1 Introduction

Who this manual is for

This manual is for people with the **Dispatch Officer** role in Maal Help. Dispatches packed orders with vehicle, driver or courier details and updates delivery status.

Maal Help is a warehouse operating system: stock by warehouse, location, batch and owner on a permanent ledger, plus purchasing, sales and fulfilment, billing, reports and an AI Copilot that answers from your own data.

Your role can

- ✓ Dispatch packed orders
- ✓ Record vehicle, driver, courier and tracking
- ✓ Update shipment status to delivered
- ✓ View customers and sales orders

Your role cannot

- ✗ Pick, pack or adjust stock
- ✗ See invoice amounts

Screens show the fictional demo company **ABC Trading & Warehousing**. Your company's names and numbers will differ. Menus show only what your role is allowed to use.

2 Access and navigation

Signing in

Maal Help runs in any modern browser on a computer, tablet or Android phone. Your company administrator creates your account and gives you a temporary password.

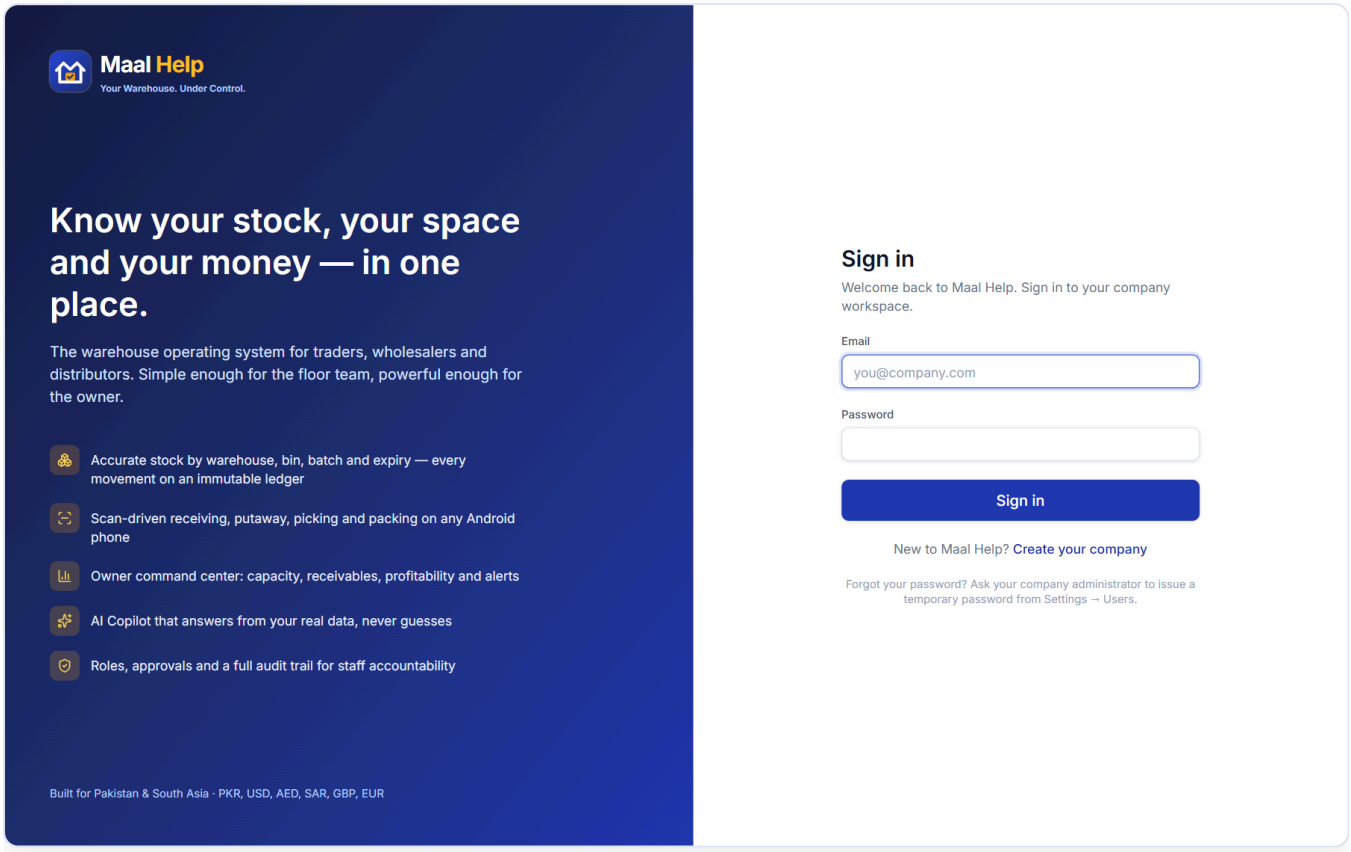

Figure 1. The Maal Help sign-in page.

