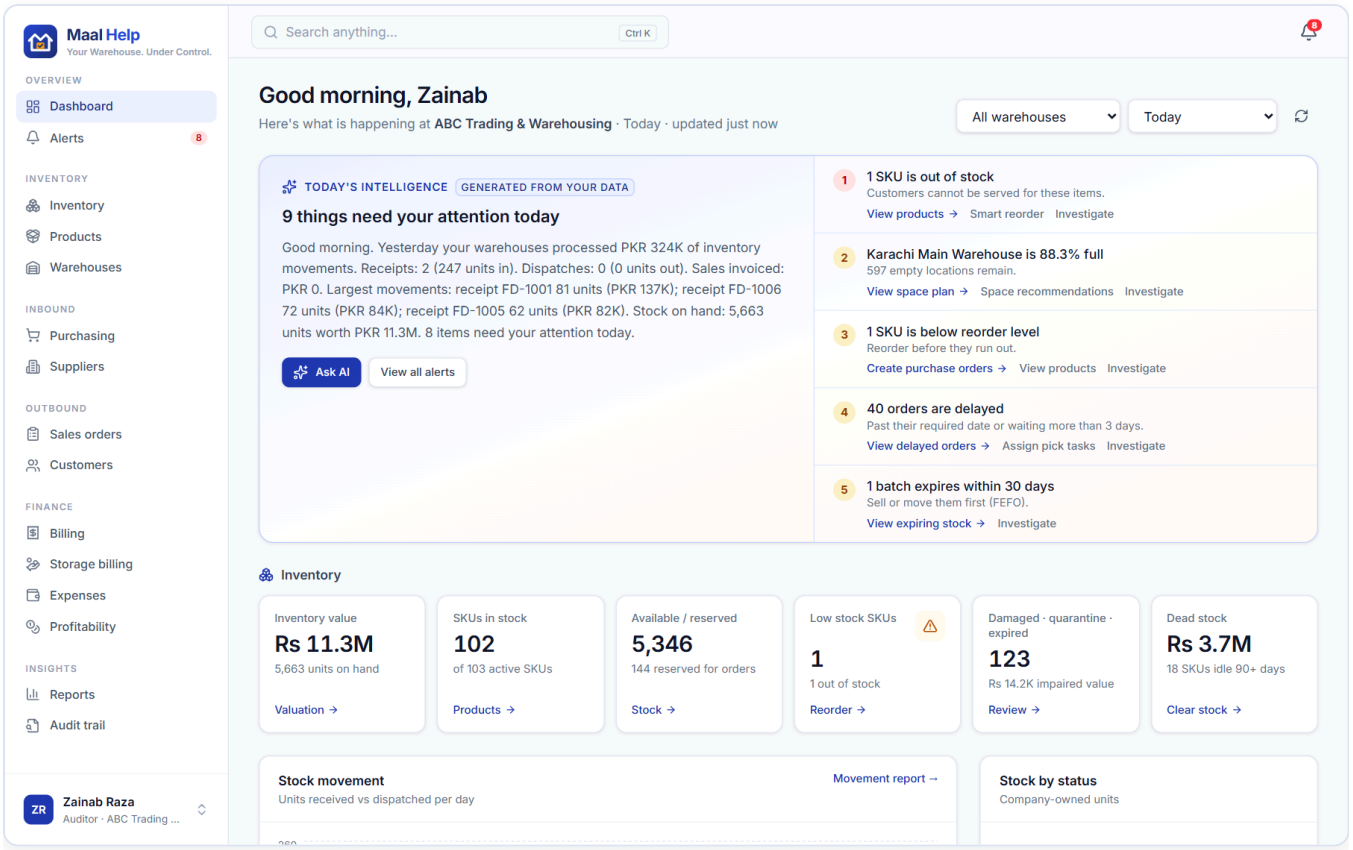

Figure 3. Auditor dashboard (read-only).

- The same overview as management, with no action buttons that change data.

4 Features step by step

Audit trail

Append-only record of every important action: who, what, old and new values, IP address, device and time. It cannot be edited or deleted.

