1 Introduction

Who this manual is for

This manual is for people with the **Receiving Clerk** role in Maal Help. Runs the inbound dock: receives goods against purchase orders, records batches, expiry and damage, and puts goods away.

Maal Help is a warehouse operating system: stock by warehouse, location, batch and owner on a permanent ledger, plus purchasing, sales and fulfilment, billing, reports and an AI Copilot that answers from your own data.

Your role can

- ✓ Receive goods (with or without PO, or for 3PL clients)
- ✓ Record batch, expiry, serials, damage and quality hold
- ✓ Complete putaway tasks
- ✓ View purchase orders, products and locations

Your role cannot

- ✗ Create or approve purchase orders
- ✗ Adjust stock
- ✗ See invoices or supplier bills

Screens show the fictional demo company **ABC Trading & Warehousing**. Your company's names and numbers will differ. Menus show only what your role is allowed to use.

2 Access and navigation

Signing in

Maal Help runs in any modern browser on a computer, tablet or Android phone. Your company administrator creates your account and gives you a temporary password.

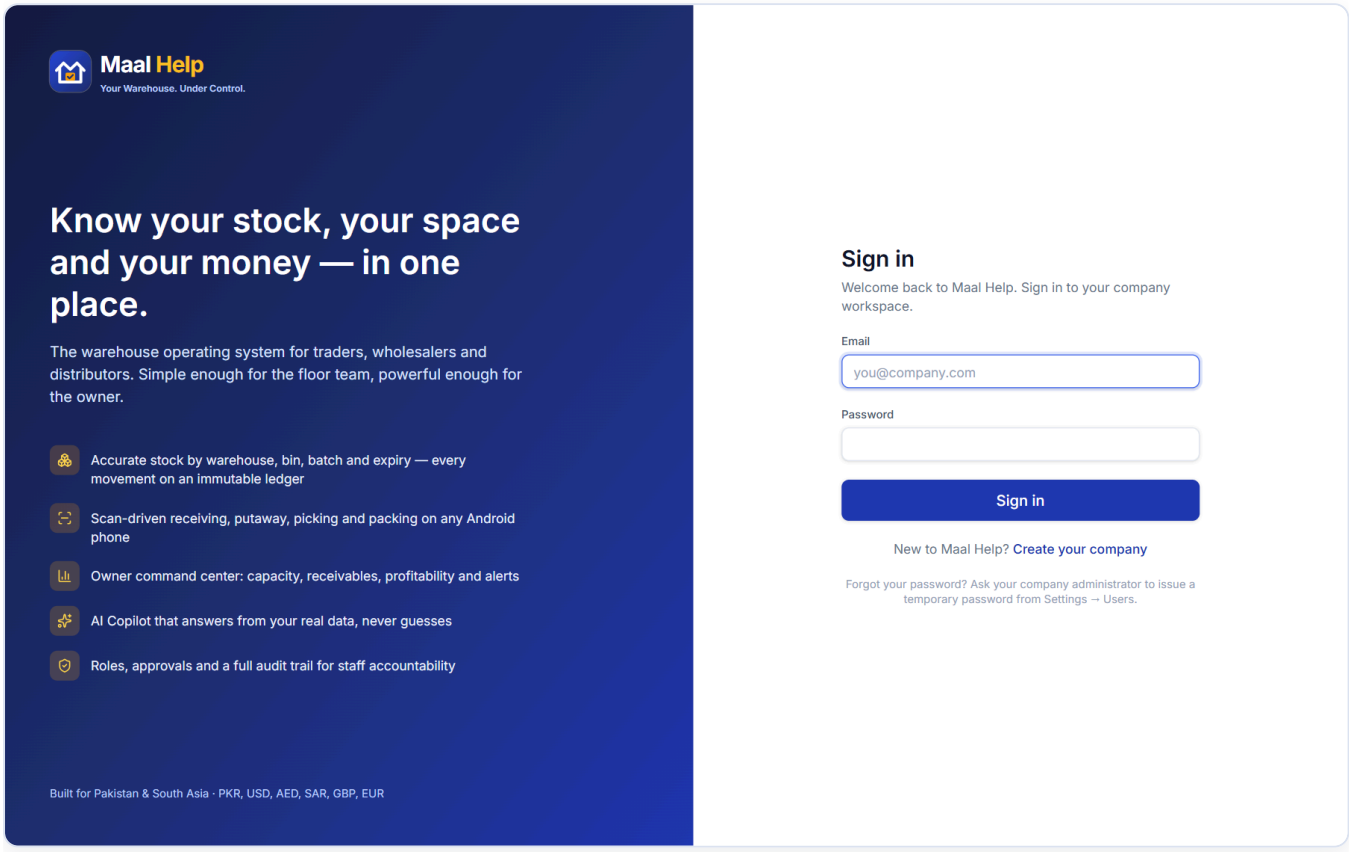

Figure 1. The Maal Help sign-in page.