1. Open the Maal Help address your company gave you.
2. Enter your work email and password, then select **Sign in**.
3. The first time, change your temporary password: **Settings** → **My profile** → **Change password** (at least 10 characters with letters and numbers).
4. Forgot your password? Ask your company administrator to issue a temporary one (**Settings** → **Users** → **Reset password**).

> After 8 wrong passwords the account is locked for a short time. Wait, then try again.

> Sign out on shared computers. Sessions also expire automatically.

Finding your way around

The left sidebar shows only the screens your role may use. Counts next to a menu item (for example Putaway 2) show open work.

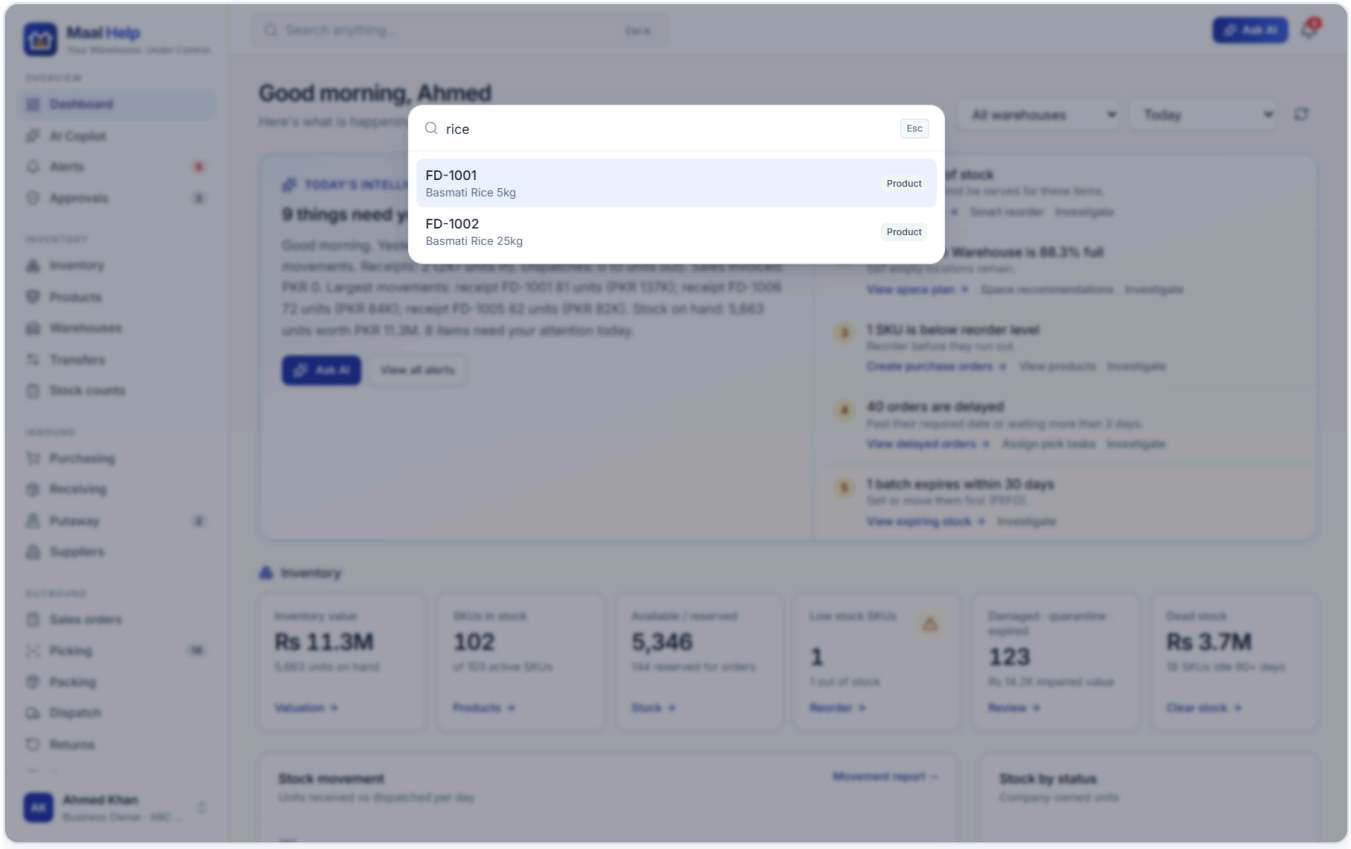

Figure 2. Press Ctrl + K anywhere to search products, orders, customers, locations and screens.

1. Use the **sidebar** to move between screens. Your name and role are at the bottom.
2. Use **Search anything...** at the top, or press **Ctrl + K**, then type a SKU, barcode, order number or name.
3. The **bell** opens your notifications. **Ask AI** opens the Copilot (if your role has it).
4. Tables support search, filters, sorting and paging. Click a row to open the record.