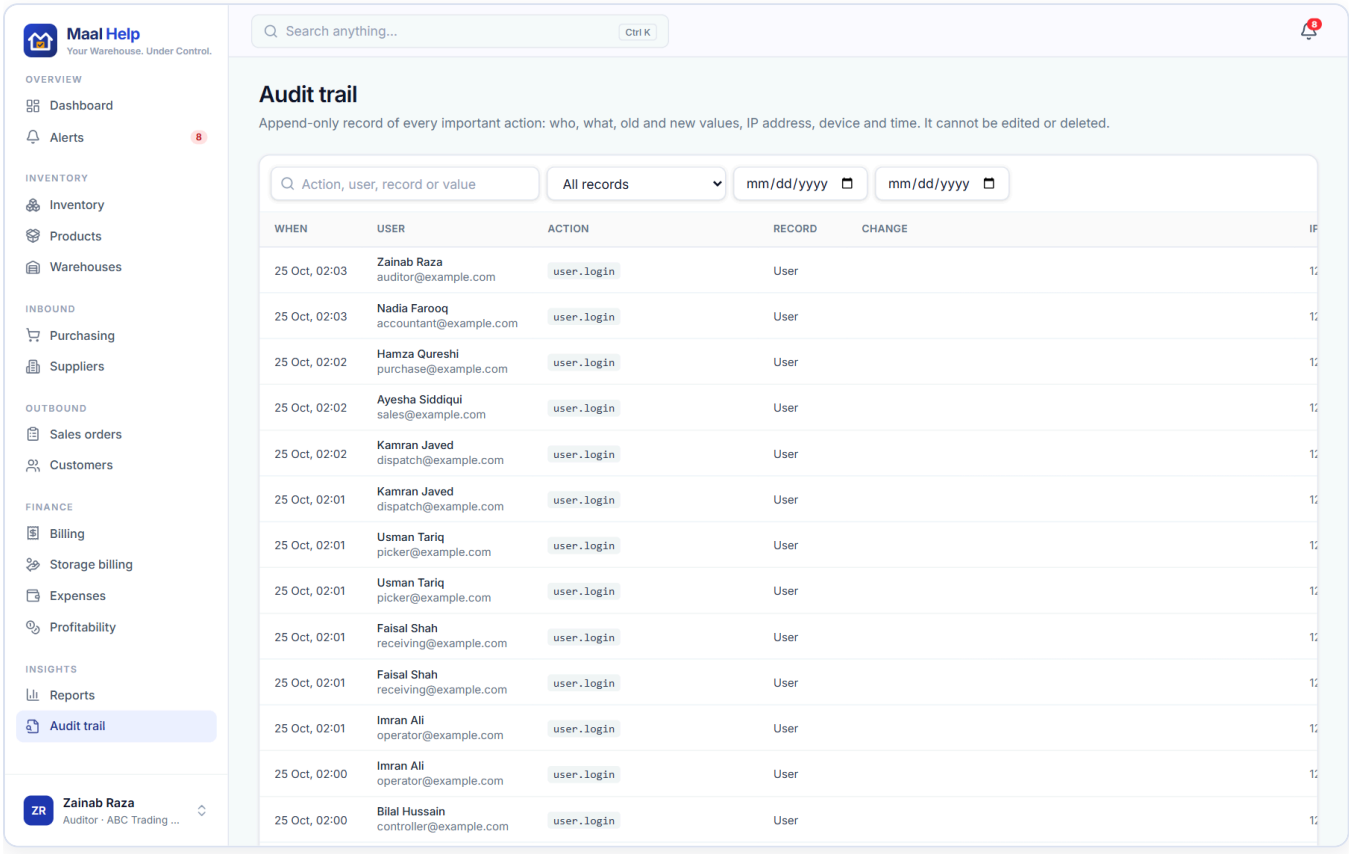

Figure 4. Audit trail with user, action, record and change.

1. Open **Audit trail**. Filter by user, action, record type or date.
2. Open an entry to see old and new values.

Inventory: stock on hand and ledger

Every unit, by warehouse, location, batch, owner and status, backed by a ledger that nobody can edit or delete.

