1 Introduction

Who this manual is for

This manual is for people with the **Picker / Packer** role in Maal Help. Picks assigned tasks with scan verification and packs orders at the packing station.

Maal Help is a warehouse operating system: stock by warehouse, location, batch and owner on a permanent ledger, plus purchasing, sales and fulfilment, billing, reports and an AI Copilot that answers from your own data.

Your role can

- ✓ Pick tasks (scan location, product, quantity)
- ✓ Report short picks
- ✓ Pack orders with scan verification; print packing slips and labels

Your role cannot

- ✗ Dispatch orders
- ✗ Adjust stock
- ✗ See prices

Screens show the fictional demo company **ABC Trading & Warehousing**. Your company's names and numbers will differ. Menus show only what your role is allowed to use.

2 Access and navigation

Signing in

Maal Help runs in any modern browser on a computer, tablet or Android phone. Your company administrator creates your account and gives you a temporary password.

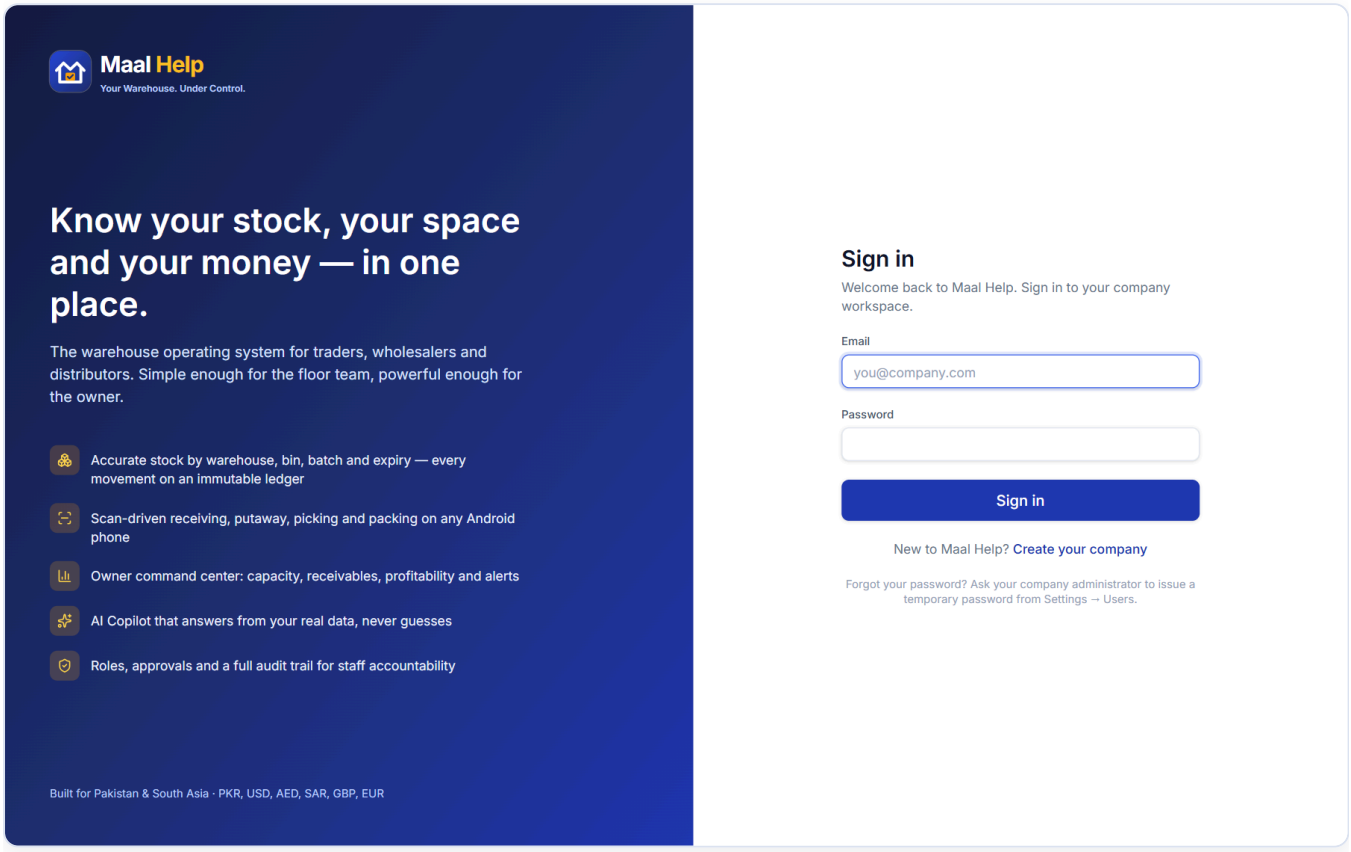

Figure 1. The Maal Help sign-in page.