1. Open the Maal Help address your company gave you.
2. Enter your work email and password, then select **Sign in**.
3. The first time, change your temporary password: **Settings** → **My profile** → **Change password** (at least 10 characters with letters and numbers).
4. Forgot your password? Ask your company administrator to issue a temporary one (**Settings** → **Users** → **Reset password**).

> After 8 wrong passwords the account is locked for a short time. Wait, then try again.

> Sign out on shared computers. Sessions also expire automatically.

Finding your way around

The left sidebar shows only the screens your role may use. Counts next to a menu item (for example Putaway 2) show open work.

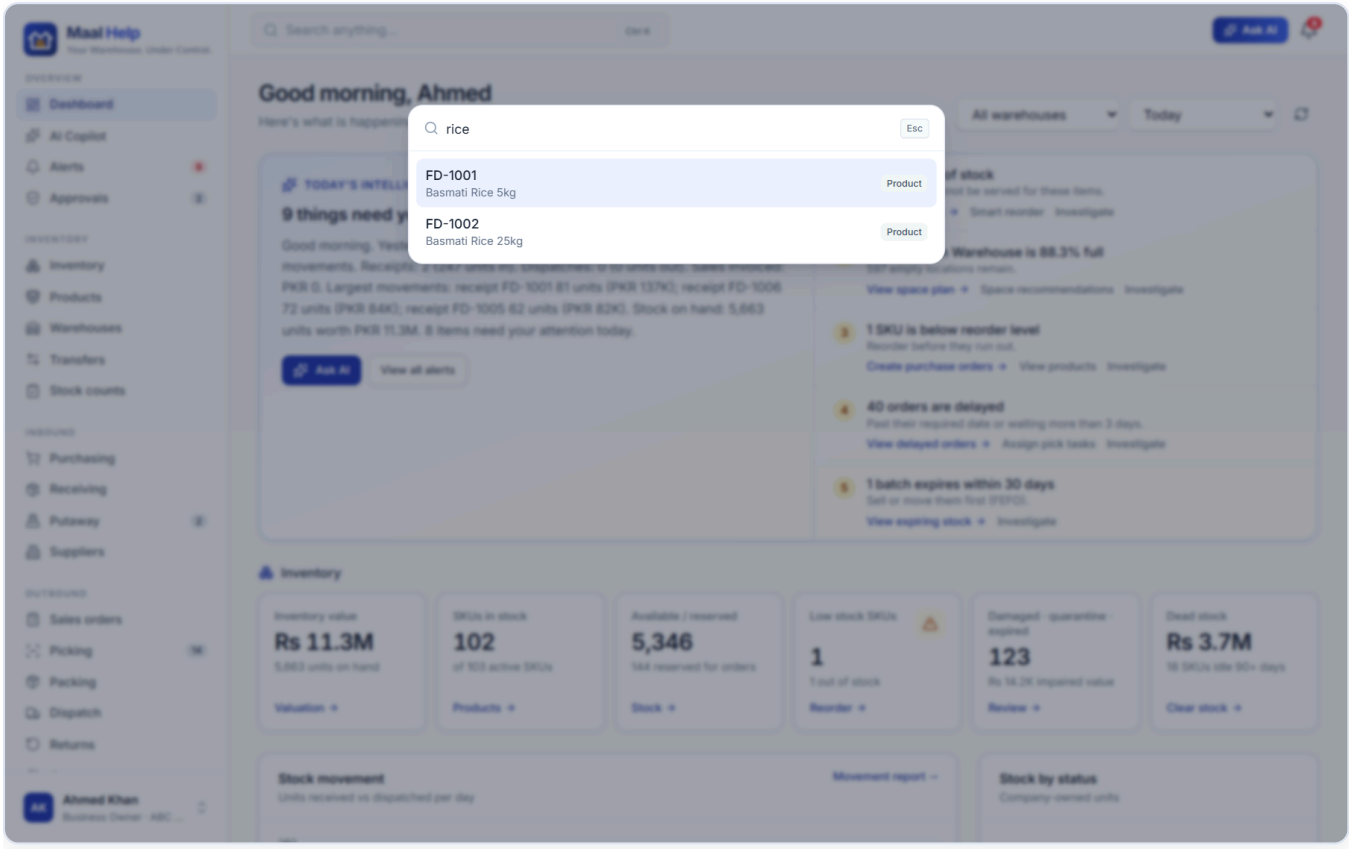

Figure 2. Press Ctrl + K anywhere to search products, orders, customers, locations and screens.

1. Use the **sidebar** to move between screens. Your name and role are at the bottom.
2. Use **Search anything...** at the top, or press **Ctrl + K**, then type a SKU, barcode, order number or name.
3. The **bell** opens your notifications. **Ask AI** opens the Copilot (if your role has it).