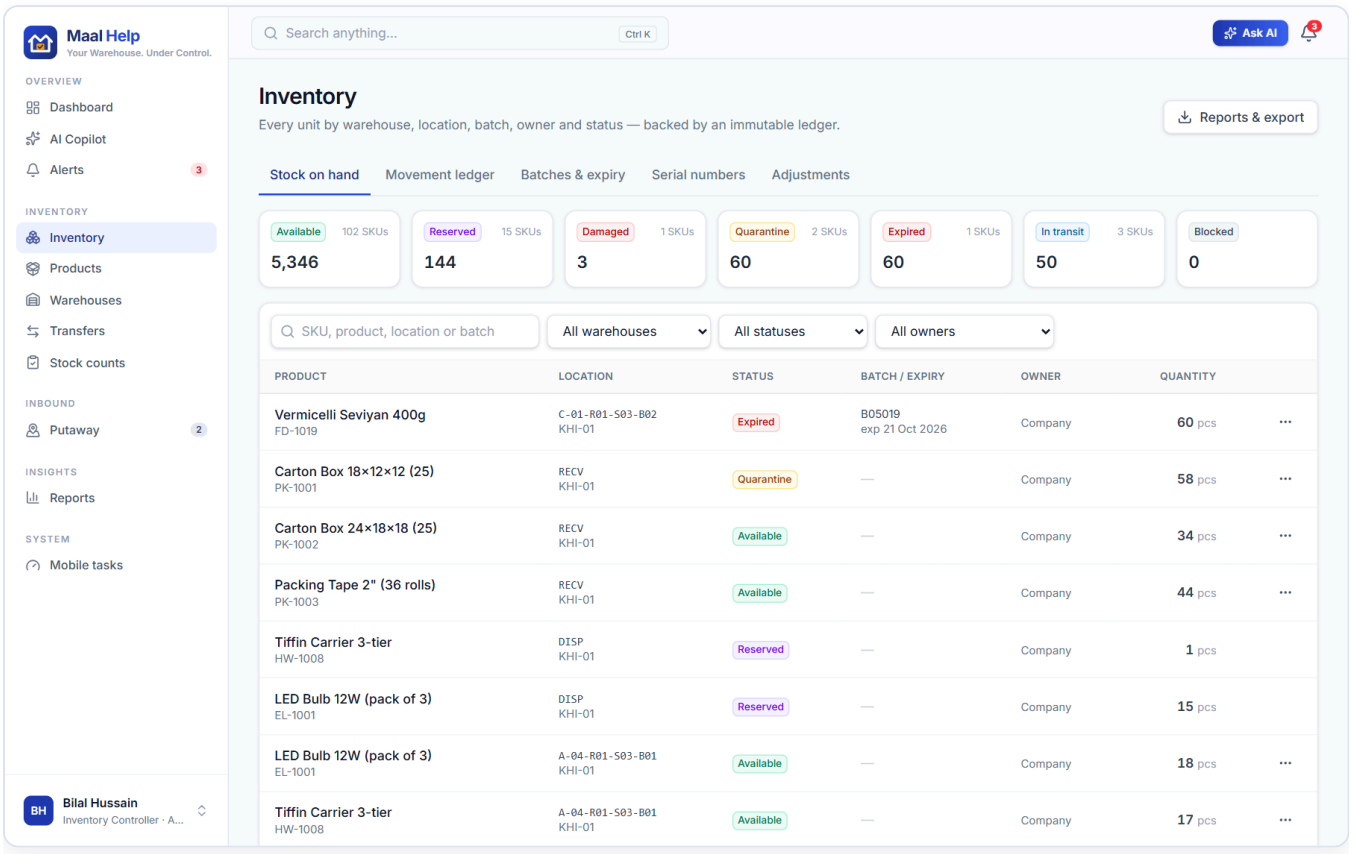

Figure 5. Stock on hand with status totals (Available, Reserved, Damaged, Quarantine, Expired, In transit, Blocked).