1. Open the Maal Help address your company gave you.
2. Enter your work email and password, then select **Sign in**.
3. The first time, change your temporary password: **Settings** → **My profile** → **Change password** (at least 10 characters with letters and numbers).
4. Forgot your password? Ask your company administrator to issue a temporary one (**Settings** → **Users** → **Reset password**).

> After 8 wrong passwords the account is locked for a short time. Wait, then try again.

> Sign out on shared computers. Sessions also expire automatically.

Finding your way around

The left sidebar shows only the screens your role may use. Counts next to a menu item (for example Putaway 2) show open work.

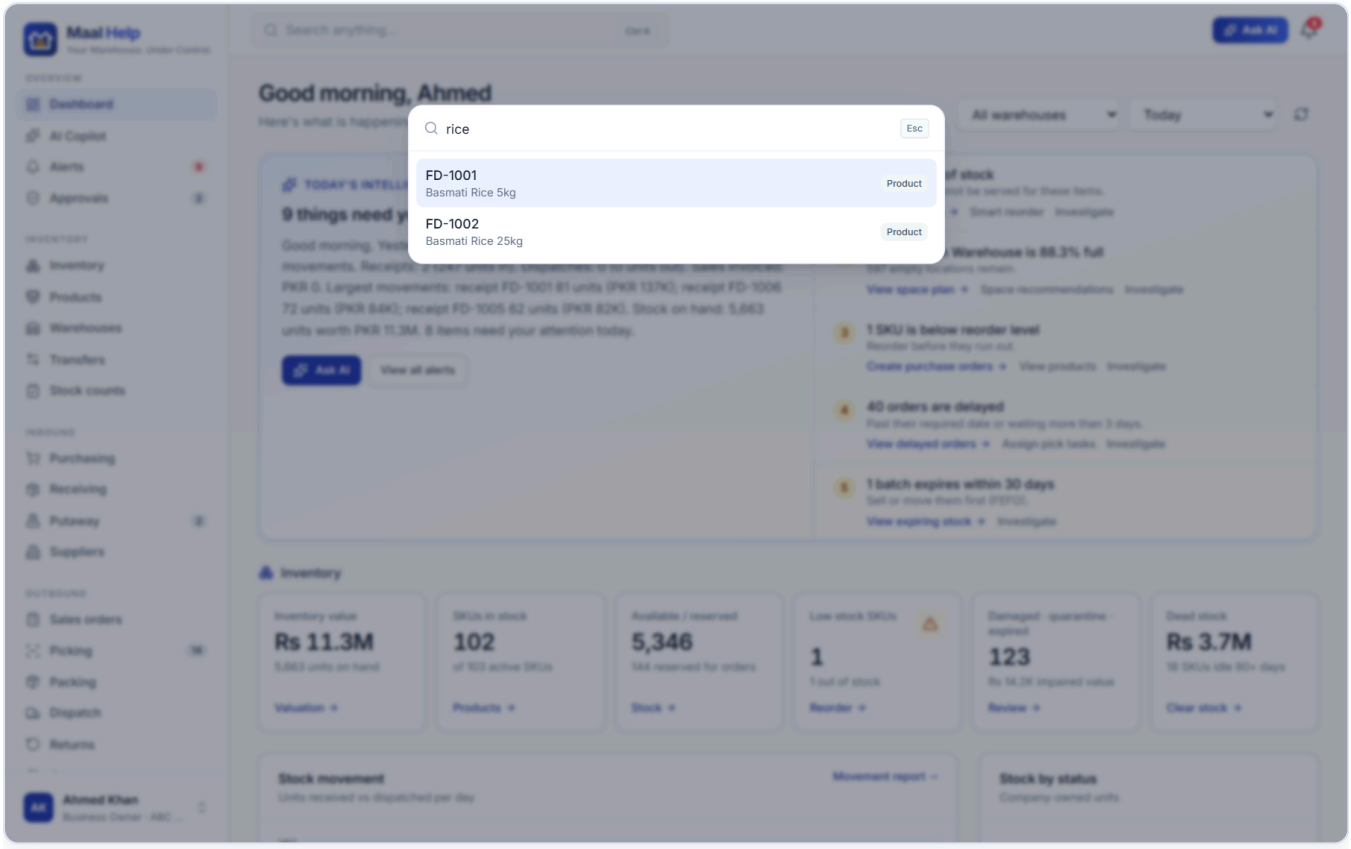

Figure 2. Press Ctrl + K anywhere to search products, orders, customers, locations and screens.

1. Use the **sidebar** to move between screens. Your name and role are at the bottom.
2. Use **Search anything...** at the top, or press **Ctrl + K**, then type a SKU, barcode, order number or name.
3. The **bell** opens your notifications. **Ask AI** opens the Copilot (if your role has it).
4. Tables support search, filters, sorting and paging. Click a row to open the record.