> If a screen or button you expect is missing, your role does not include that permission. Ask your administrator. The server enforces permissions, so hiding a menu is never the only control.

The mobile task app

Floor roles land on a simplified phone app with large buttons. Numbers on the buttons show waiting tasks.

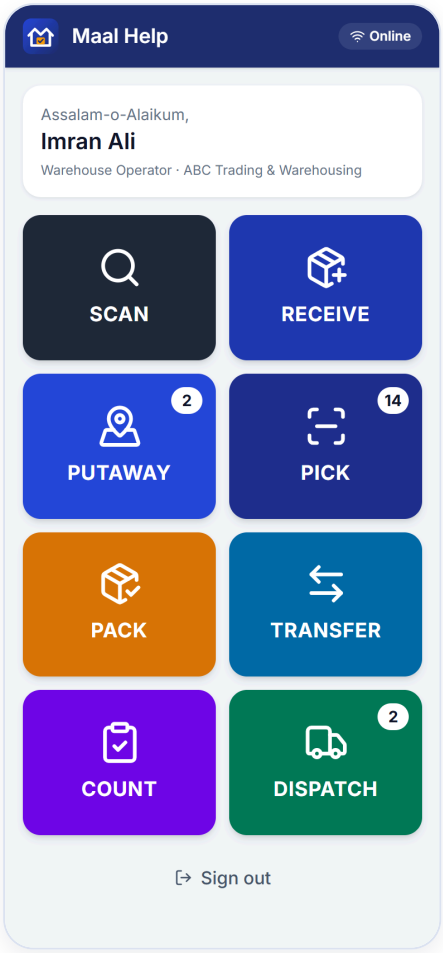

Figure 3. Mobile home for a Warehouse Operator.

1. Open Maal Help on your Android phone and sign in. Floor roles go straight to the task app.
2. Optional: use the browser menu **Add to Home screen** to install Maal Help like an app.
3. Tap a task button (RECEIVE, PUTAWAY, PICK, PACK, TRANSFER, COUNT, DISPATCH, SCAN).
4. Scan with a Bluetooth/USB scanner, or tap the **camera** button to scan with the phone camera, or type the code.

> The badge at the top right shows **Online** or **Offline**. Offline scans are queued and sent automatically when the connection returns (see Offline sync).

3 Your home screen

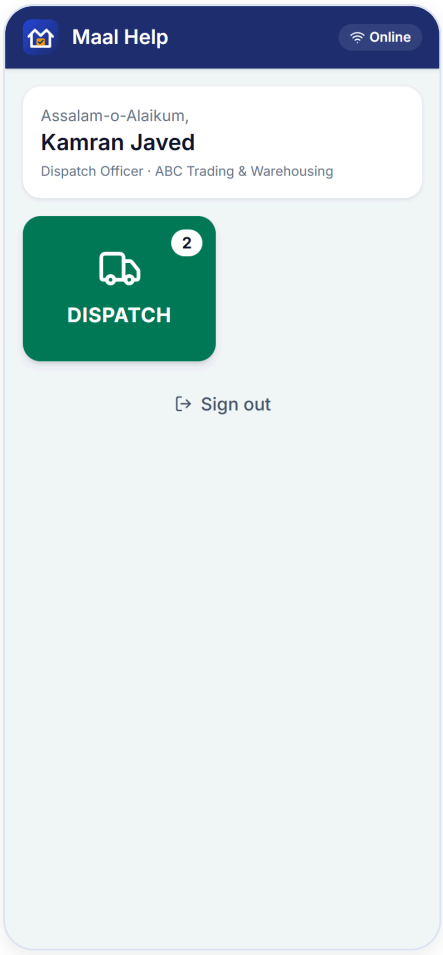

Figure 4. Dispatch Officer mobile home.

- DISPATCH shows packed orders waiting for a vehicle.

4 Features step by step

Dispatch and delivery tracking

Hand packed orders to a vehicle or courier, then track delivery: Ready → Dispatched → In transit → Delivered.