1. Open **Inventory**. Click a status card to filter, or search by product, SKU or location.
2. Tabs: **Stock on hand**, **Movement ledger** (every receipt, move, pick, dispatch, adjustment), **Batches & expiry**, **Serial numbers**, **Adjustments**.
3. Click a product to see its stock by location and its full movement history.
4. **Reports & export** opens the matching reports with Excel/CSV/PDF export.

> Stock can never go negative. Corrections are new transactions (adjustments, reversals), never edits.

> Roles without finance access do not see values or costs.

Reports and exports

35 reports in five groups: Inventory, Warehouse, Sales, Purchasing and Financial. Every report supports filters, search, sorting, paging, Excel/CSV/PDF export and printing.

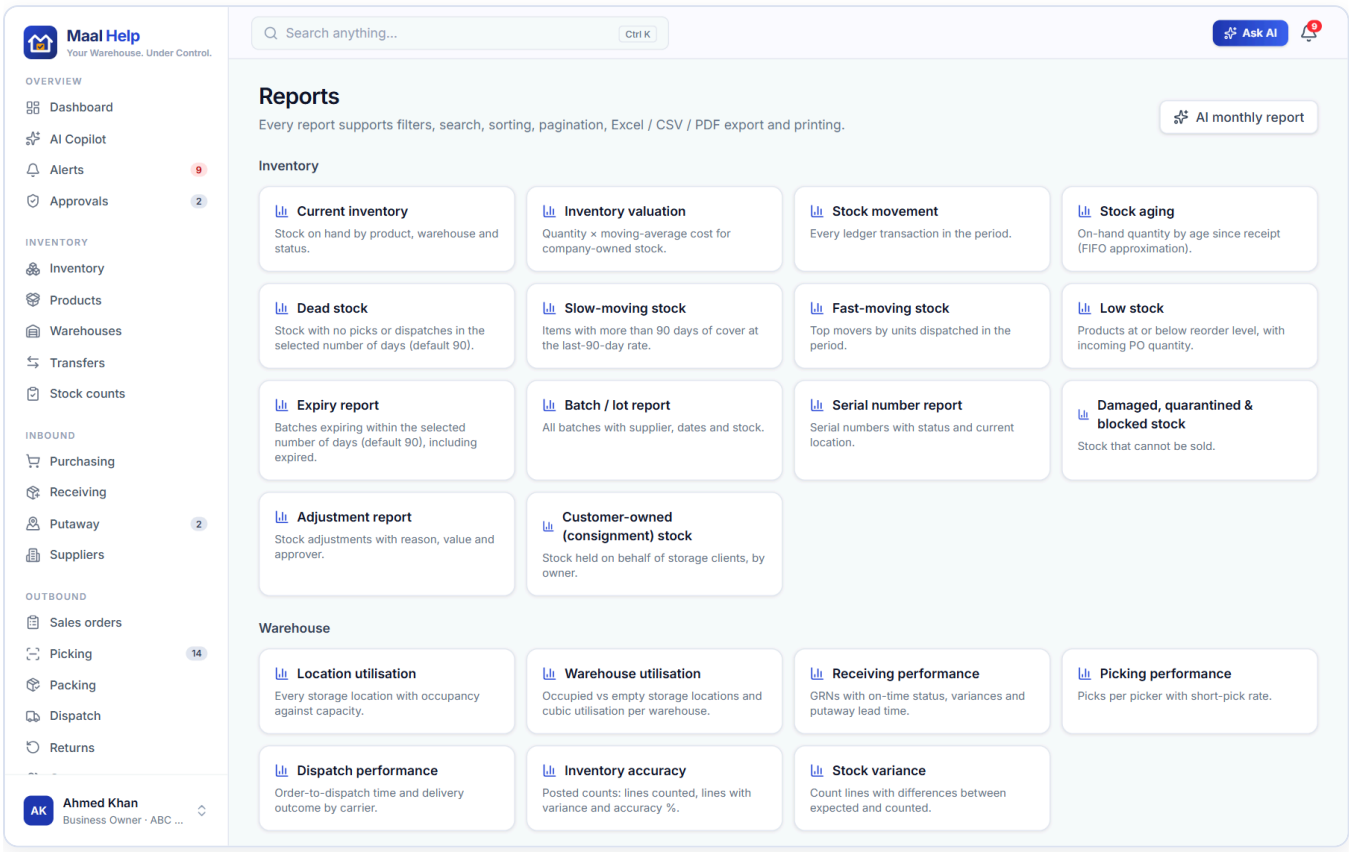

Figure 6. The report library.