> If a screen or button you expect is missing, your role does not include that permission. Ask your administrator. The server enforces permissions, so hiding a menu is never the only control.

The mobile task app

Floor roles land on a simplified phone app with large buttons. Numbers on the buttons show waiting tasks.

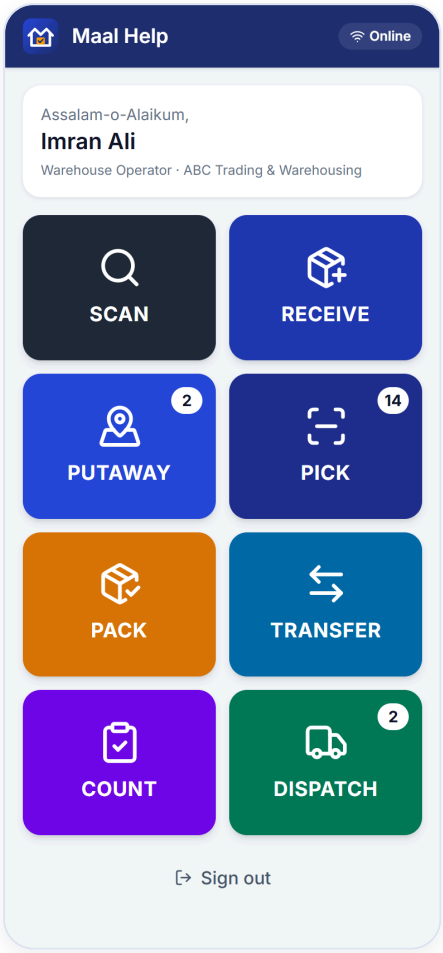

Figure 3. Mobile home for a Warehouse Operator.

1. Open Maal Help on your Android phone and sign in. Floor roles go straight to the task app.
2. Optional: use the browser menu **Add to Home screen** to install Maal Help like an app.
3. Tap a task button (RECEIVE, PUTAWAY, PICK, PACK, TRANSFER, COUNT, DISPATCH, SCAN).
4. Scan with a Bluetooth/USB scanner, or tap the **camera** button to scan with the phone camera, or type the code.

> The badge at the top right shows **Online** or **Offline**. Offline scans are queued and sent automatically when the connection returns (see Offline sync).

3 Your home screen

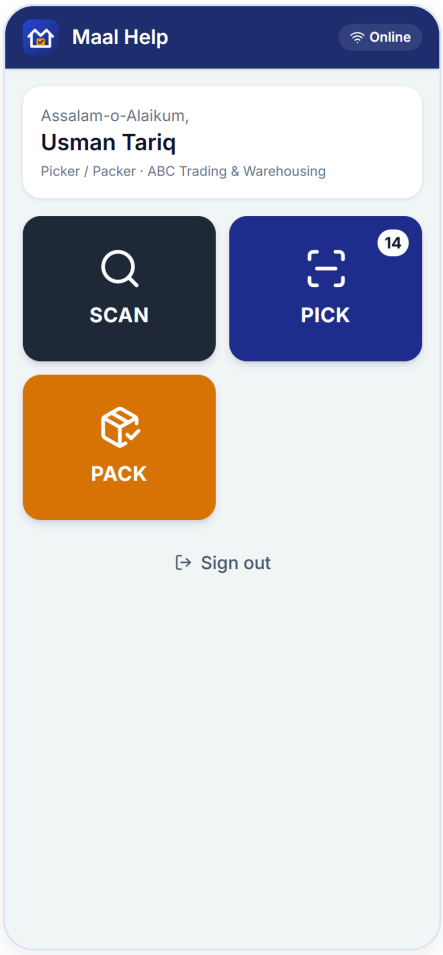

Figure 4. Picker / Packer mobile home.

- PICK shows your open tasks (urgent first). PACK shows orders ready to pack.

4 Features step by step

Pick on the phone

Three steps per task: 1. Scan location · 2. Scan product · 3. Quantity.

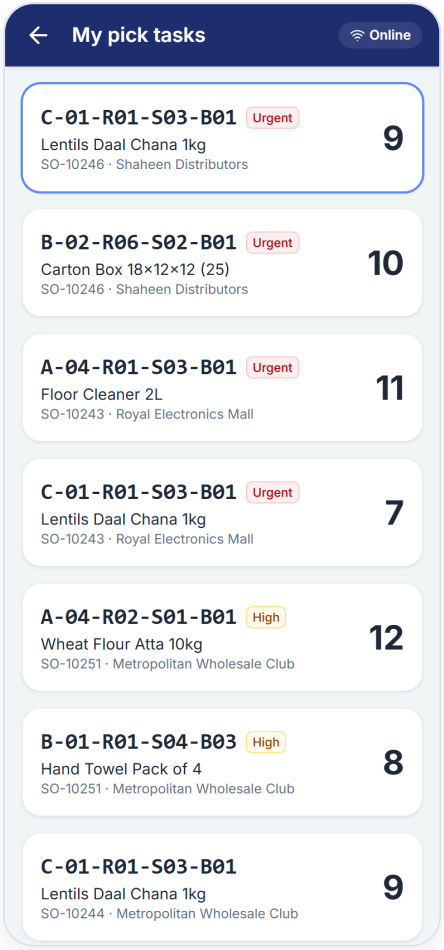

Figure 5. My pick tasks, urgent first.

