1 Introduction

Who this manual is for

This manual is for people with the **Purchase User** role in Maal Help. Manages suppliers and purchase orders, follows up deliveries and uses smart reorder suggestions.

Maal Help is a warehouse operating system: stock by warehouse, location, batch and owner on a permanent ledger, plus purchasing, sales and fulfilment, billing, reports and an AI Copilot that answers from your own data.

Your role can

- ✓ Create and edit suppliers
- ✓ Create and submit purchase orders and purchase returns
- ✓ Receive goods
- ✓ Use Smart reorder and purchase reports

Your role cannot

- ✗ Approve purchase orders
- ✗ See sales margins or receivables

Screens show the fictional demo company **ABC Trading & Warehousing**. Your company's names and numbers will differ. Menus show only what your role is allowed to use.

2 Access and navigation

Signing in

Maal Help runs in any modern browser on a computer, tablet or Android phone. Your company administrator creates your account and gives you a temporary password.

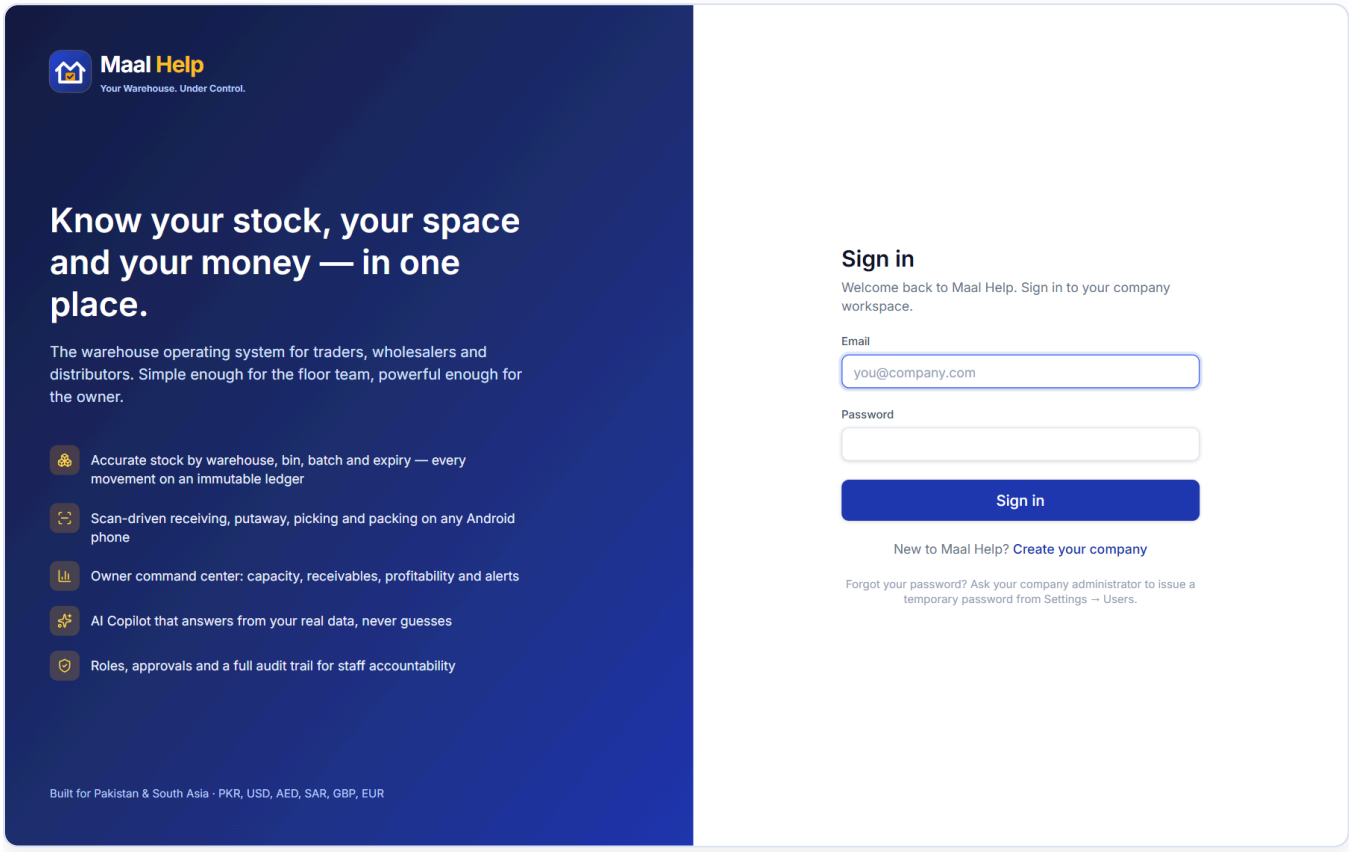

Figure 1. The Maal Help sign-in page.

1. Open the Maal Help address your company gave you.
2. Enter your work email and password, then select **Sign in**.
3. The first time, change your temporary password: **Settings** → **My profile** → **Change password** (at least 10 characters with letters and numbers).
4. Forgot your password? Ask your company administrator to issue a temporary one (**Settings** → **Users** → **Reset password**).

> After 8 wrong passwords the account is locked for a short time. Wait, then try again.

> Sign out on shared computers. Sessions also expire automatically.

Finding your way around

The left sidebar shows only the screens your role may use. Counts next to a menu item (for example Putaway 2) show open work.