4. Tables support search, filters, sorting and paging. Click a row to open the record.

> If a screen or button you expect is missing, your role does not include that permission. Ask your administrator. The server enforces permissions, so hiding a menu is never the only control.

The mobile task app

Floor roles land on a simplified phone app with large buttons. Numbers on the buttons show waiting tasks.

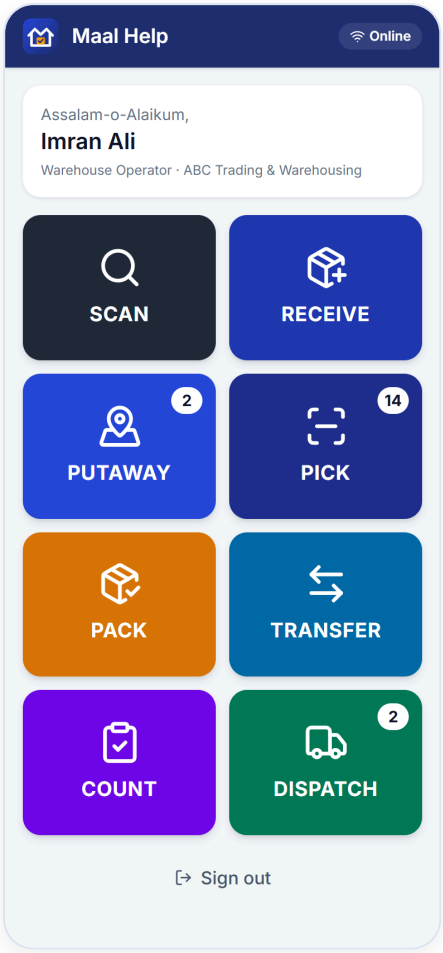

Figure 3. Mobile home for a Warehouse Operator.

1. Open Maal Help on your Android phone and sign in. Floor roles go straight to the task app.
2. Optional: use the browser menu **Add to Home screen** to install Maal Help like an app.
3. Tap a task button (RECEIVE, PUTAWAY, PICK, PACK, TRANSFER, COUNT, DISPATCH, SCAN).
4. Scan with a Bluetooth/USB scanner, or tap the **camera** button to scan with the phone camera, or type the code.

> The badge at the top right shows **Online** or **Offline**. Offline scans are queued and sent automatically when the connection returns (see Offline sync).

3 Your home screen

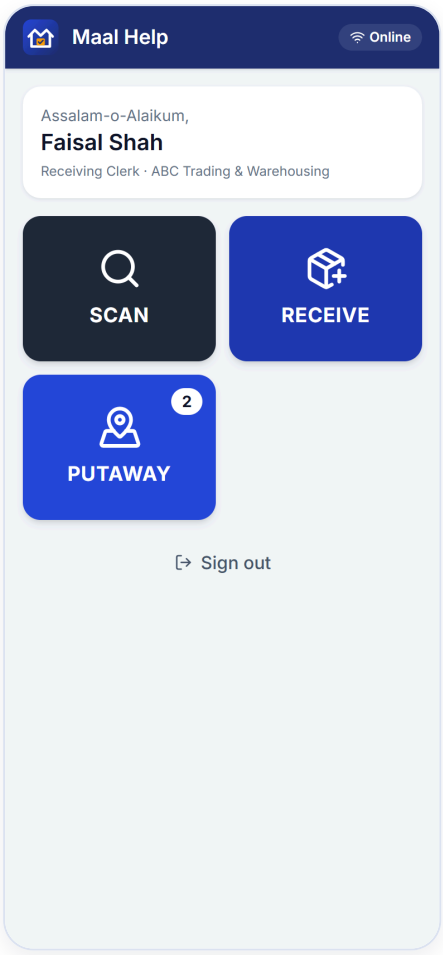

Figure 4. Receiving Clerk mobile home.