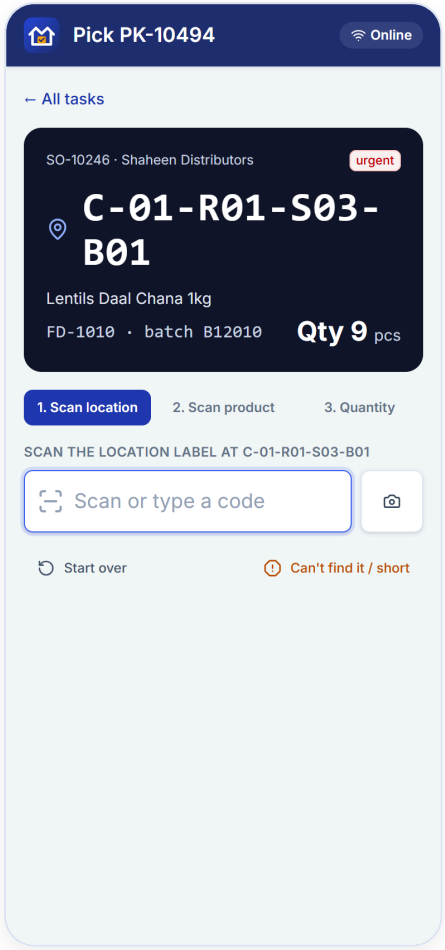

Figure 6. A pick task: location, product, batch and quantity.

1. Tap **PICK** and open the first task.
2. Go to the location shown in large letters and scan its label.
3. Scan the product barcode.
4. Enter or confirm the quantity, then continue to the next task.
5. If you cannot find the stock, tap **Can't find it / short**. **Start over** clears the scans for this task.

Picking

Tasks are ordered by priority, required date and walking sequence. Scan location and product to confirm. Wrong items are blocked.