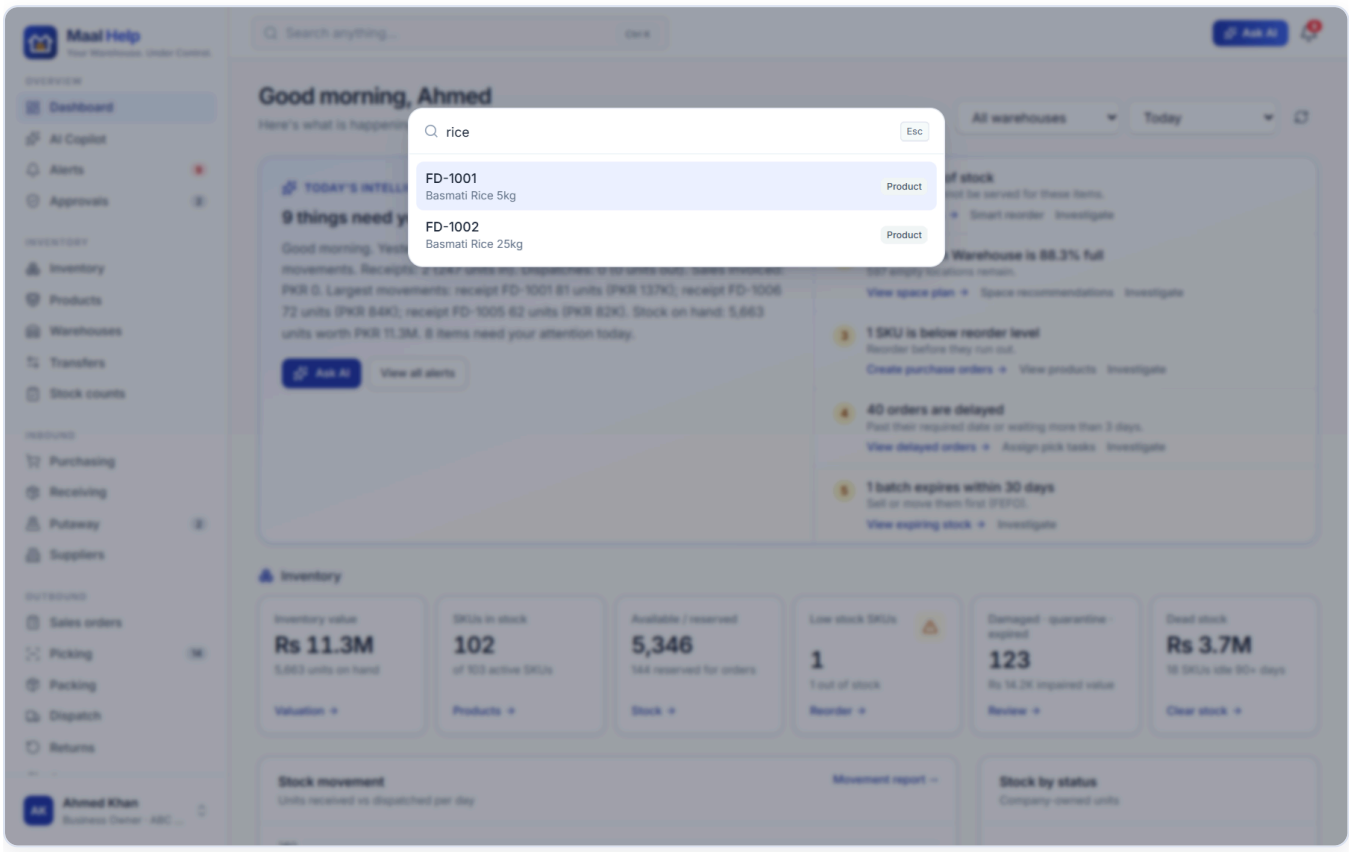

Figure 2. Press Ctrl + K anywhere to search products, orders, customers, locations and screens.

1. Use the **sidebar** to move between screens. Your name and role are at the bottom.
2. Use **Search anything...** at the top, or press **Ctrl + K**, then type a SKU, barcode, order number or name.
3. The **bell** opens your notifications. **Ask AI** opens the Copilot (if your role has it).
4. Tables support search, filters, sorting and paging. Click a row to open the record.

> If a screen or button you expect is missing, your role does not include that permission. Ask your administrator. The server enforces permissions, so hiding a menu is never the only control.

3 Your home screen

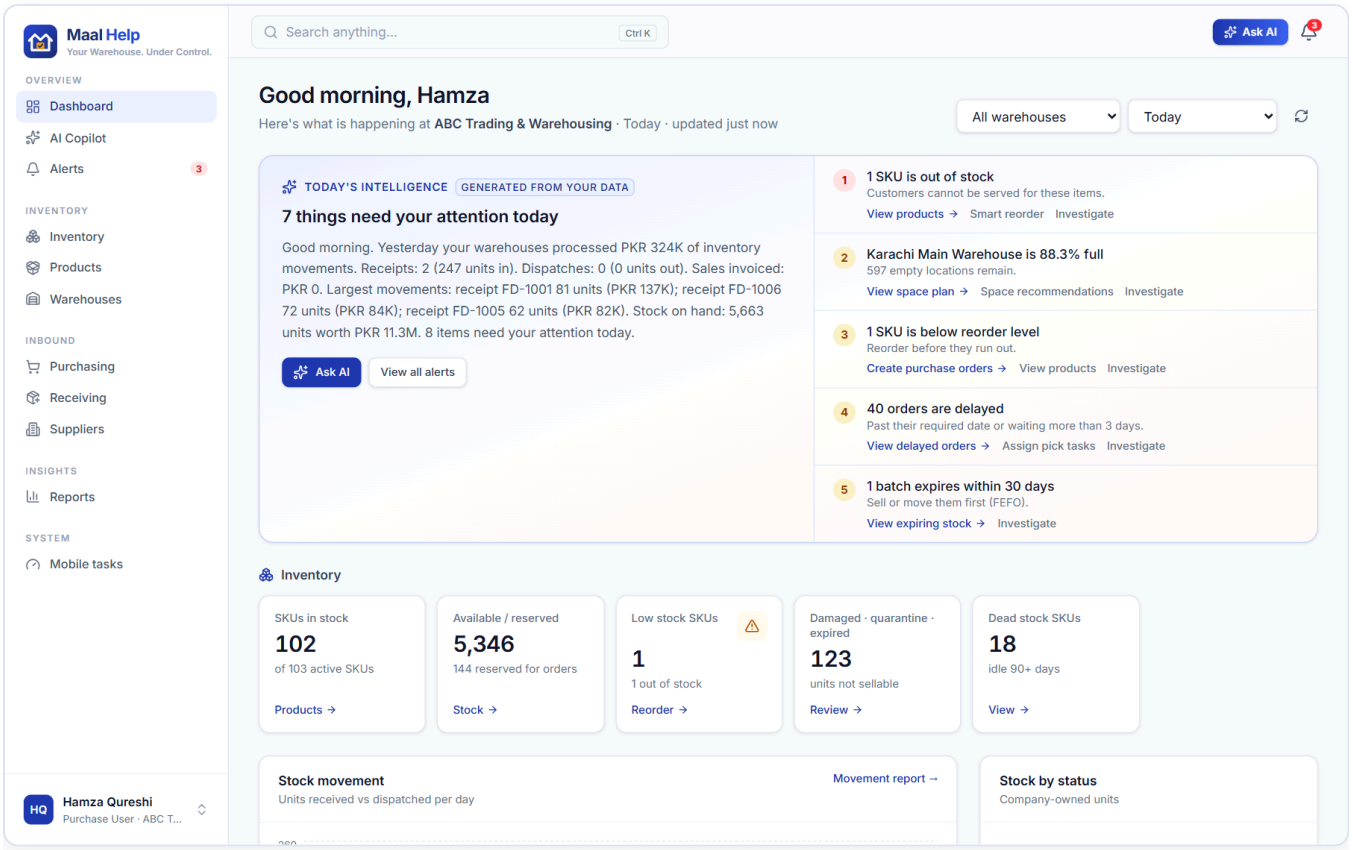

Figure 3. Purchase User dashboard.

- Shows low stock, late supplier deliveries and open purchase orders.

4 Features step by step

Purchase orders

Draft → Submitted → Approved → Partially/Fully received → Closed. Large orders route to the owner for approval.