- On a computer you land on **Receiving**; on the phone, on the task app with RECEIVE and PUTAWAY.

4 Features step by step

Receiving goods (GRN)

1. Choose the delivery · 2. Scan each product · 3. Check quantities, batch and expiry · 4. Confirm.

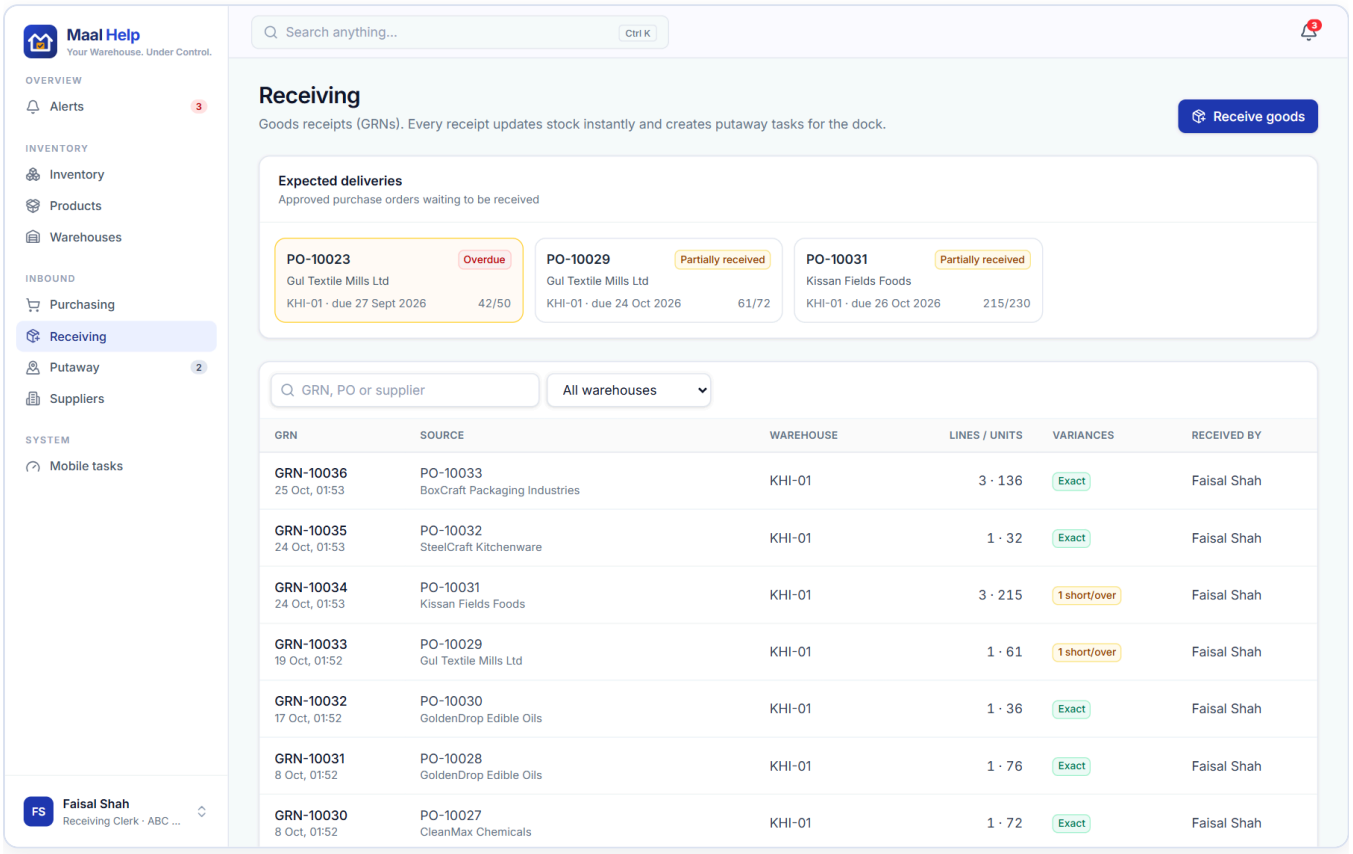

Figure 5. Goods receipts (GRNs).