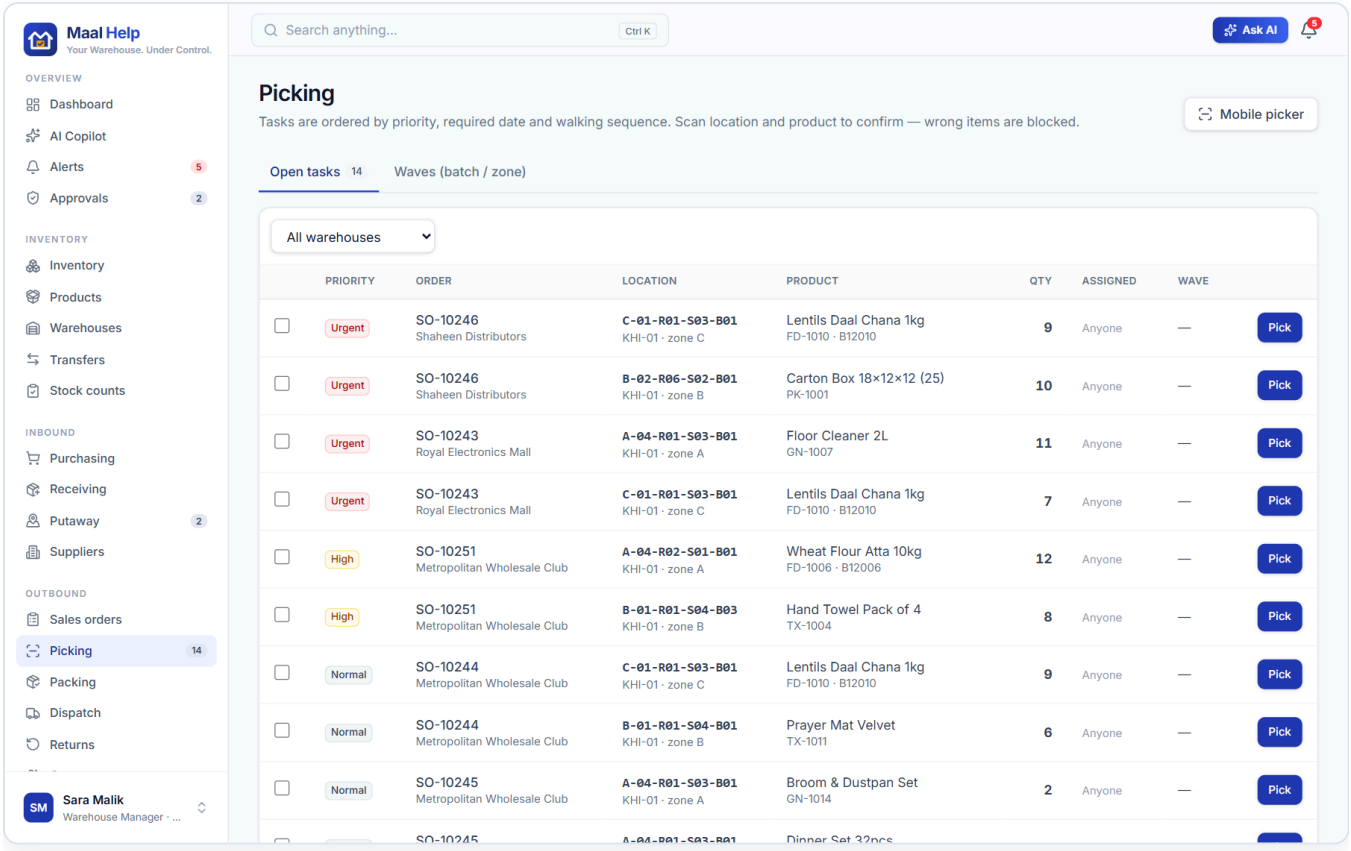

Figure 7. Open pick tasks and waves (batch/zone).

1. Open **Picking**. Supervisors can assign tasks and group them into **Waves (batch / zone)**.
2. Pickers use **Mobile picker** (or PICK on the phone): go to the location, scan the location label, scan the product, enter the quantity.
3. If the stock is not there, use **Can't find it / short**. The missing quantity is blocked for a count and re-reserved elsewhere if possible.

> Errors you may see: *wrong location*, *wrong product*, *quantity exceeds the task*. Fix the scan and try again.

Pack on the phone

Orders appear here when all picks are finished.

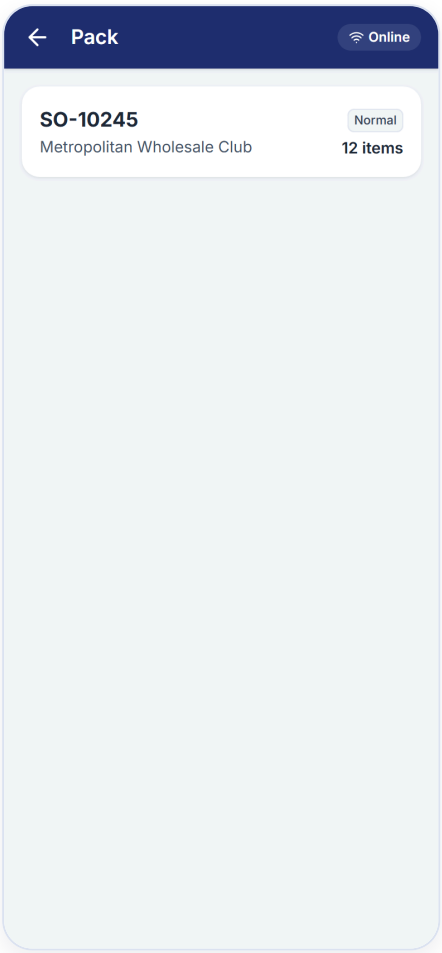

Figure 8. Orders waiting to be packed.

1. Tap **PACK** and choose the order.
2. Scan each item into the carton until every line is complete.
3. Enter the number and weight of boxes and complete packing.

Packing station

Scan each picked item into the carton. The system confirms correct products and quantities before the carton can be closed.