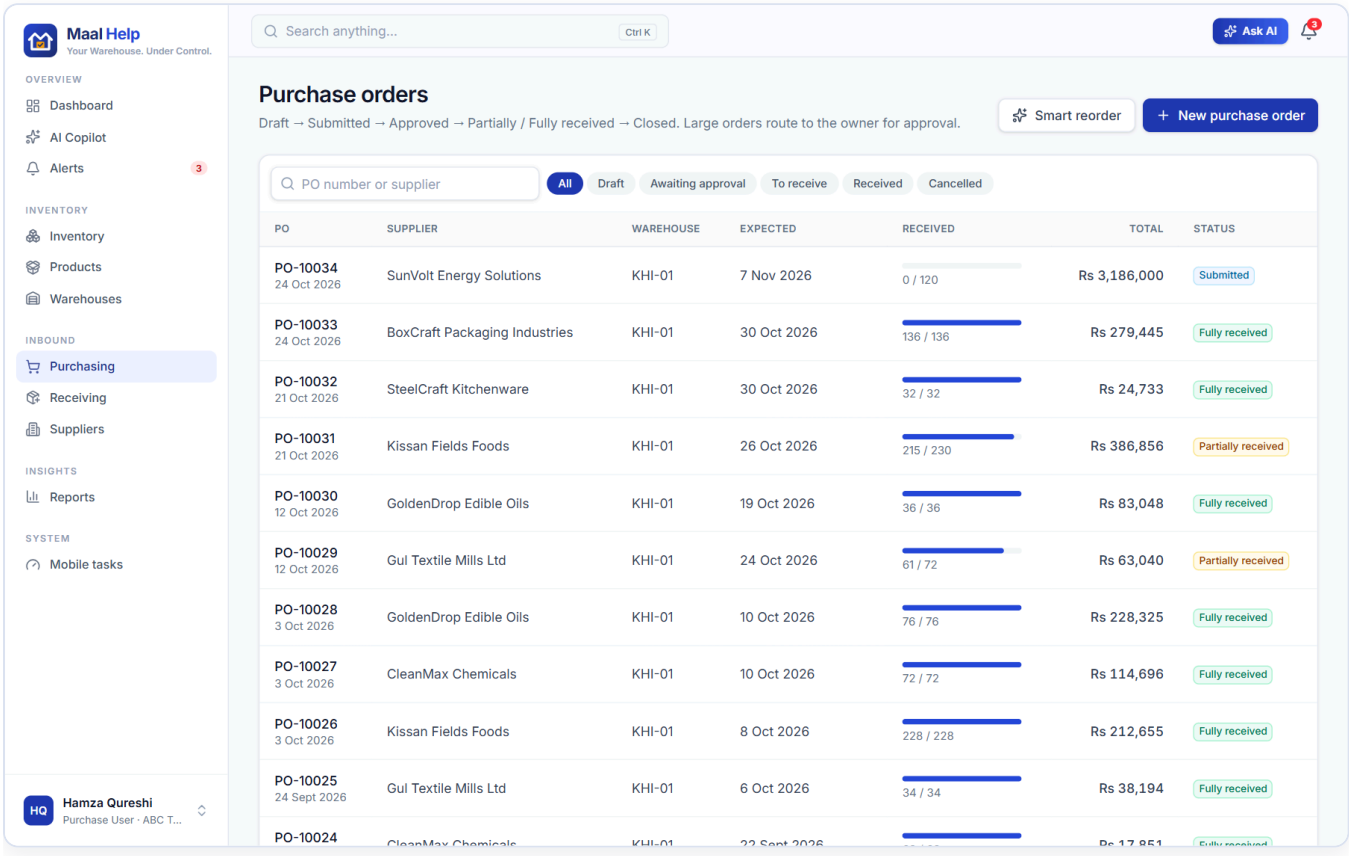

Figure 4. Purchase orders by status.

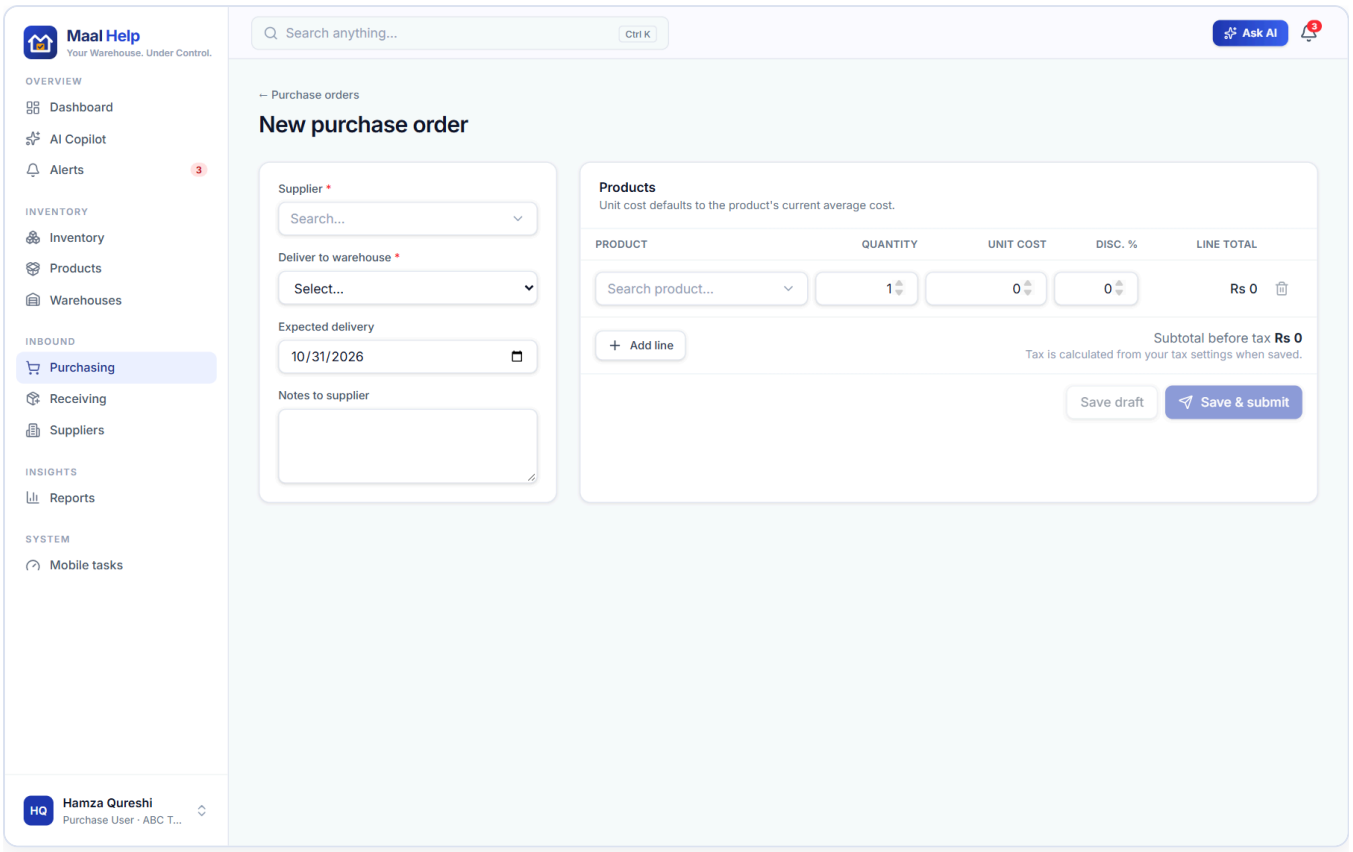

Figure 5. Creating a purchase order.