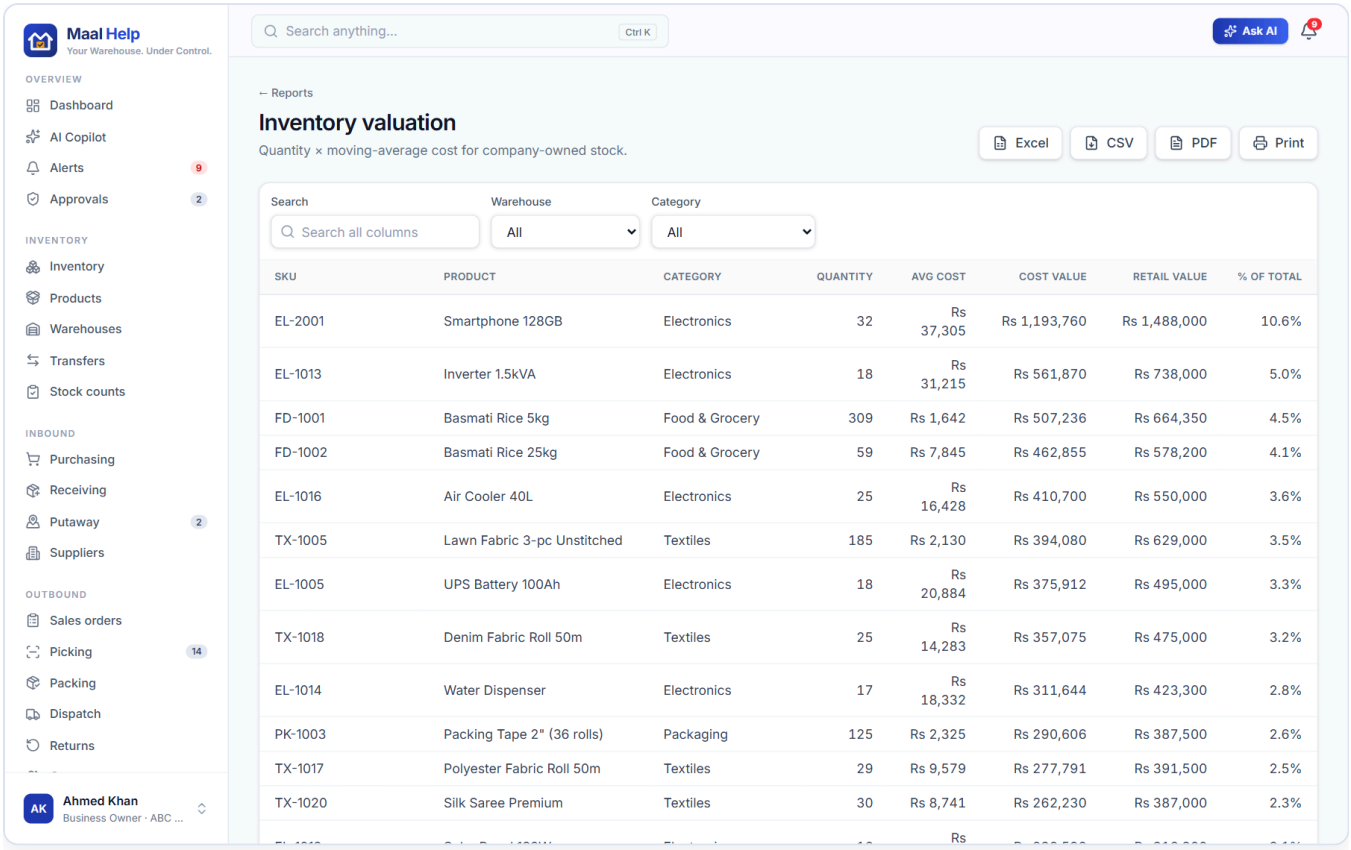

Figure 7. Inventory valuation with filters and export.