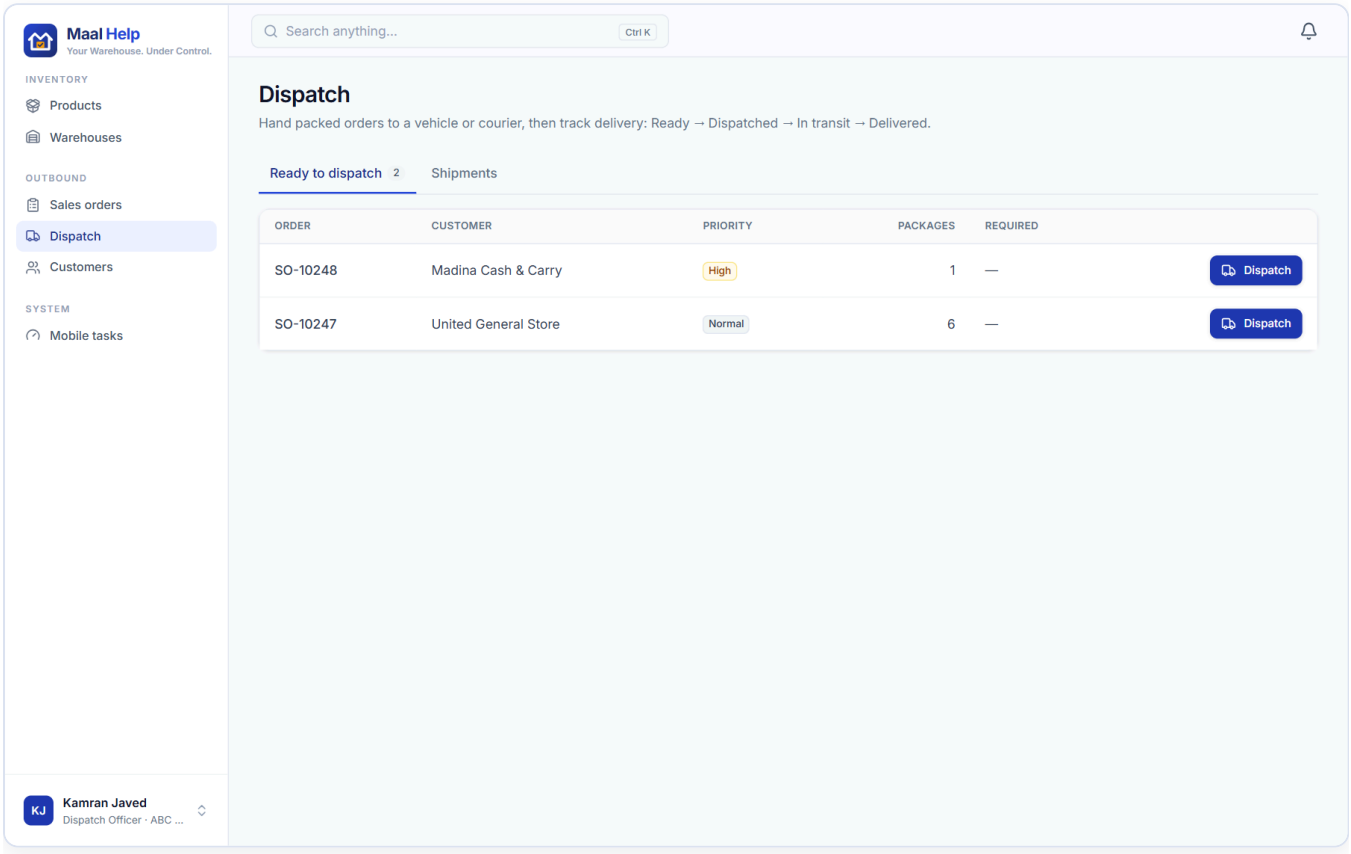

Figure 5. Orders ready to dispatch.