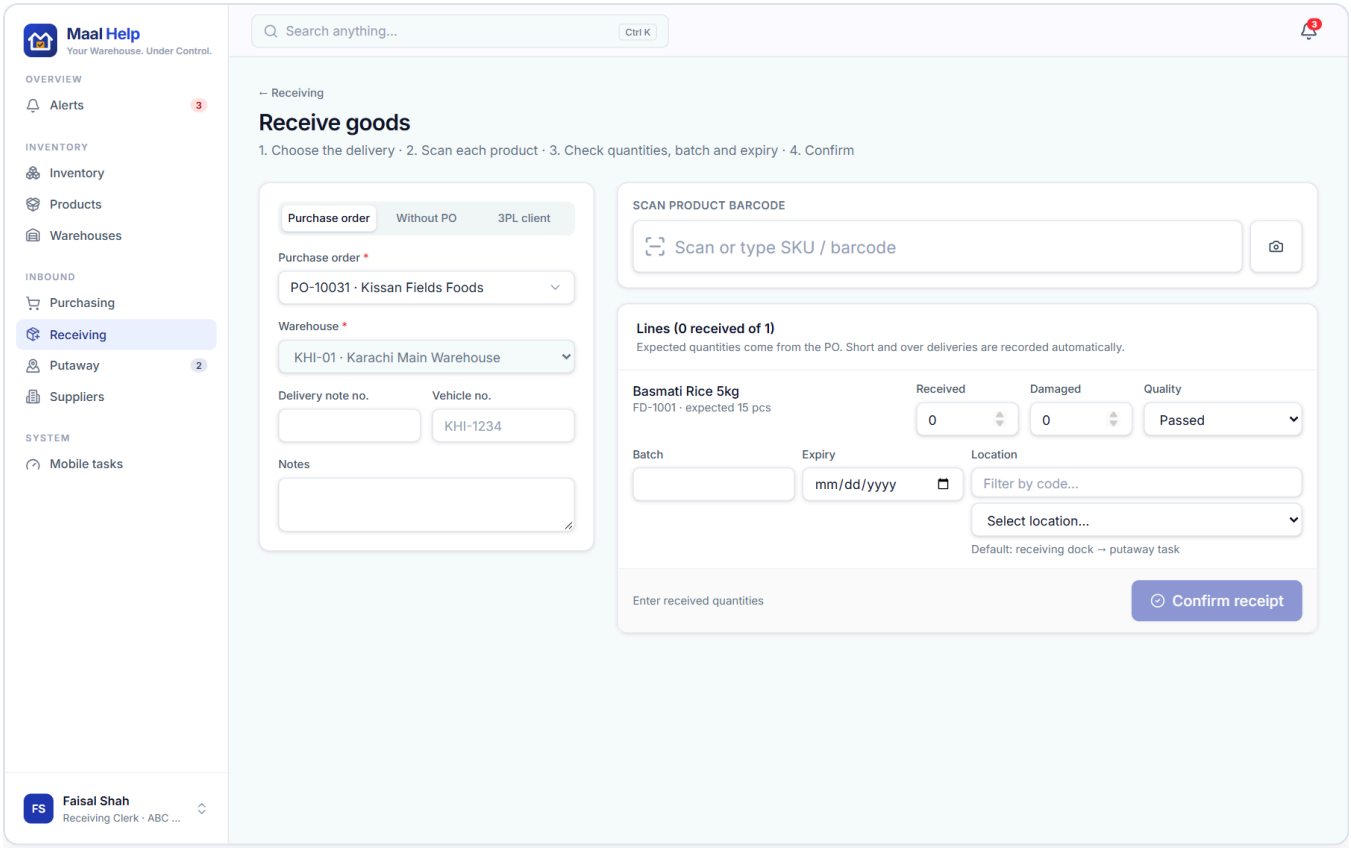

Figure 6. Receiving against a purchase order: expected quantity, damaged, quality, batch, expiry and location.