1. Open **Reports** and choose a report. You see only reports your role may view.
2. Set filters (dates, warehouse, product, customer…) and search or sort the table.
3. Export with **Excel**, **CSV** or **PDF**, or print. PDFs carry the Maal Help letterhead.
4. **AI monthly report** gives a written business summary for a month.

Approvals

Adjustments, purchase orders, count variances, transfers and expenses above your company's thresholds wait here. Nothing is posted until it is approved.

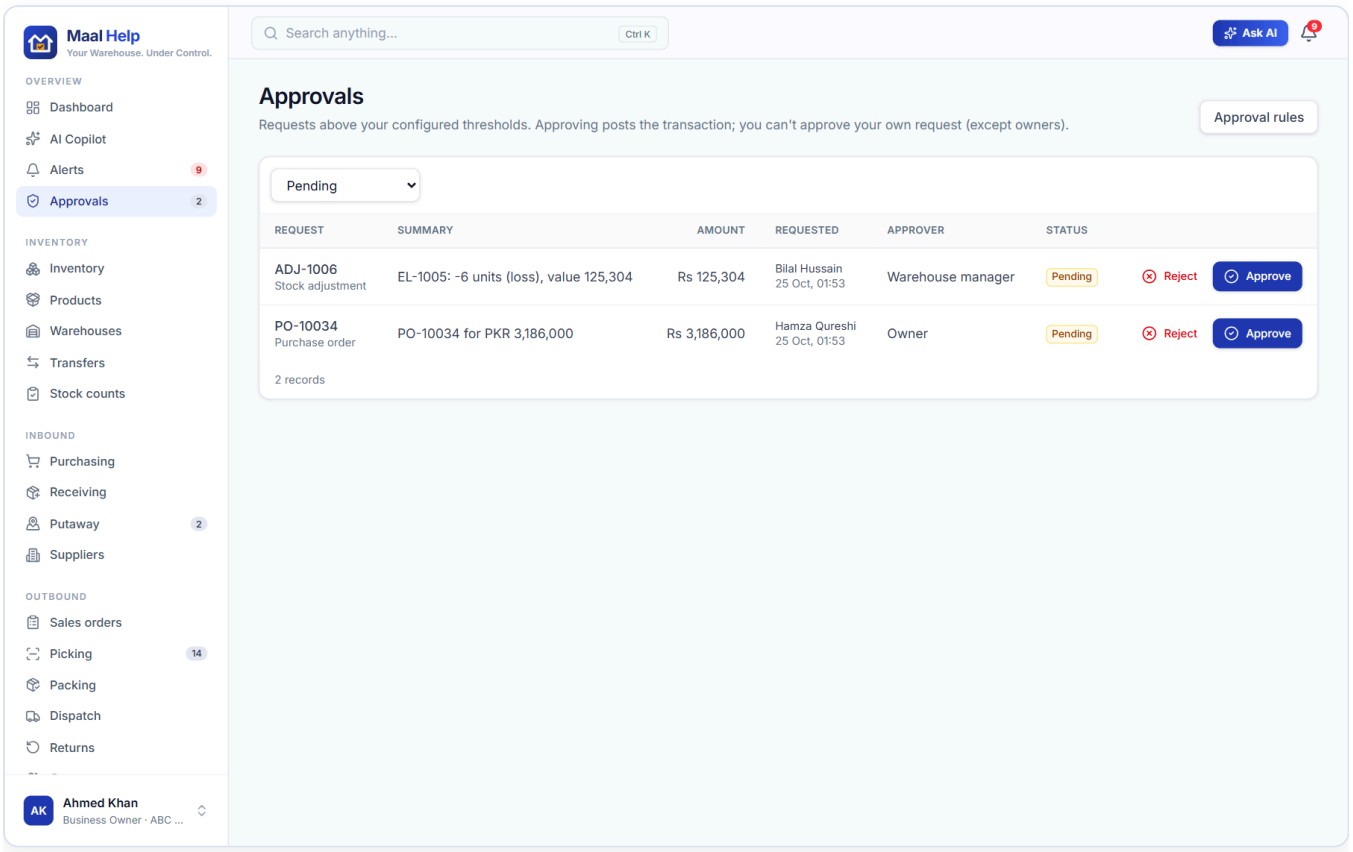

Figure 8. Pending approval requests with summary, amount and requester.