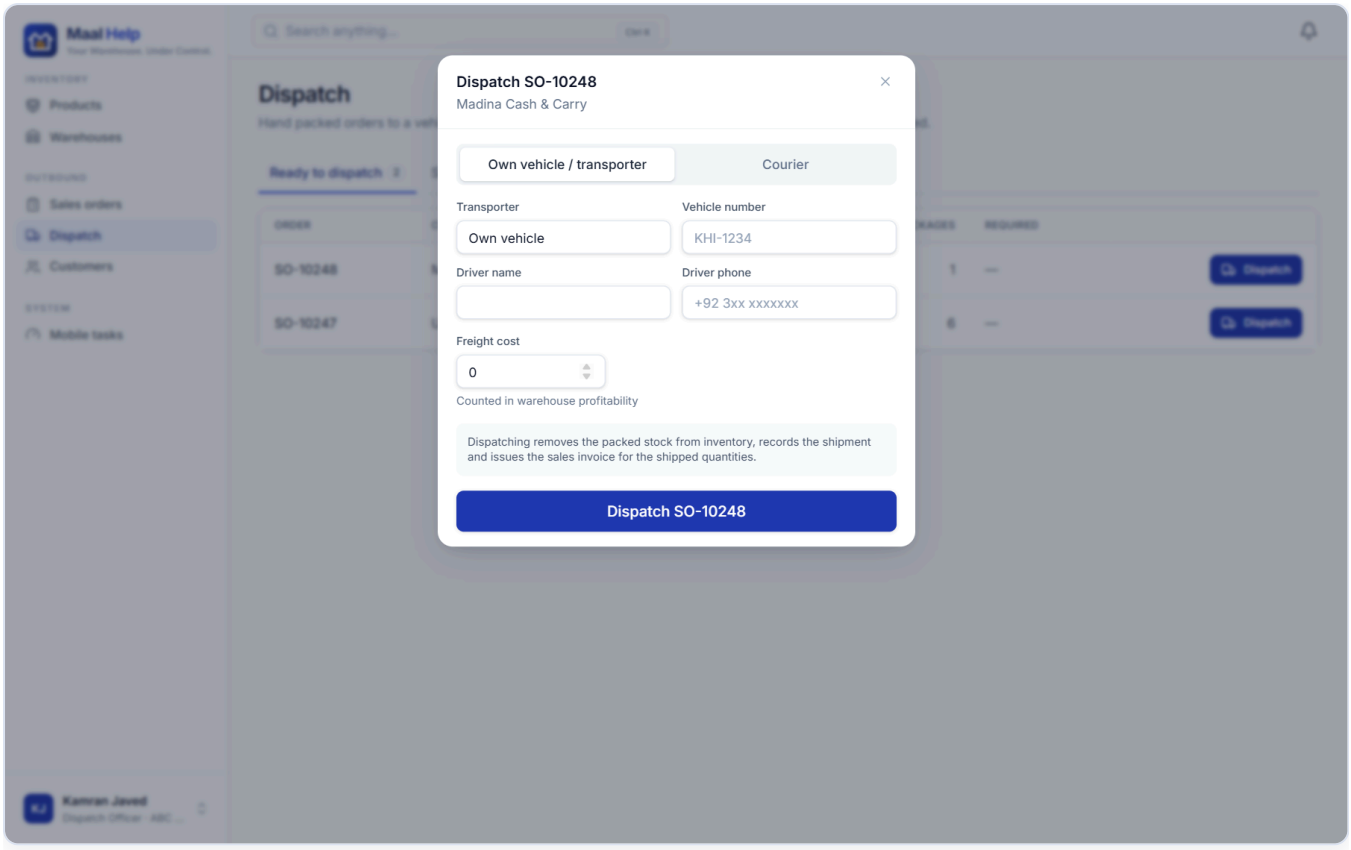

Figure 6. Dispatch details: own vehicle or courier, vehicle, driver, freight cost.