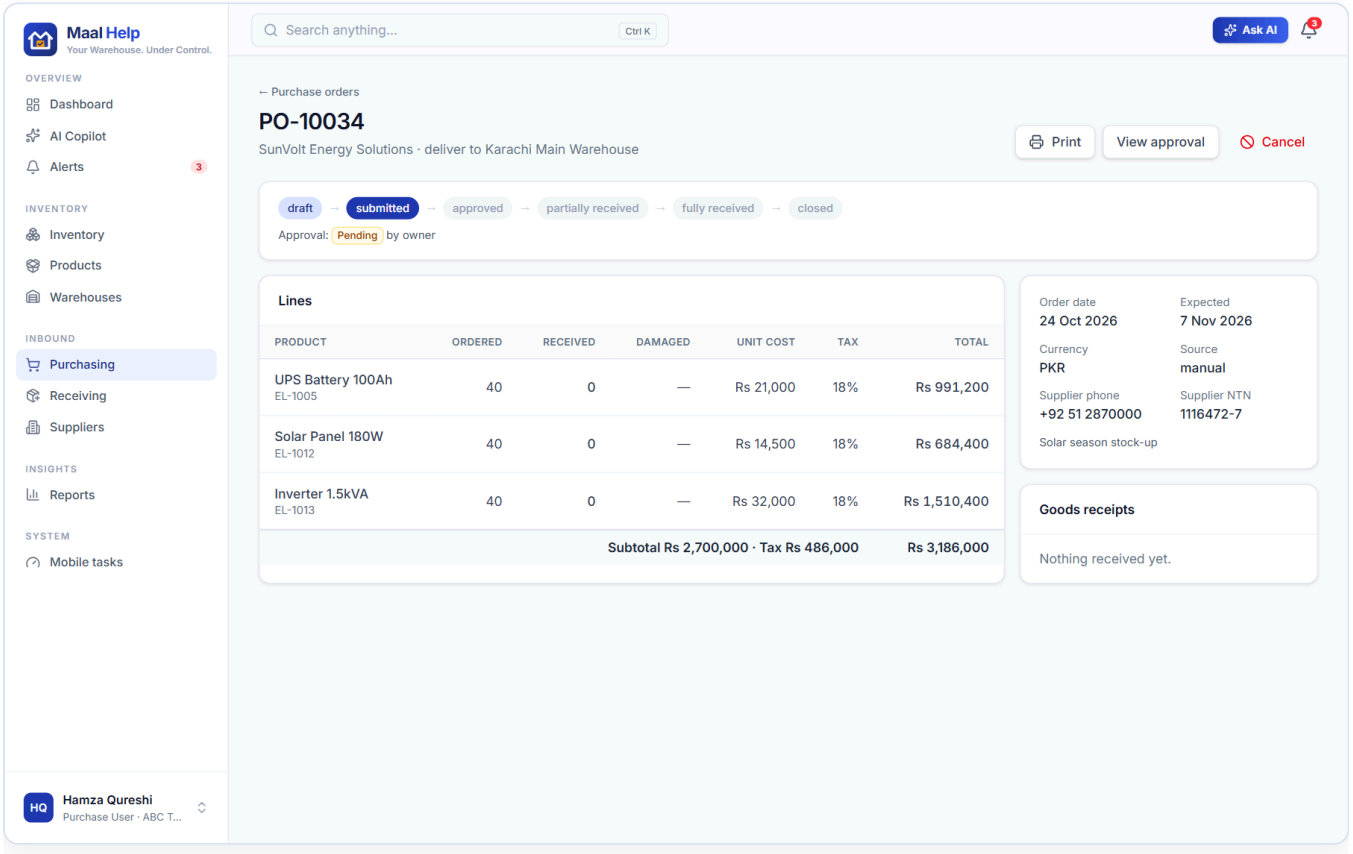

Figure 6. A purchase order with lines, receipts and status.

1. **Purchasing → New purchase order**: choose the supplier and delivery warehouse, and an expected delivery date.
2. Add lines (search product). Unit cost defaults to the current average cost.
3. **Save draft** or **Save & submit**. Orders above the threshold wait for approval.
4. Once approved, the order appears for receiving. Track received quantities on the order.
5. **Smart reorder** suggests what to buy from demand, lead time and stock on order. You review and create drafts.

Suppliers

Vendors with open purchase orders, payables and delivery performance.

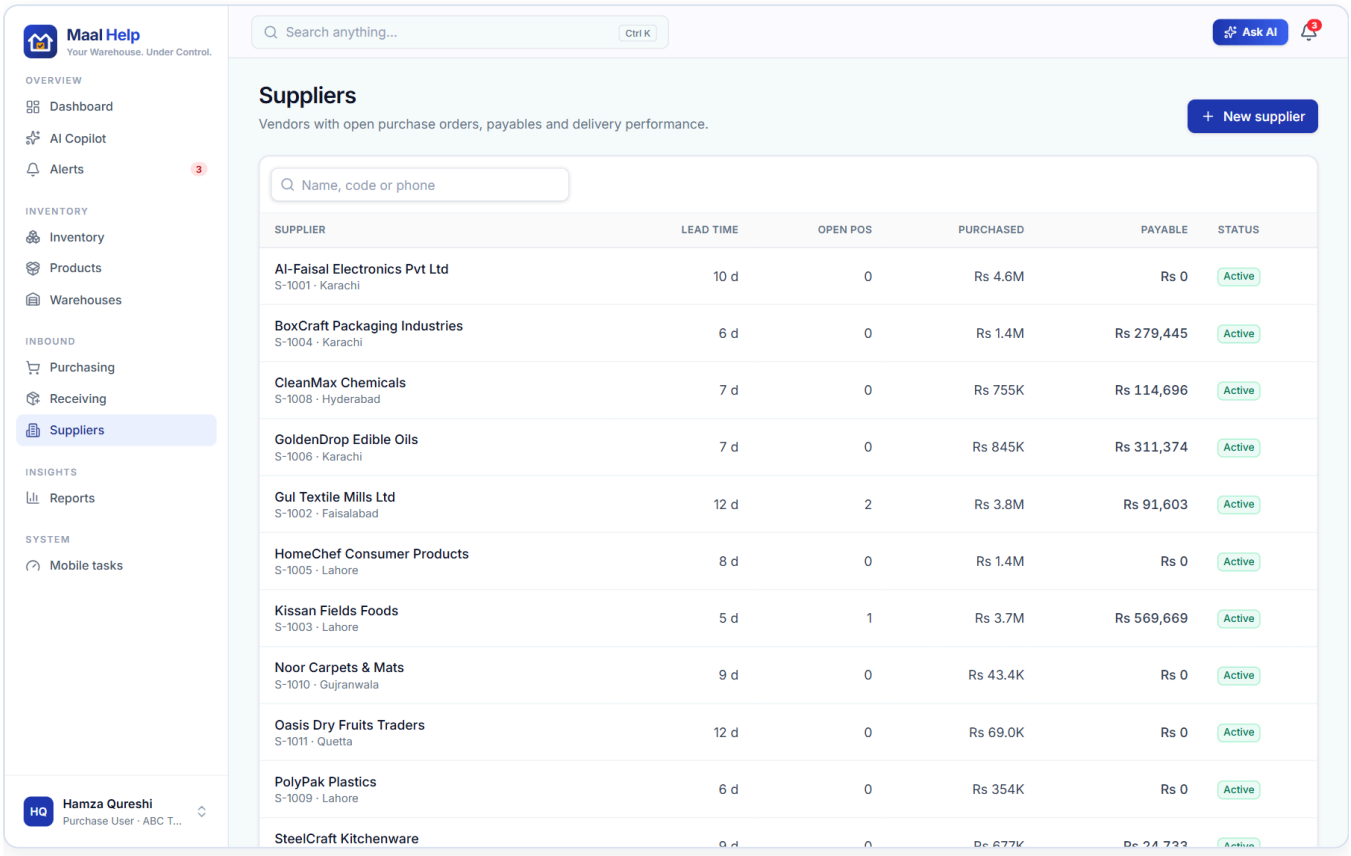

Figure 7. Suppliers with lead time, open POs, purchases and payable.