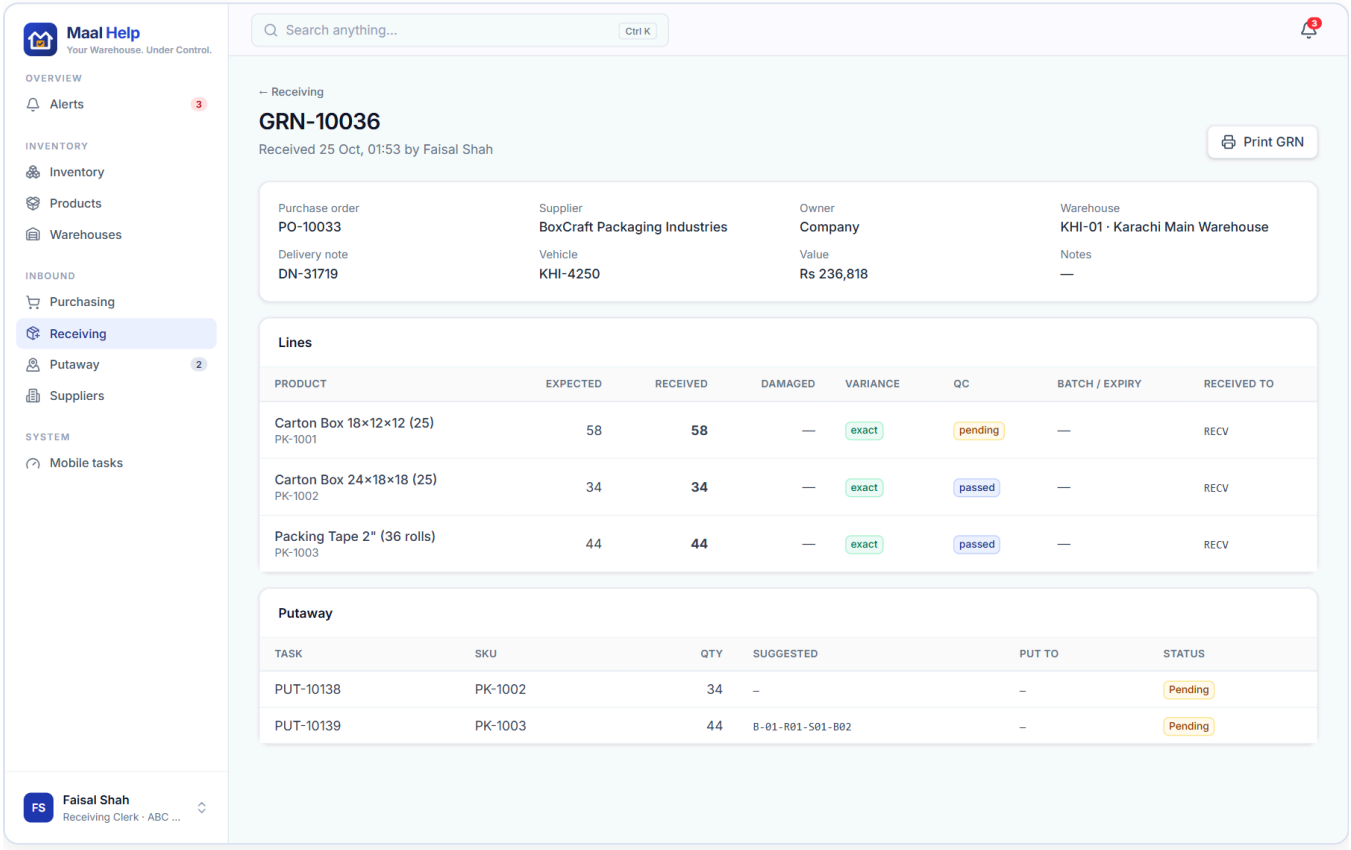

Figure 7. A posted goods receipt.

1. **Receiving → Receive goods**. Choose **Purchase order**, **Without PO** or **3PL client** (goods owned by a storage client).
2. Select the PO and warehouse; enter the delivery note and vehicle number.
3. Scan each product barcode (or type the SKU). Enter **Received** and **Damaged** quantities and set **Quality** (Passed / Hold (QC) / Failed → quarantine).
4. For batch or expiry items enter the batch and expiry date. For serial items scan every serial.
5. Leave the location empty to receive to the dock (a putaway task is created) or pick a bin.
6. Select **Confirm receipt**. Short and over deliveries are recorded automatically; more than 10% over the PO needs explicit confirmation.