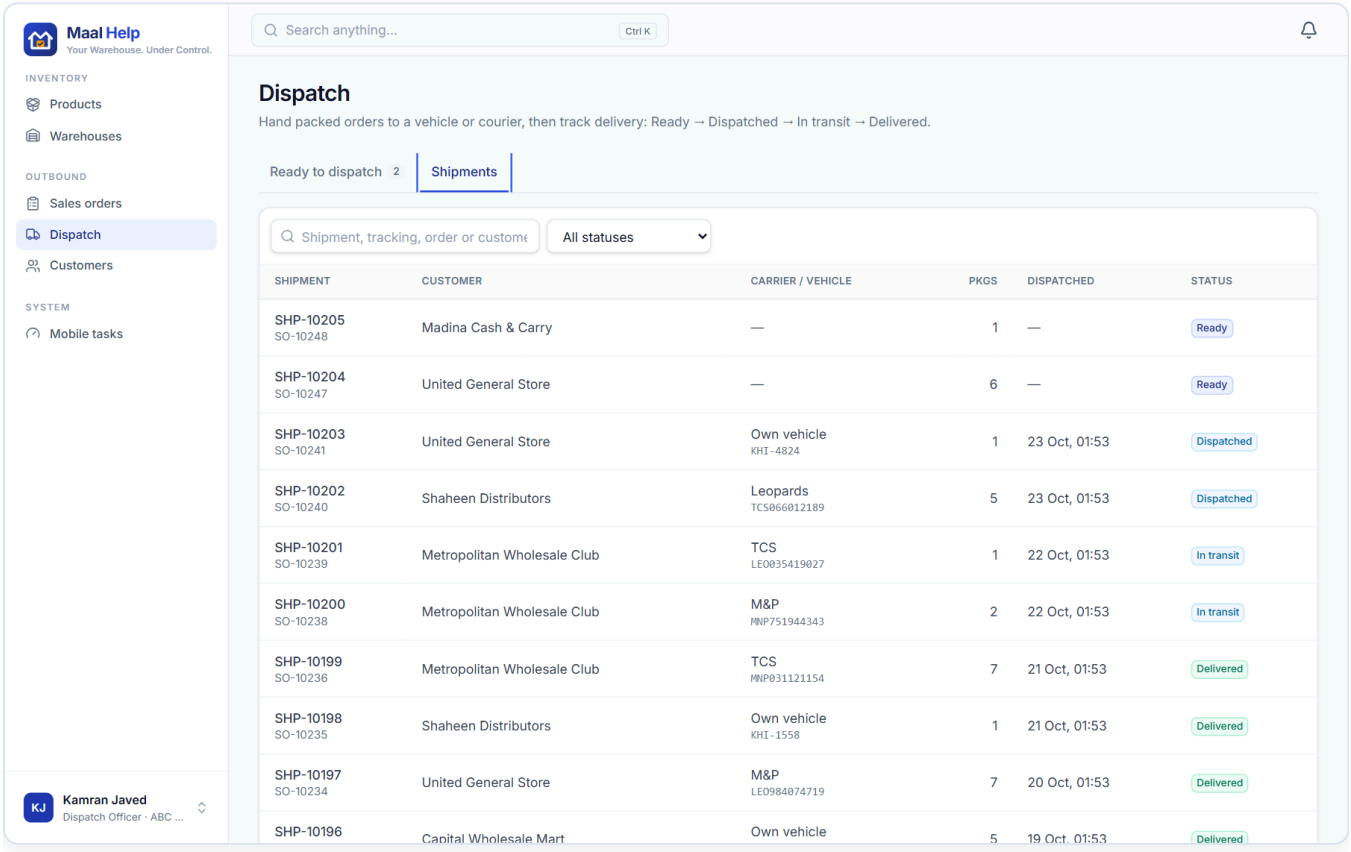

Figure 7. Shipments and their delivery status.

1. Open **Dispatch → Ready to dispatch** and select **Dispatch** on an order.

2. Choose **Own vehicle / transporter** or **Courier**. Enter vehicle number, driver name and phone, and freight cost.
3. Confirm. Packed stock leaves inventory, the shipment is recorded and the sales invoice is issued.
4. In **Shipments**, update the status as the delivery progresses (In transit, Delivered).

> Courier connections in this version are demo (mock) connectors. Enter tracking numbers manually.

Dispatch on the phone

Packed orders ready to leave.

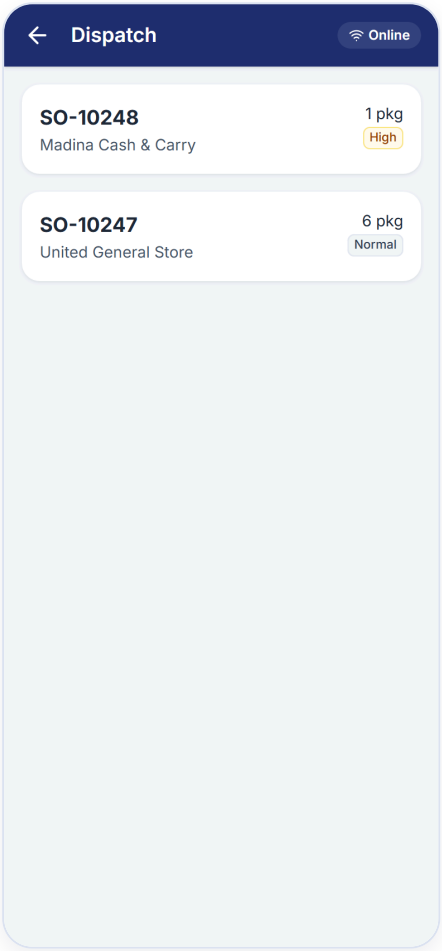

Figure 8. Orders ready to dispatch with package count and priority.

1. Tap **DISPATCH** and choose the order being loaded.
2. Enter vehicle, driver and phone (or courier and tracking number) and confirm.

Customers

Buyers and storage clients, with balances and credit limits.