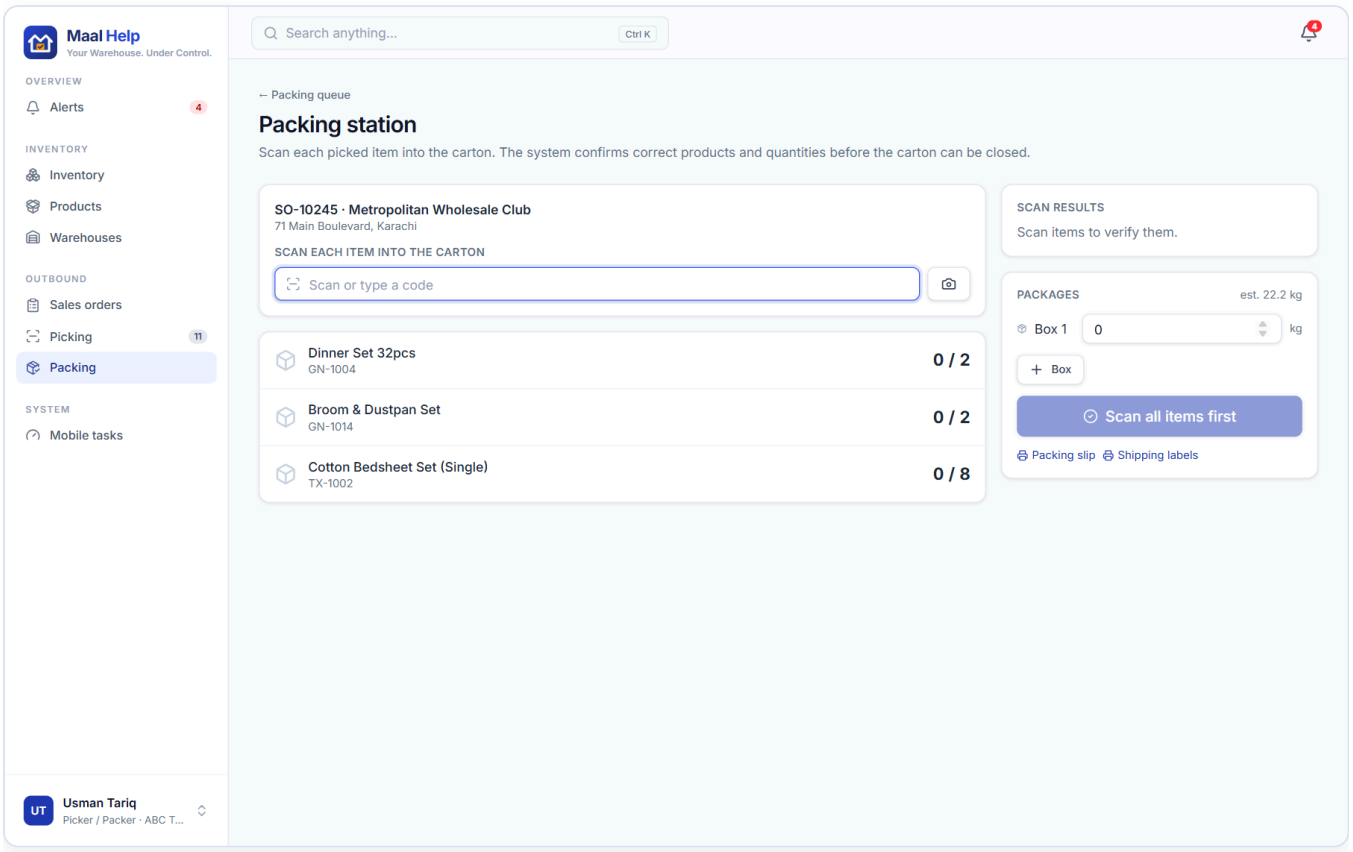

Figure 9. An order ready to pack.