> A supplier bill is created from the receipt for the accounts team.

> Damaged and quarantined units are kept separate and are never sold.

Putaway

Move received stock from the dock into storage. Maal Help recommends the best location and explains why.

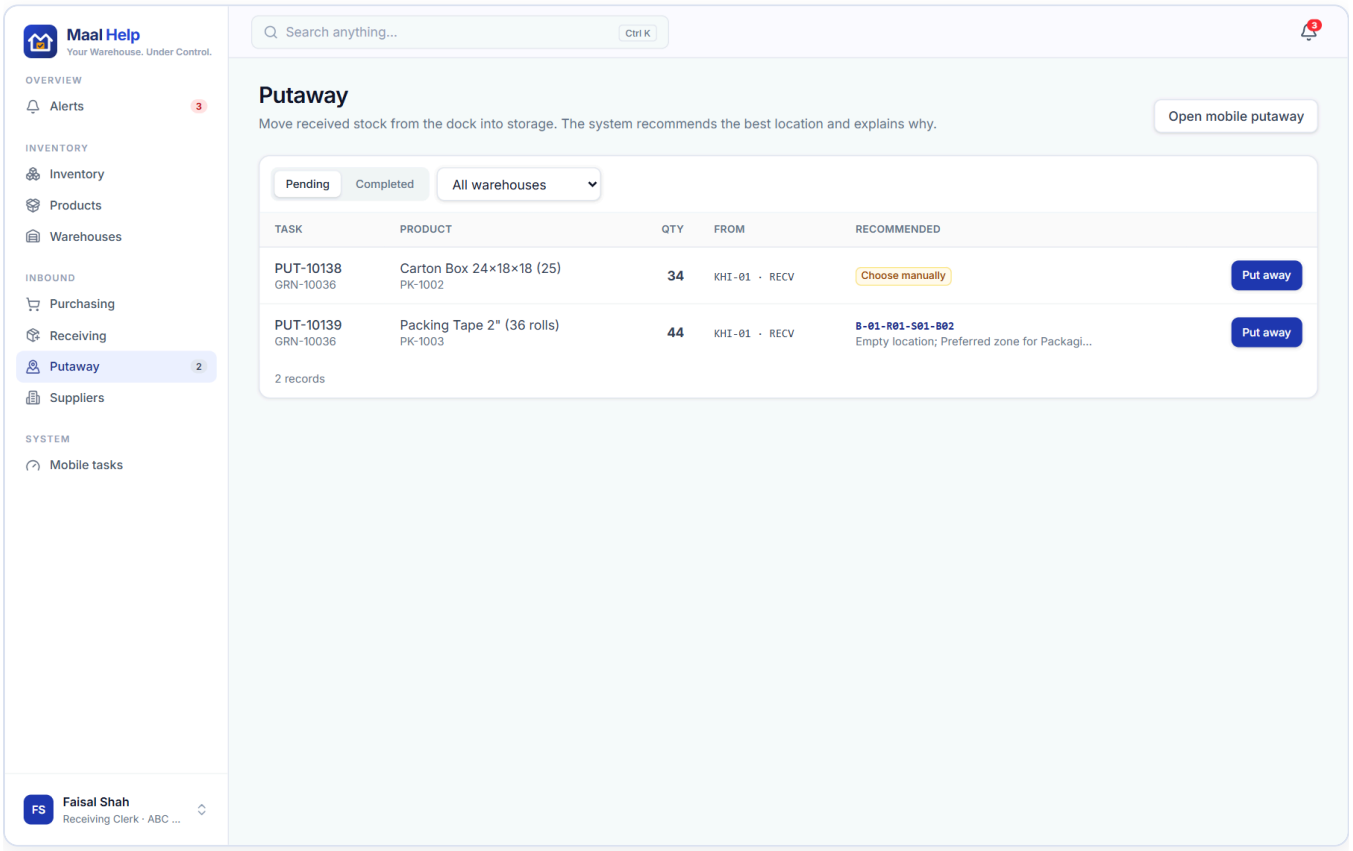

Figure 8. Pending putaway tasks with the recommended location.