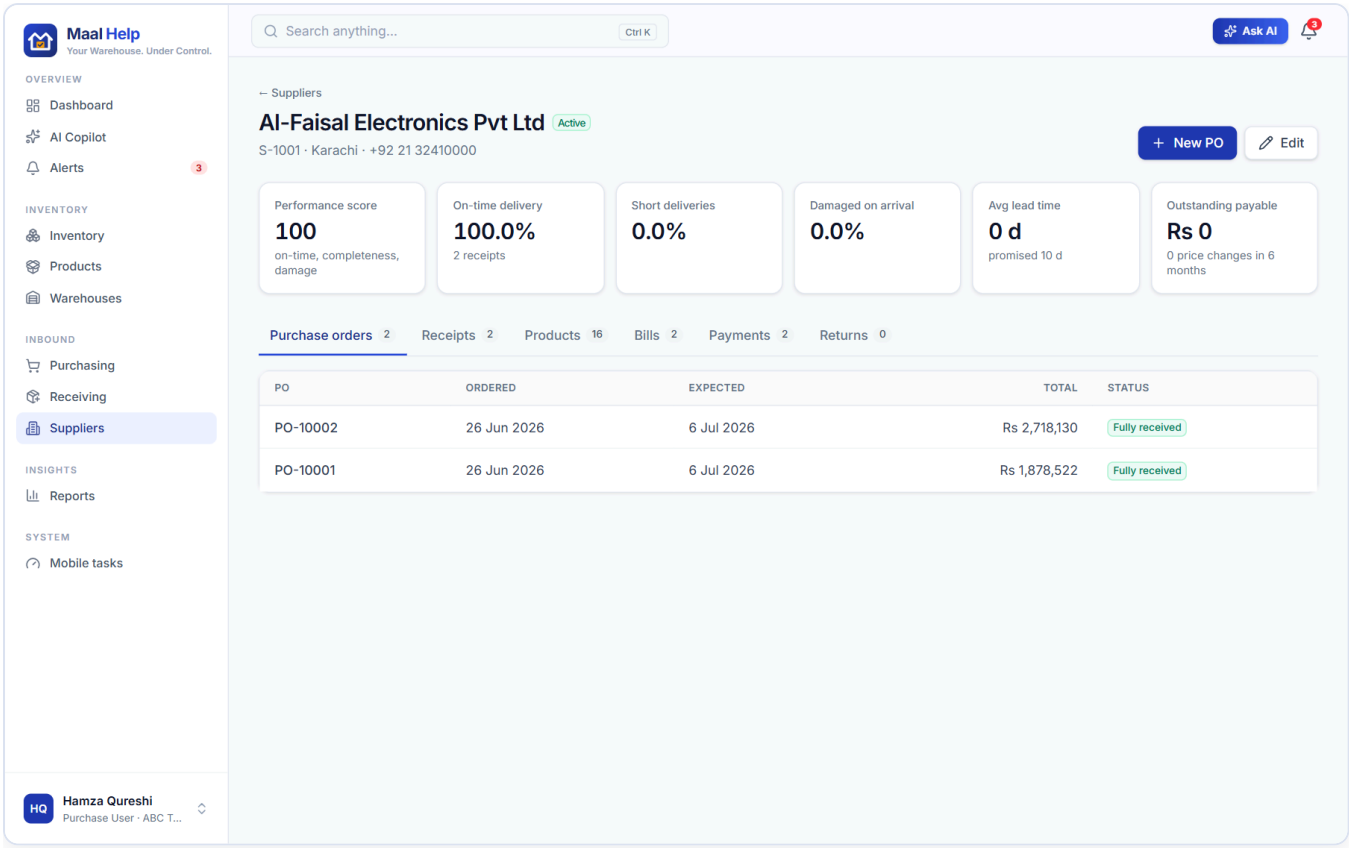

Figure 8. Supplier 360°: orders, receipts, bills and on-time performance.

1. **Suppliers → New supplier**: name, contact, phone, city, NTN/STRN, payment terms and lead time.
2. Open a supplier to see its history and performance before placing orders.

Receiving goods (GRN)

1. Choose the delivery · 2. Scan each product · 3. Check quantities, batch and expiry · 4. Confirm.

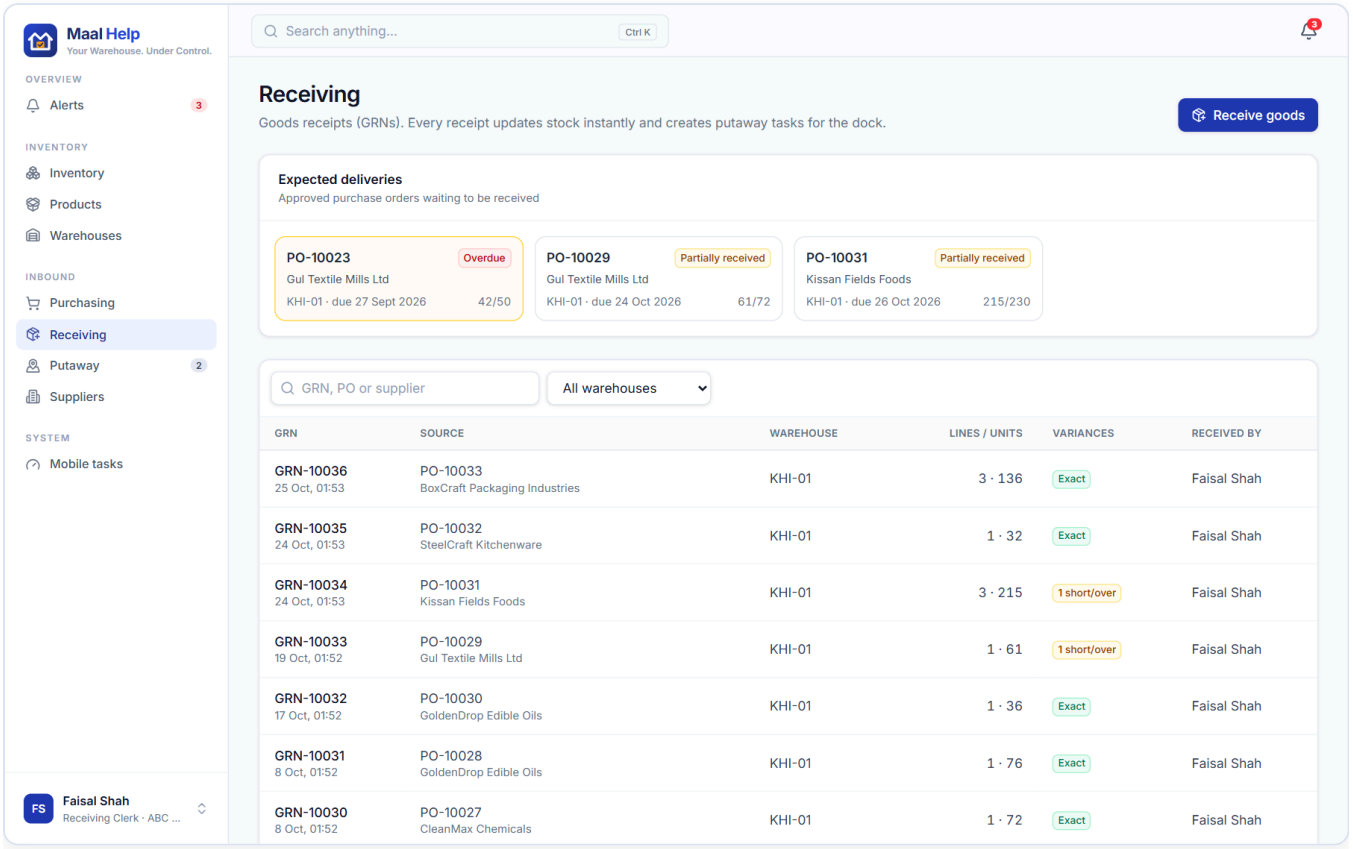

Figure 9. Goods receipts (GRNs).