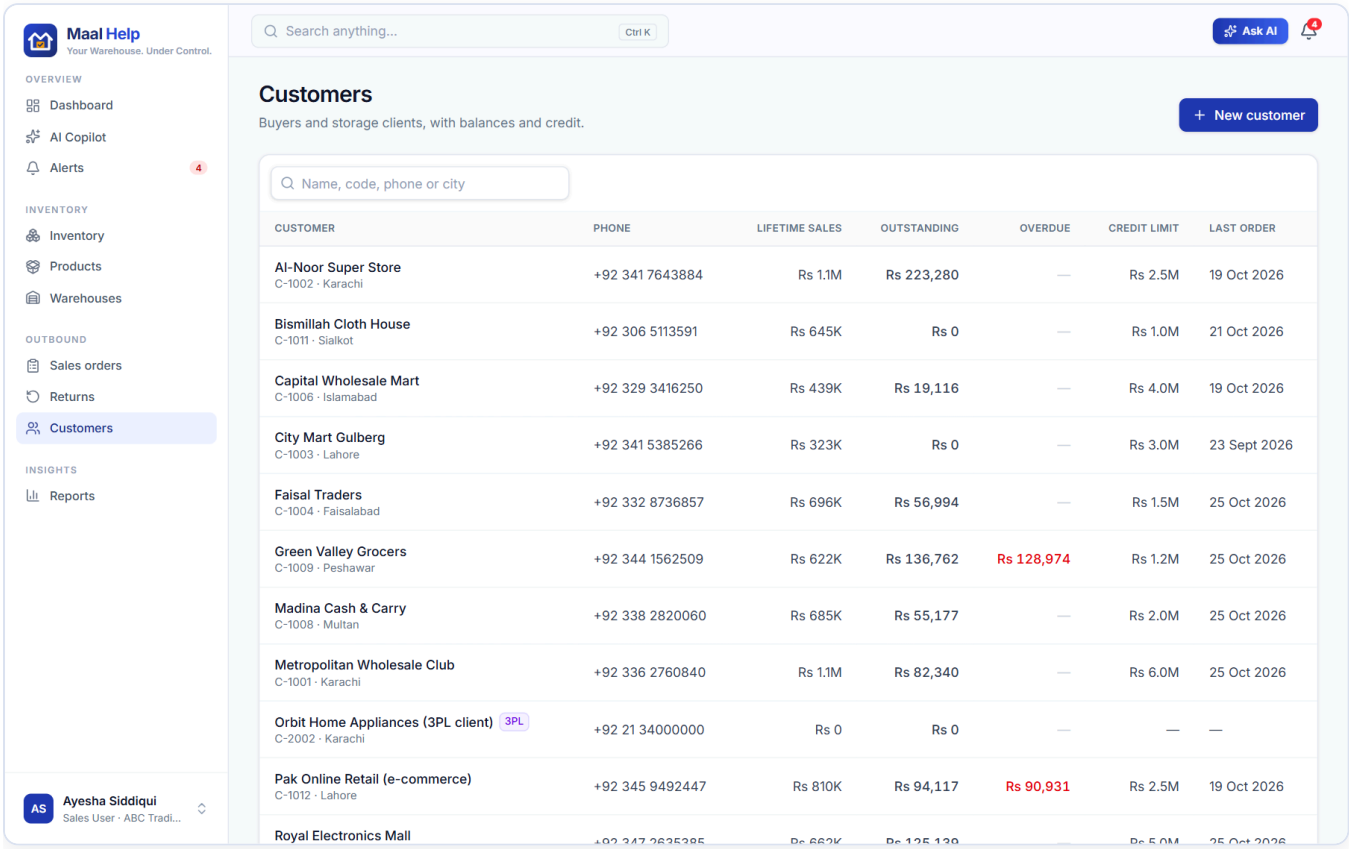

Figure 9. Customers with lifetime sales, outstanding, overdue and credit limit.