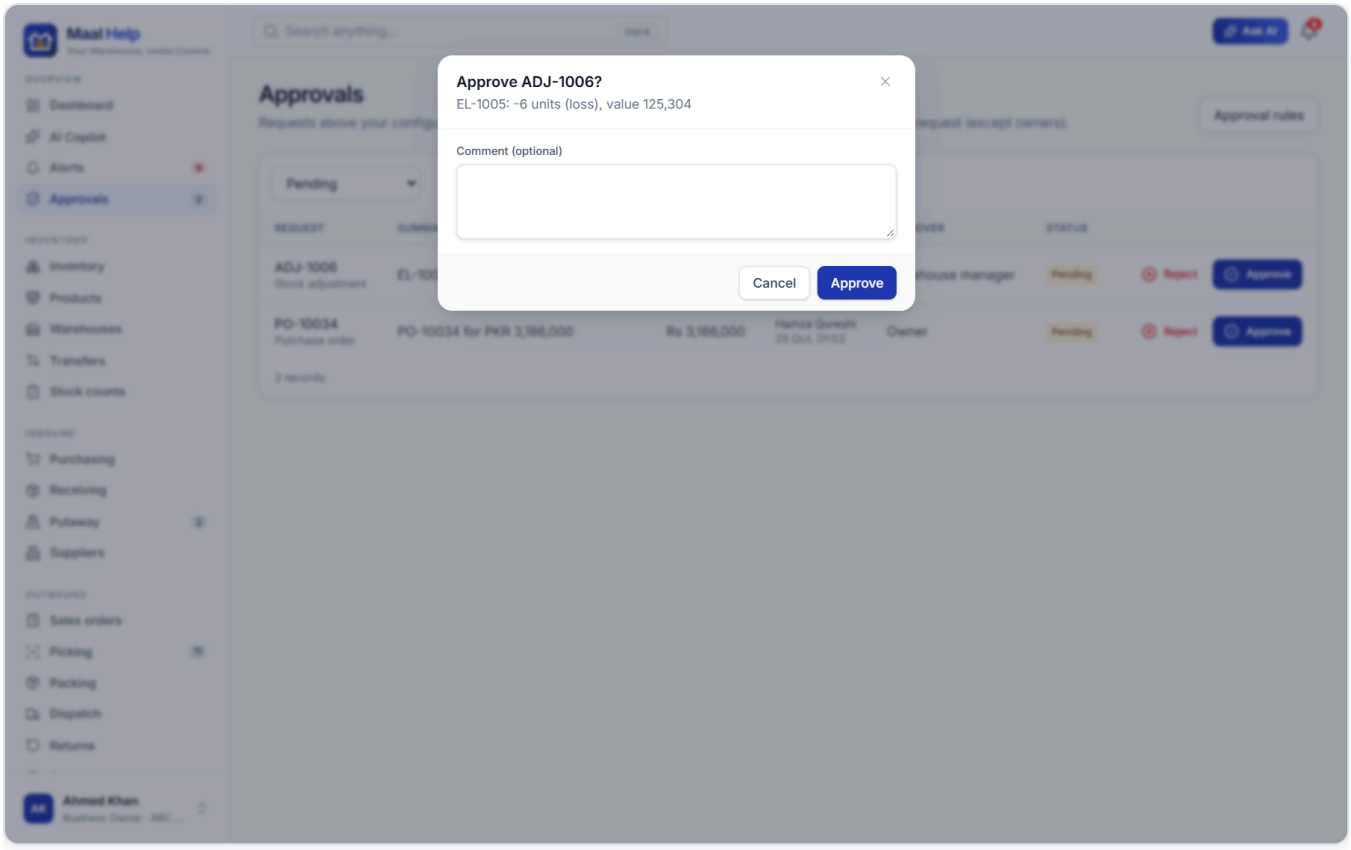

Figure 9. Approving a stock adjustment with an optional comment.