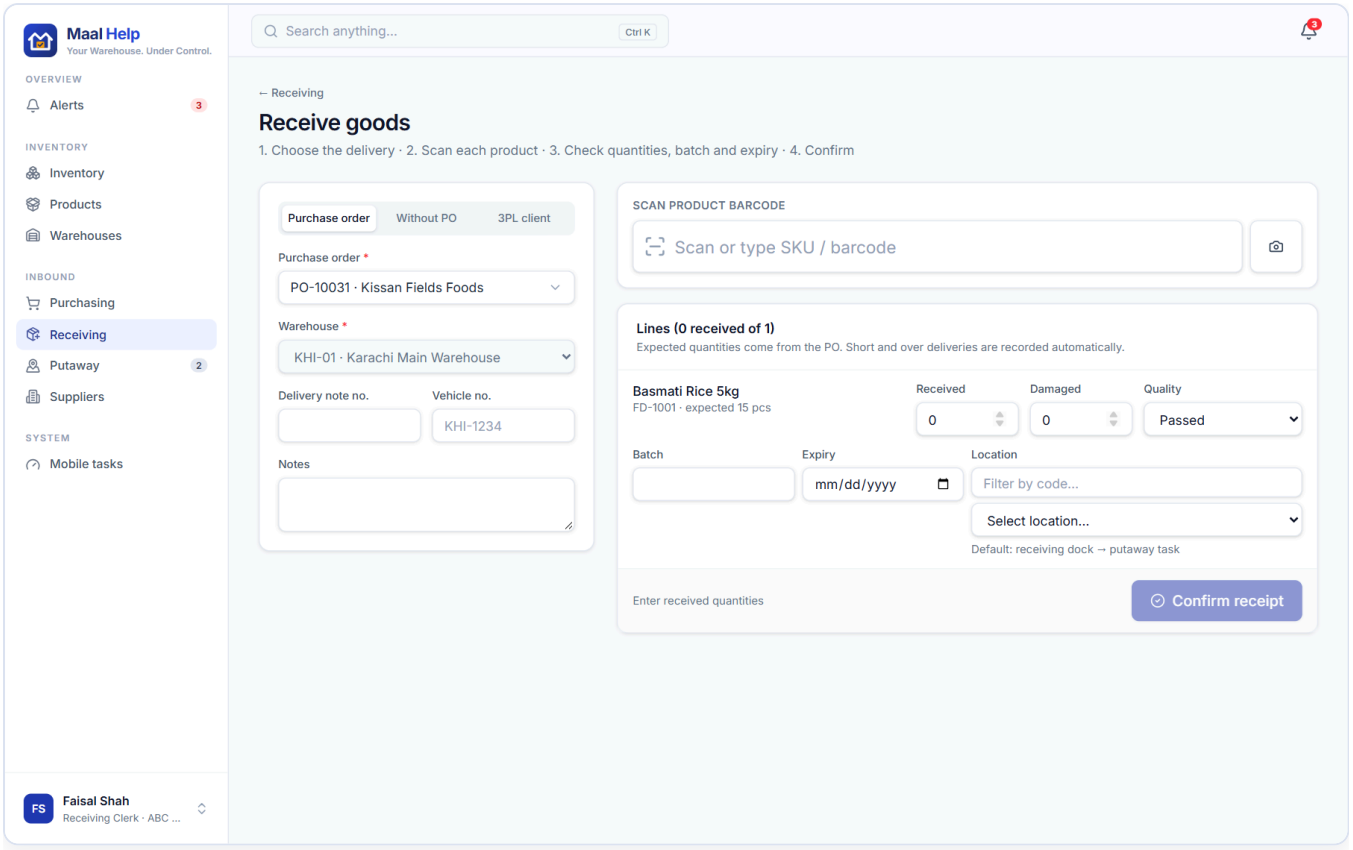

Figure 10. Receiving against a purchase order: expected quantity, damaged, quality, batch, expiry and location.

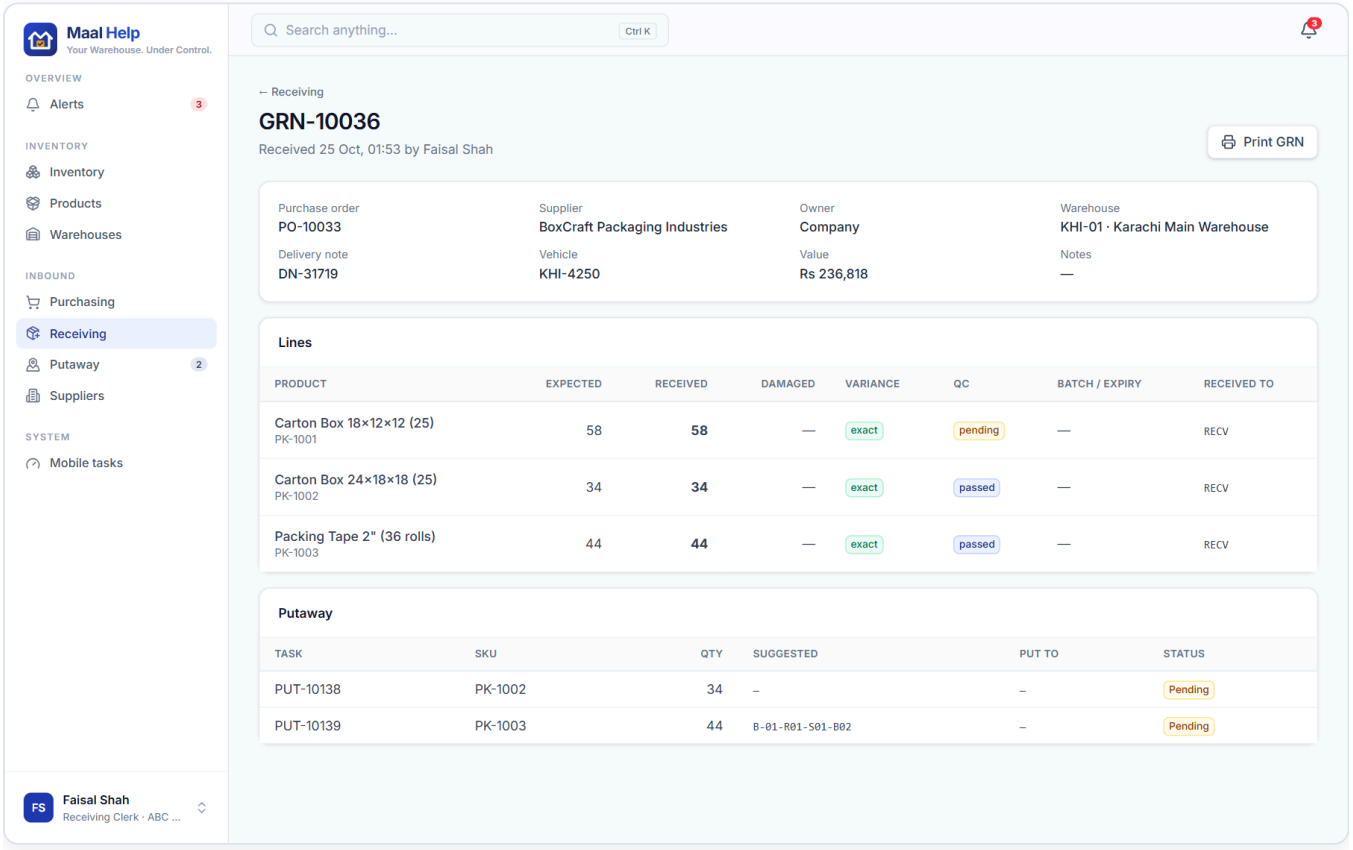

Figure 11. A posted goods receipt.

1. **Receiving → Receive goods**. Choose **Purchase order**, **Without PO** or **3PL client** (goods owned by a storage client).
2. Select the PO and warehouse; enter the delivery note and vehicle number.
3. Scan each product barcode (or type the SKU). Enter **Received** and **Damaged** quantities and set **Quality** (Passed / Hold (QC) / Failed → quarantine).
4. For batch or expiry items enter the batch and expiry date. For serial items scan every serial.
5. Leave the location empty to receive to the dock (a putaway task is created) or pick a bin.
6. Select **Confirm receipt**. Short and over deliveries are recorded automatically; more than 10% over the PO needs explicit confirmation.

> A supplier bill is created from the receipt for the accounts team.

> Damaged and quarantined units are kept separate and are never sold.

AI Copilot

Ask questions in plain English. The Copilot looks up facts with read-only tools limited to what your role may see, and shows its sources. It can recommend; you decide.