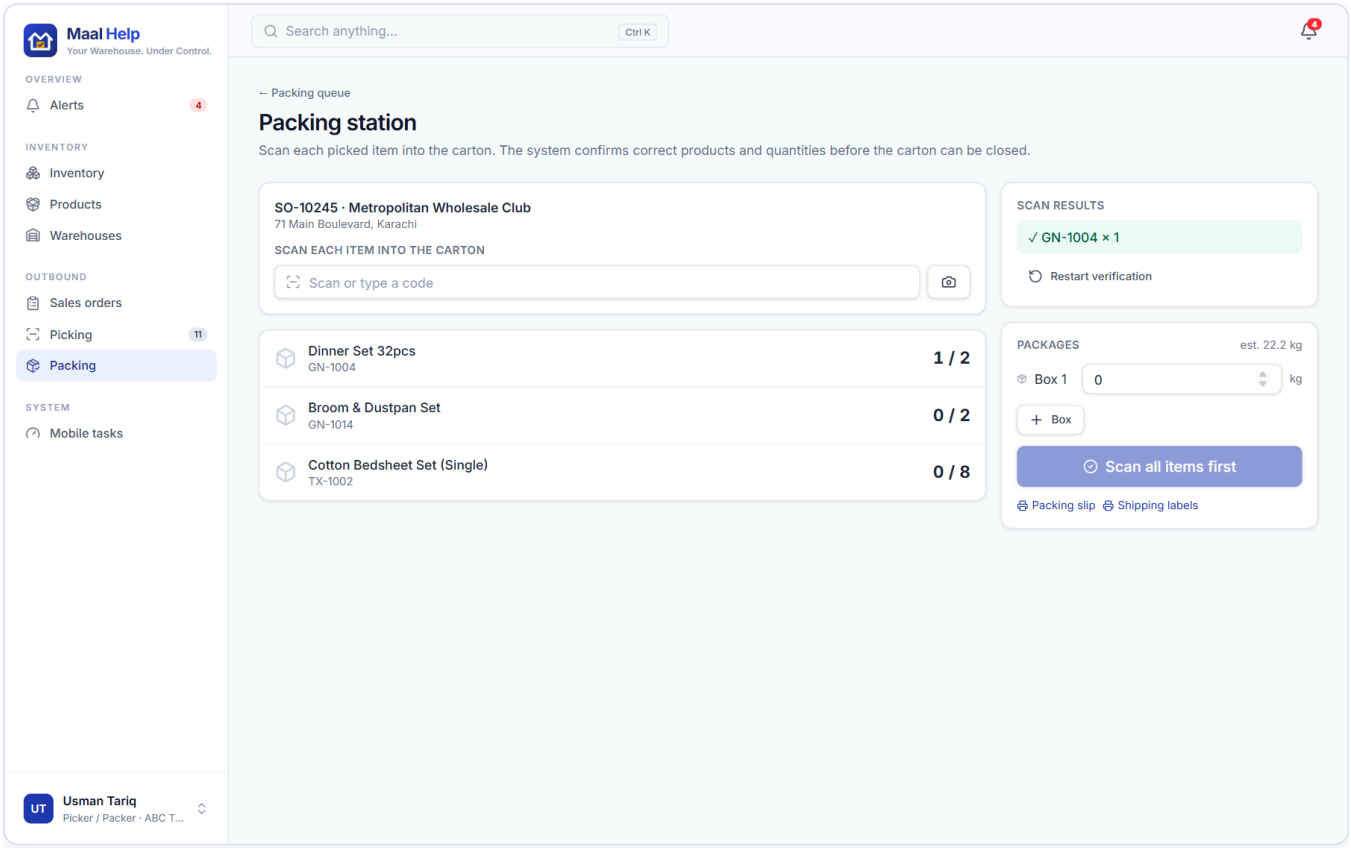

Figure 10. After a verification scan: GN-1004 1/2 confirmed.

1. Open **Packing** and choose the order (orders appear when all picks are finished).
2. Scan each item. Scan results show ✓ correct, or ✗ wrong product / excess quantity.
3. Add boxes and weights under **Packages**.
4. When all items are scanned, complete packing. Print the **Packing slip** and **Shipping labels**.
5. **Restart verification** clears the scans if you need to start the carton again.

Scan lookup

Scan any product or location to see what is where.

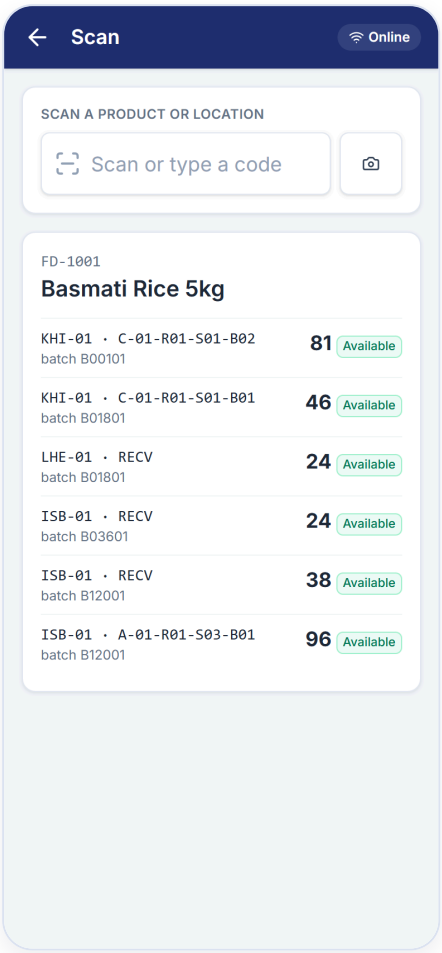

Figure 11. Scanning FD-1001 shows its stock by warehouse, location, batch and status.

1. Tap **SCAN** and scan a product or location label (or type the code).
2. Read the stock by location, batch and status.

Offline sync

If the network drops, your scans are kept on the phone and sent when it returns, without double posting.