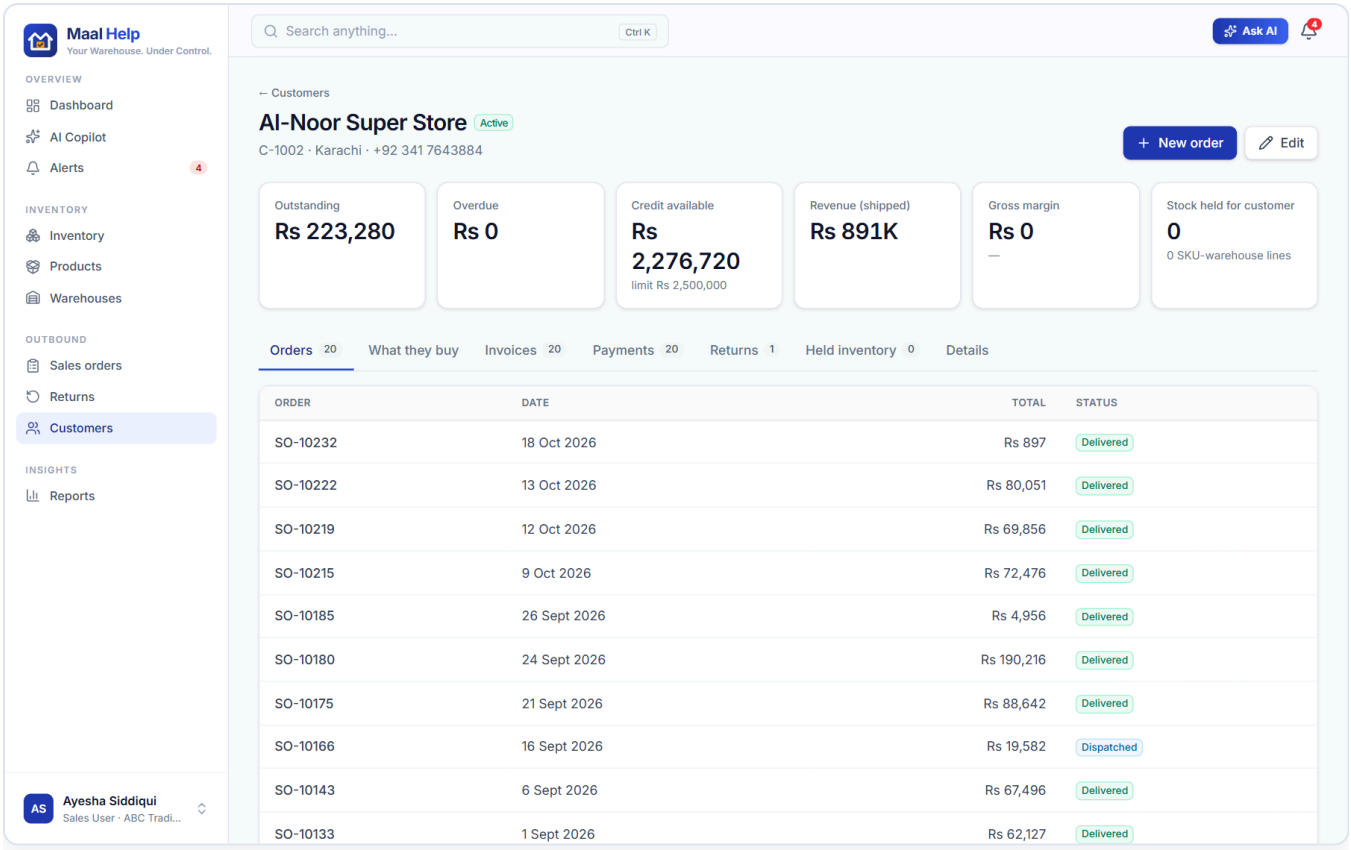

Figure 10. Customer 360°: orders, invoices, payments and stock held for them.

1. **Customers → New customer**: name, contact, phone, city, NTN/STRN, credit limit and payment terms. Mark storage (3PL) clients.
2. Open a customer to see orders, invoices, payments and balance.

5 End-to-end workflows

Load a vehicle

1. Open **Dispatch** → **Ready to dispatch**.
2. Check the package count against the cartons being loaded.
3. Dispatch each order with vehicle number, driver name and phone.
4. When the driver confirms delivery, mark the shipment **Delivered**.

6 Reports, notifications and exceptions

Reports and exports

Shipments tab. Managers use the Dispatch performance report.

Open **Reports**, choose a report, set filters and export to Excel, CSV or PDF, or print. You see only the reports your role may view.

Notifications and alerts

Delayed orders and packed orders waiting for dispatch appear as alerts for managers.

The bell at the top right lists new notifications. In-app alerts are always on; email and WhatsApp alerts depend on your company's settings.

When something is refused

Message	Meaning	What to do
Insufficient stock	Not enough *available* units at that place	Check reserved, quarantine or dock stock; choose another location or wait
Wrong location / wrong product	The scan does not match the task	Go to the right place or item and scan again
Quantity exceeds the task	More than required	Enter the task quantity
Pending approval	Above the company threshold	An approver must approve; nothing is posted yet
You don't have permission	Your role lacks the action	Ask your administrator
Credit limit exceeded	Customer balance too high	Collect payment or ask the owner

7 FAQ and troubleshooting

Frequently asked questions

Can I undo a dispatch?

No. Dispatch removes stock and issues the invoice. Goods coming back are processed as a customer return.

Why can’t I see a menu or button?

Your role does not include that permission. Ask your administrator. Permissions are checked by the server.

Can I edit or delete a posted stock movement?

No. History is permanent. Corrections are new transactions (an adjustment or reversal) with a reason, so the audit trail stays complete.

Why does the screen say stock is not available?

It may be reserved for another order, in quarantine, damaged, expired, in transit or still at the receiving dock waiting for putaway.

Is my data visible to other companies?

No. Every company’s data is isolated, and requests for another company’s records are refused.

Troubleshooting

Problem	Solution
Order not in Ready to dispatch	Packing is not complete yet. Check with the packing station.
“Missing anti-forgery header” or 403 when saving	Refresh the page. If it persists, you may lack permission for the action.
Account locked	Too many wrong passwords. Wait a few minutes or ask your administrator to reset your password.

> Still stuck? Note the screen, the record number (for example SO-10245) and the exact message, and contact your company administrator.

8 Glossary and quick reference

Quick reference

I want to...	Go to
Dispatch	**Dispatch → Ready to dispatch**
Delivery status	**Dispatch → Shipments**
Search anything	**Ctrl + K**

Glossary

Term	Meaning
SKU	Stock-keeping unit: one product code.
GRN	Goods received note: the record of a delivery received.
PO	Purchase order to a supplier.
SO	Sales order from a customer.
Putaway	Moving received goods from the dock into a storage location.
FEFO	First-expiry-first-out: older-expiry batches are reserved and picked first.
Reserved	Units promised to a confirmed order; not available for other orders.
Quarantine	Units held for inspection; not sellable.
In transit	Units dispatched on a transfer but not yet received.
Ledger	The permanent, append-only list of every stock movement.
Wave	A group of pick tasks picked together (batch or zone).
Back-order	The part of an order that could not be reserved yet.
3PL / storage client	A business whose goods you store and bill for storage and handling.
NTN / STRN	Pakistan national tax number / sales tax registration number.
Blind count	A count where the counter does not see the expected quantity.