1. Open **Approvals**.
2. Read the summary and amount. Open the record if you need more detail.
3. Select **Approve** or **Reject**. Add a comment, which is kept in the audit trail.
4. Approving posts the underlying transaction (for example the stock adjustment) immediately.

> You cannot approve your own request; only the Business Owner is exempt. Thresholds are set in **Settings → Approval rules**.

5 End-to-end workflows

Trace a stock difference

1. Find the product in **Inventory** → **Movement ledger**.
2. Follow each movement to its source document (GRN, order, transfer, adjustment, count).
3. Check the **Audit trail** for who approved adjustments and when.

Review approvals

1. Filter the audit trail by approval actions.
2. Confirm no one approved their own request and that thresholds were respected.

6 Reports, notifications and exceptions

Reports and exports

Stock movement, Adjustments, Stock variance, Inventory valuation, Receivables, Payables, plus any report in the library.

Open **Reports**, choose a report, set filters and export to Excel, CSV or PDF, or print. You see only the reports your role may view.

Notifications and alerts

Auditors can read alerts but do not act on them.

The bell at the top right lists new notifications. In-app alerts are always on; email and WhatsApp alerts depend on your company's settings.

When something is refused

Message	Meaning	What to do
Insufficient stock	Not enough *available* units at that place	Check reserved, quarantine or dock stock; choose another location or wait
Wrong location / wrong product	The scan does not match the task	Go to the right place or item and scan again
Quantity exceeds the task	More than required	Enter the task quantity
Pending approval	Above the company threshold	An approver must approve; nothing is posted yet
You don't have permission	Your role lacks the action	Ask your administrator
Credit limit exceeded	Customer balance too high	Collect payment or ask the owner

7 FAQ and troubleshooting

Frequently asked questions

Could someone have changed history?

The ledger and audit log are append-only at database level: updates and deletes are rejected.

Why can’t I see a menu or button?

Your role does not include that permission. Ask your administrator. Permissions are checked by the server.

Can I edit or delete a posted stock movement?

No. History is permanent. Corrections are new transactions (an adjustment or reversal) with a reason, so the audit trail stays complete.

Why does the screen say stock is not available?

It may be reserved for another order, in quarantine, damaged, expired, in transit or still at the receiving dock waiting for putaway.

Is my data visible to other companies?

No. Every company’s data is isolated, and requests for another company’s records are refused.

Troubleshooting

Problem	Solution
A button is greyed out or missing	Expected. The Auditor role is read-only.
“Missing anti-forgery header” or 403 when saving	Refresh the page. If it persists, you may lack permission for the action.
Account locked	Too many wrong passwords. Wait a few minutes or ask your administrator to reset your password.

> Still stuck? Note the screen, the record number (for example SO-10245) and the exact message, and contact your company administrator.

8 Glossary and quick reference

Quick reference

I want to...	Go to
Who did what	**Audit trail**
Stock history	**Inventory → Movement ledger**
Export	**Reports → (report) → Excel/CSV/PDF**
Search anything	**Ctrl + K**

Glossary

Term	Meaning
SKU	Stock-keeping unit: one product code.
GRN	Goods received note: the record of a delivery received.
PO	Purchase order to a supplier.
SO	Sales order from a customer.
Putaway	Moving received goods from the dock into a storage location.
FEFO	First-expiry-first-out: older-expiry batches are reserved and picked first.
Reserved	Units promised to a confirmed order; not available for other orders.
Quarantine	Units held for inspection; not sellable.
In transit	Units dispatched on a transfer but not yet received.
Ledger	The permanent, append-only list of every stock movement.
Wave	A group of pick tasks picked together (batch or zone).
Back-order	The part of an order that could not be reserved yet.
3PL / storage client	A business whose goods you store and bill for storage and handling.
NTN / STRN	Pakistan national tax number / sales tax registration number.
Blind count	A count where the counter does not see the expected quantity.