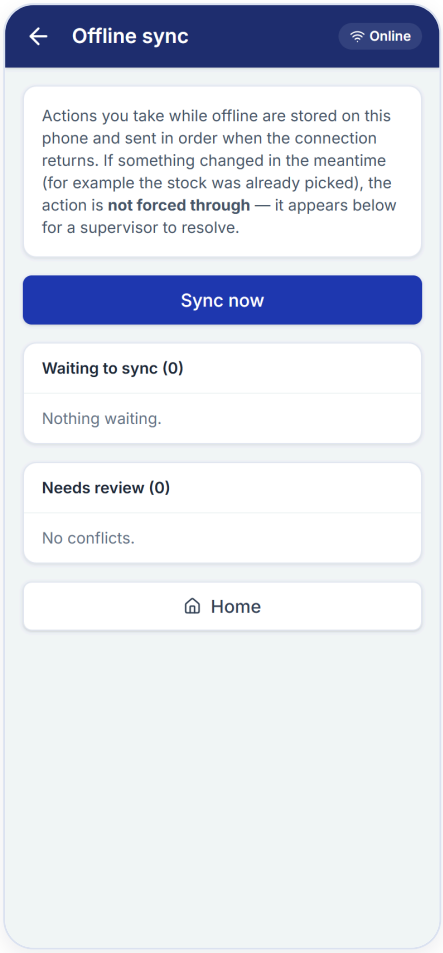

Figure 12. Offline sync: waiting items and conflicts.

1. Watch the **Online/Offline** badge.
2. When back online, open **Sync** and tap **Sync now** (it also syncs automatically).
3. If something could not be applied (for example the stock was already moved), it appears under conflicts. Read it, fix the situation and **Dismiss**.

> Offline mode covers short outages. Do not work offline for a whole shift.

5 End-to-end workflows

Pick and pack an order

1. Open PICK; do tasks top to bottom.
2. At each location: scan location → scan product → quantity.
3. When all tasks are done, the order moves to PACK.
4. At the packing station scan every item, add boxes and weights, complete packing, print the slip and labels.

6 Reports, notifications and exceptions

Reports and exports

No reports. Your supervisor sees picking performance.

Open **Reports**, choose a report, set filters and export to Excel, CSV or PDF, or print. You see only the reports your role may view.

Notifications and alerts

Red messages: wrong location, wrong product or quantity exceeds the task. Correct and rescan.

The bell at the top right lists new notifications. In-app alerts are always on; email and WhatsApp alerts depend on your company's settings.

When something is refused

Message	Meaning	What to do
Insufficient stock	Not enough *available* units at that place	Check reserved, quarantine or dock stock; choose another location or wait
Wrong location / wrong product	The scan does not match the task	Go to the right place or item and scan again
Quantity exceeds the task	More than required	Enter the task quantity
Pending approval	Above the company threshold	An approver must approve; nothing is posted yet
You don't have permission	Your role lacks the action	Ask your administrator
Credit limit exceeded	Customer balance too high	Collect payment or ask the owner

7 FAQ and troubleshooting

Frequently asked questions

Packing will not complete

Every line must be fully scanned (“Scan all items first”). Check the counts on each line.

Why can’t I see a menu or button?

Your role does not include that permission. Ask your administrator. Permissions are checked by the server.

Can I edit or delete a posted stock movement?

No. History is permanent. Corrections are new transactions (an adjustment or reversal) with a reason, so the audit trail stays complete.

Why does the screen say stock is not available?

It may be reserved for another order, in quarantine, damaged, expired, in transit or still at the receiving dock waiting for putaway.

Is my data visible to other companies?

No. Every company’s data is isolated, and requests for another company’s records are refused.

Troubleshooting

Problem	Solution
An extra item was scanned at packing	Use **Restart verification** and scan the carton again.
Camera scanning does not start	Allow camera access for the site in the browser settings; use HTTPS; or type the code.
Scanner types into the wrong field	Tap the scan box first. Most scanners act as a keyboard and send Enter after the code.
Offline badge appears	Keep working on short tasks. Scans are queued and synced when the connection returns. Check Sync for conflicts.
“Missing anti-forgery header” or 403 when saving	Refresh the page. If it persists, you may lack permission for the action.
Account locked	Too many wrong passwords. Wait a few minutes or ask your administrator to reset your password.

> Still stuck? Note the screen, the record number (for example SO-10245) and the exact message, and contact your company administrator.

8 Glossary and quick reference

Quick reference

I want to…	Go to
My tasks	**PICK**
Not there	**Can’t find it / short**
Pack	**PACK / Packing**
Labels	**Packing → Shipping labels**
Search anything	**Ctrl + K**

Glossary

Term	Meaning
SKU	Stock-keeping unit: one product code.
GRN	Goods received note: the record of a delivery received.
PO	Purchase order to a supplier.
SO	Sales order from a customer.
Putaway	Moving received goods from the dock into a storage location.
FEFO	First-expiry-first-out: older-expiry batches are reserved and picked first.
Reserved	Units promised to a confirmed order; not available for other orders.
Quarantine	Units held for inspection; not sellable.
In transit	Units dispatched on a transfer but not yet received.
Ledger	The permanent, append-only list of every stock movement.
Wave	A group of pick tasks picked together (batch or zone).
Back-order	The part of an order that could not be reserved yet.
3PL / storage client	A business whose goods you store and bill for storage and handling.
NTN / STRN	Pakistan national tax number / sales tax registration number.
Blind count	A count where the counter does not see the expected quantity.