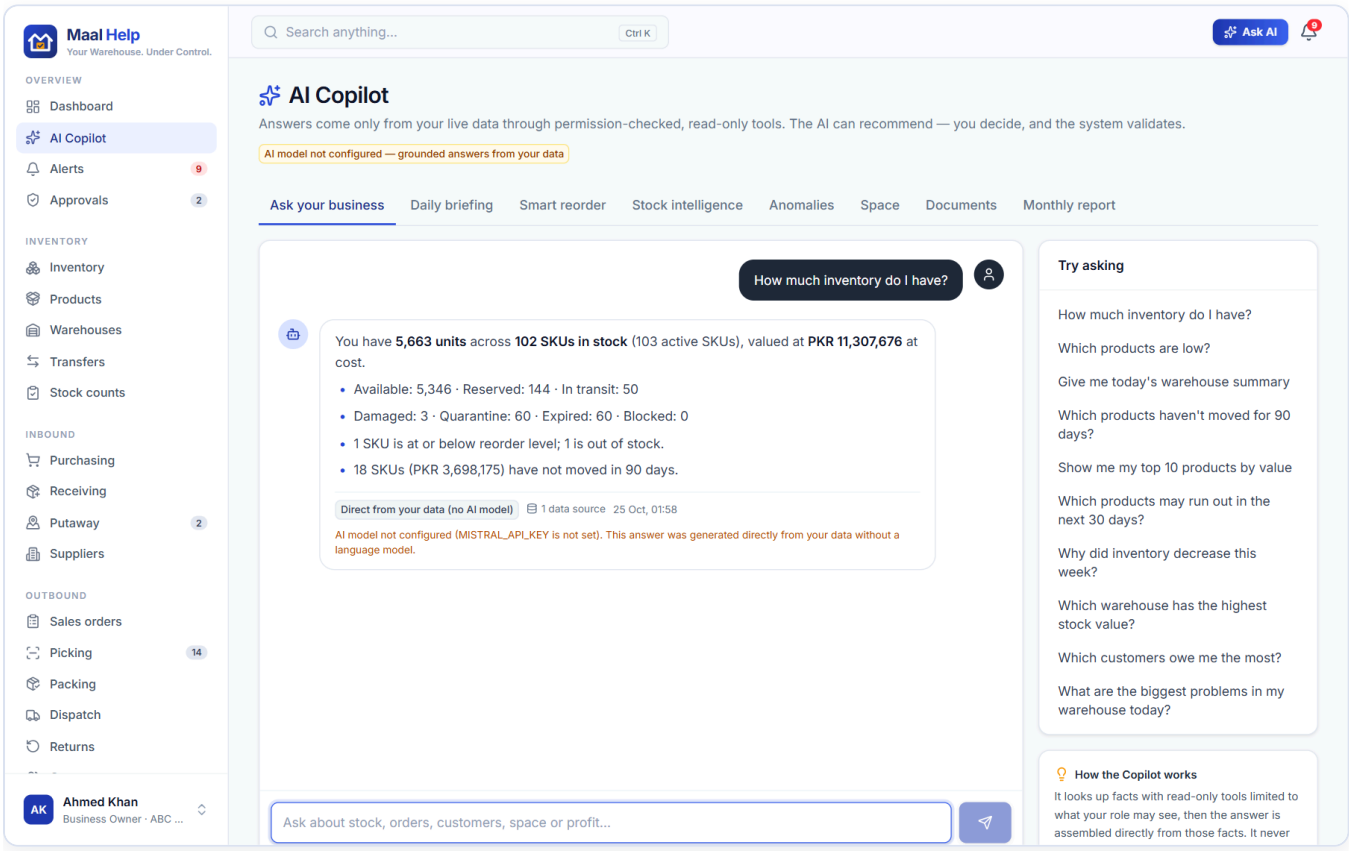

Figure 12. An answer built from live data, with its data source and mode shown.

1. Open **AI Copilot** (or select **Ask AI**).

2. Type a question, for example *How much inventory do I have?*, *Which products are low?* or *Which customers owe me the most?*, or tap a suggestion.
3. Check the badge under the answer: **Mistral AI · from your data** or **Direct from your data (no AI model)**. Open *data sources* to see what was used.
4. Other tabs: **Daily briefing**, **Smart reorder**, **Stock intelligence**, **Anomalies**, **Space**, **Documents**, **Monthly report**.

> The AI never changes stock, approves anything or posts financial entries. Suggested purchase orders open as drafts that a person must review and save.

> If your company has not configured the AI model, answers are assembled directly from your data and are clearly labelled.

> Anomalies are flags for review, never accusations. Write your findings when you mark one reviewed.

Reports and exports

35 reports in five groups: Inventory, Warehouse, Sales, Purchasing and Financial. Every report supports filters, search, sorting, paging, Excel/CSV/PDF export and printing.

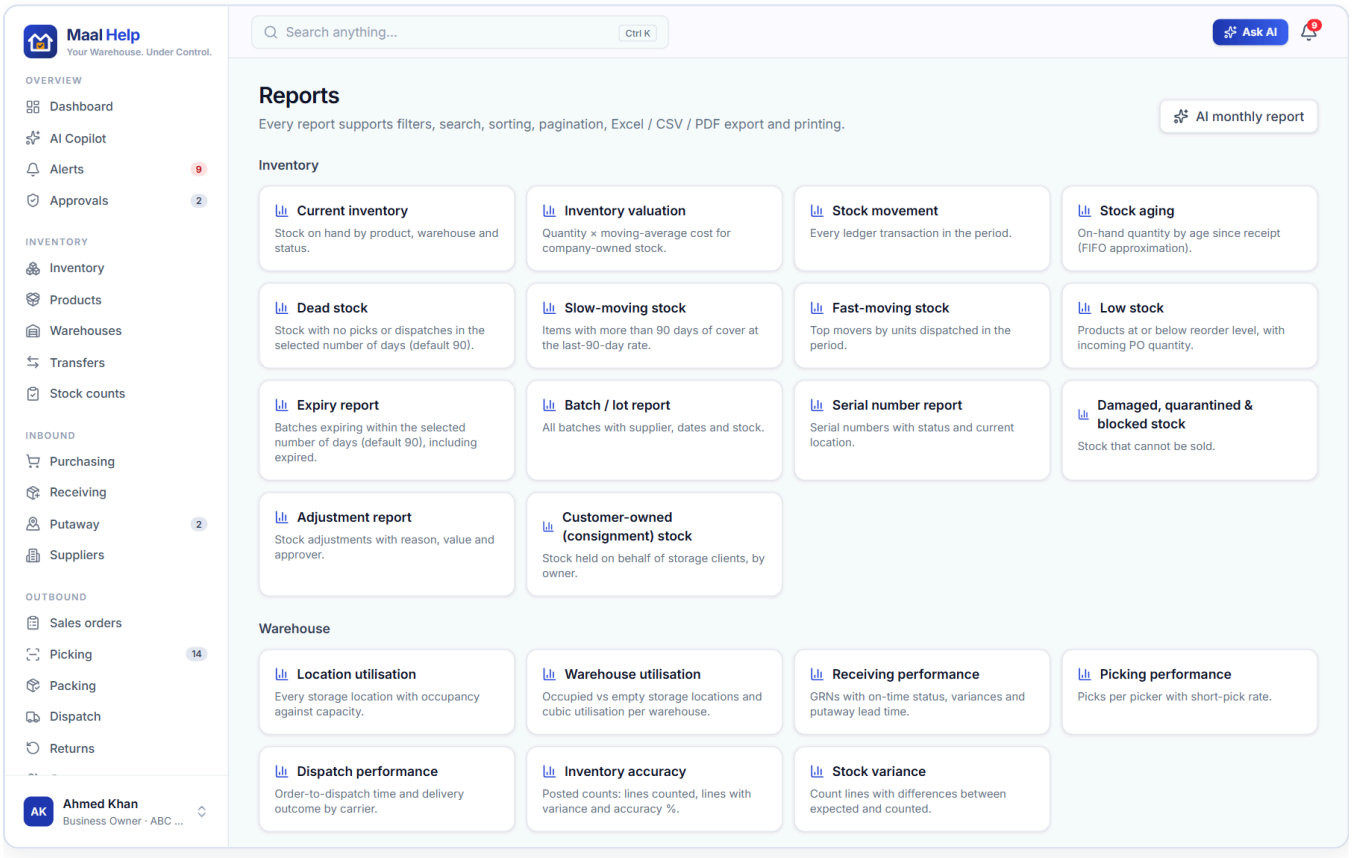

Figure 13. The report library.

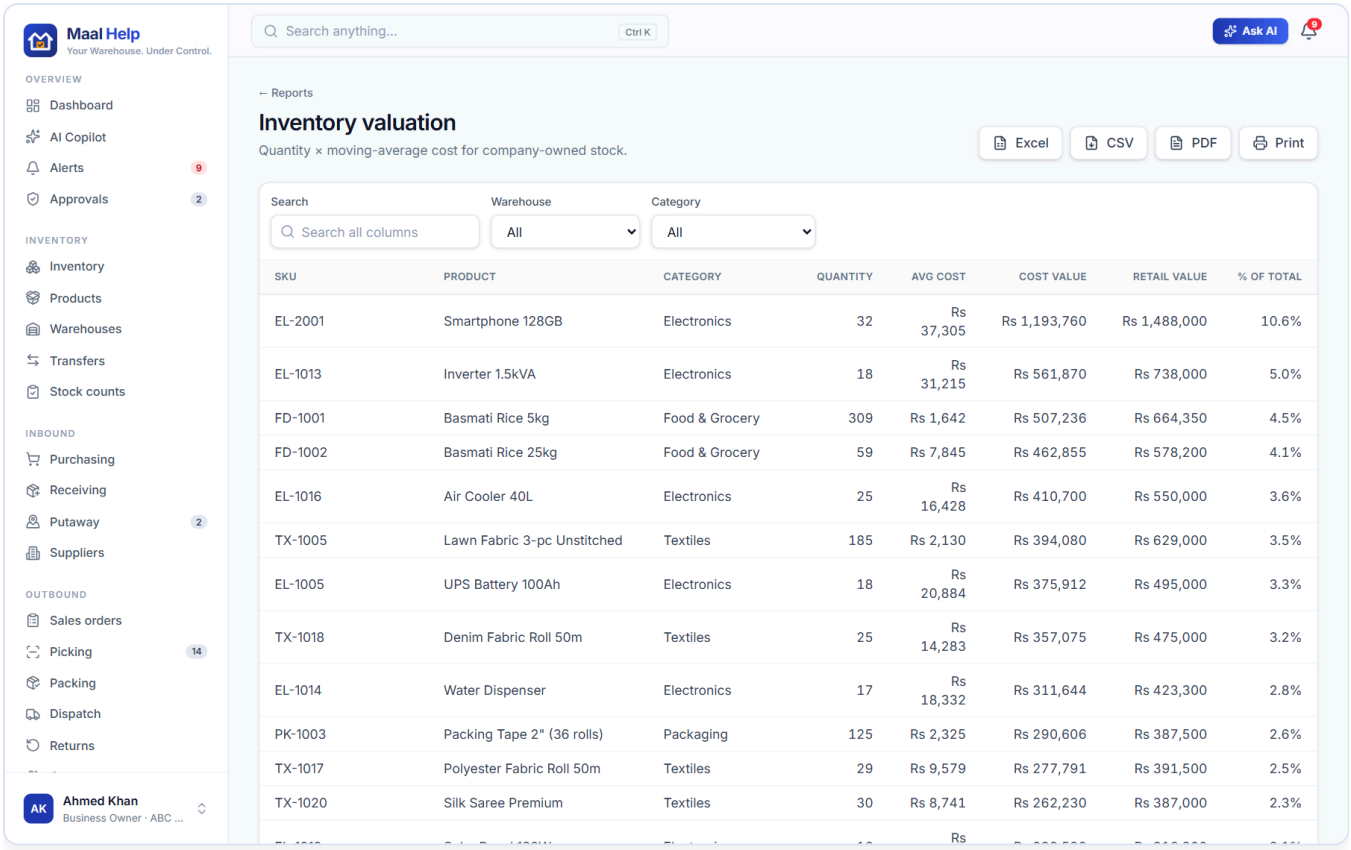

Figure 14. Inventory valuation with filters and export.

1. Open **Reports** and choose a report. You see only reports your role may view.
2. Set filters (dates, warehouse, product, customer…) and search or sort the table.
3. Export with **Excel**, **CSV** or **PDF**, or print. PDFs carry the Maal Help letterhead.
4. **AI monthly report** gives a written business summary for a month.

5 End-to-end workflows

Weekly replenishment

1. Open **Purchasing** → **Smart reorder** (or Copilot → Smart reorder).
2. Review each suggestion (Order now / Increase order / Wait / Reduce / Stop).
3. Create draft POs, adjust quantities, **Save & submit**.
4. Follow up late deliveries with suppliers.

6 Reports, notifications and exceptions

Reports and exports

Purchases by supplier, Purchase trends, Supplier performance, Low stock.

Open **Reports**, choose a report, set filters and export to Excel, CSV or PDF, or print. You see only the reports your role may view.

Notifications and alerts

Late supplier deliveries and low stock.

The bell at the top right lists new notifications. In-app alerts are always on; email and WhatsApp alerts depend on your company's settings.

When something is refused

Message	Meaning	What to do
Insufficient stock	Not enough *available* units at that place	Check reserved, quarantine or dock stock; choose another location or wait
Wrong location / wrong product	The scan does not match the task	Go to the right place or item and scan again
Quantity exceeds the task	More than required	Enter the task quantity
Pending approval	Above the company threshold	An approver must approve; nothing is posted yet
You don't have permission	Your role lacks the action	Ask your administrator
Credit limit exceeded	Customer balance too high	Collect payment or ask the owner

7 FAQ and troubleshooting

Frequently asked questions

My PO is Awaiting approval

Its value is above the purchase threshold. The approver (usually the owner) must approve it.

Why can’t I see a menu or button?

Your role does not include that permission. Ask your administrator. Permissions are checked by the server.

Can I edit or delete a posted stock movement?

No. History is permanent. Corrections are new transactions (an adjustment or reversal) with a reason, so the audit trail stays complete.

Why does the screen say stock is not available?

It may be reserved for another order, in quarantine, damaged, expired, in transit or still at the receiving dock waiting for putaway.

Is my data visible to other companies?

No. Every company’s data is isolated, and requests for another company’s records are refused.

Troubleshooting

Problem	Solution
Supplier not in the list	Create it in **Suppliers** → **New supplier** first.
“Missing anti-forgery header” or 403 when saving	Refresh the page. If it persists, you may lack permission for the action.
Account locked	Too many wrong passwords. Wait a few minutes or ask your administrator to reset your password.

> Still stuck? Note the screen, the record number (for example SO-10245) and the exact message, and contact your company administrator.

8 Glossary and quick reference

Quick reference

I want to...	Go to
New PO	**Purchasing → New purchase order**
What to buy	**Purchasing → Smart reorder**
Supplier performance	**Suppliers → (supplier)**
Search anything	**Ctrl + K**

Glossary

Term	Meaning
SKU	Stock-keeping unit: one product code.
GRN	Goods received note: the record of a delivery received.
PO	Purchase order to a supplier.
SO	Sales order from a customer.
Putaway	Moving received goods from the dock into a storage location.
FEFO	First-expiry-first-out: older-expiry batches are reserved and picked first.
Reserved	Units promised to a confirmed order; not available for other orders.
Quarantine	Units held for inspection; not sellable.
In transit	Units dispatched on a transfer but not yet received.
Ledger	The permanent, append-only list of every stock movement.
Wave	A group of pick tasks picked together (batch or zone).
Back-order	The part of an order that could not be reserved yet.
3PL / storage client	A business whose goods you store and bill for storage and handling.
NTN / STRN	Pakistan national tax number / sales tax registration number.
Blind count	A count where the counter does not see the expected quantity.