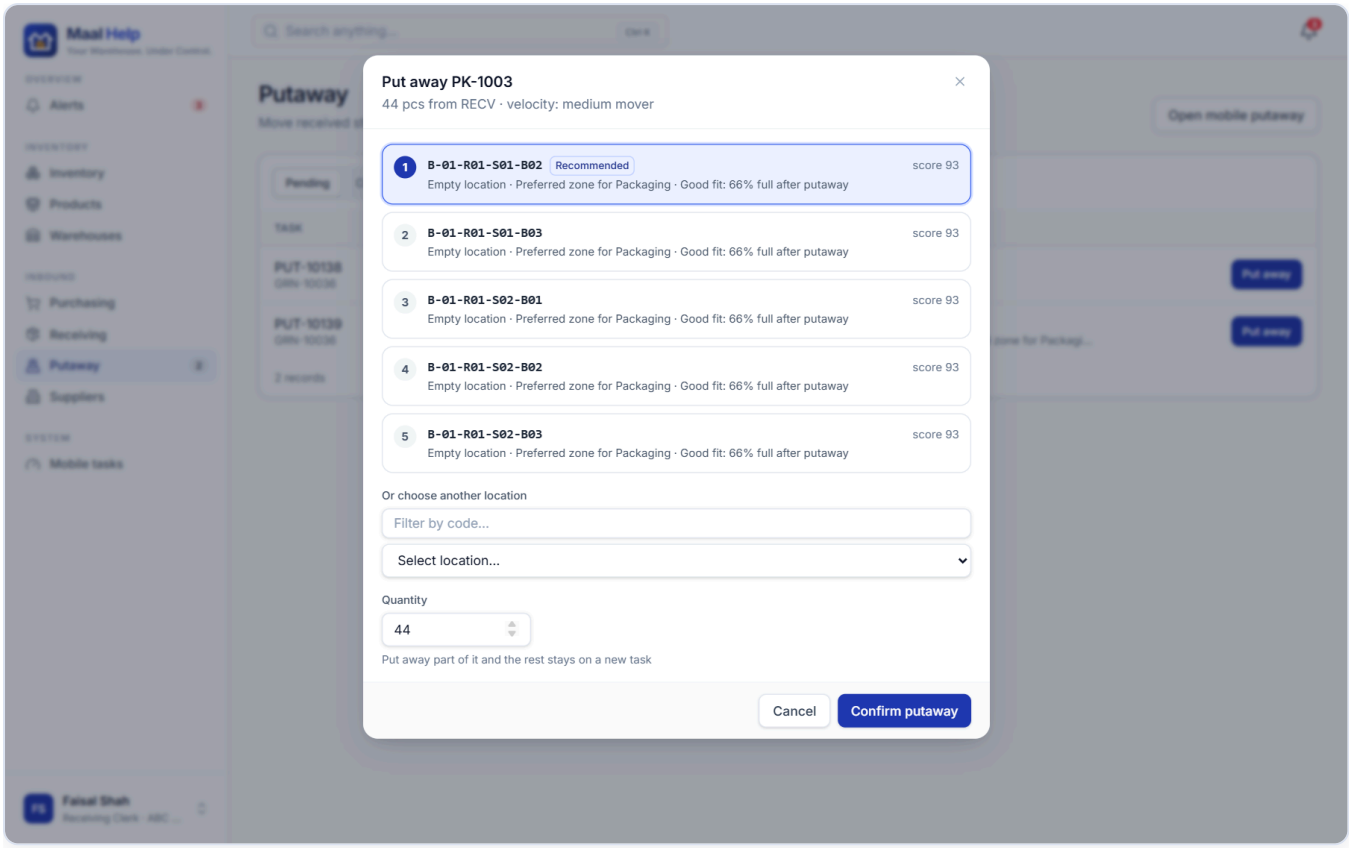

Figure 9. Ranked suggestions with reasons, or choose another location.

1. Open **Putaway** (or **PUTAWAY** on the phone).
2. Select **Put away** on a task. The top suggestion is marked **Recommended**, with reasons such as preferred zone, empty bin, or good fit.
3. Take the goods to the location and confirm. To use another bin, choose it and enter a reason; overrides are recorded.
4. Put away part of the quantity if needed. The rest stays on a new task.

> Stock at the dock cannot be sold until it is put away.

Receive on the phone

Choose the purchase order on the delivery note, then scan what arrived.

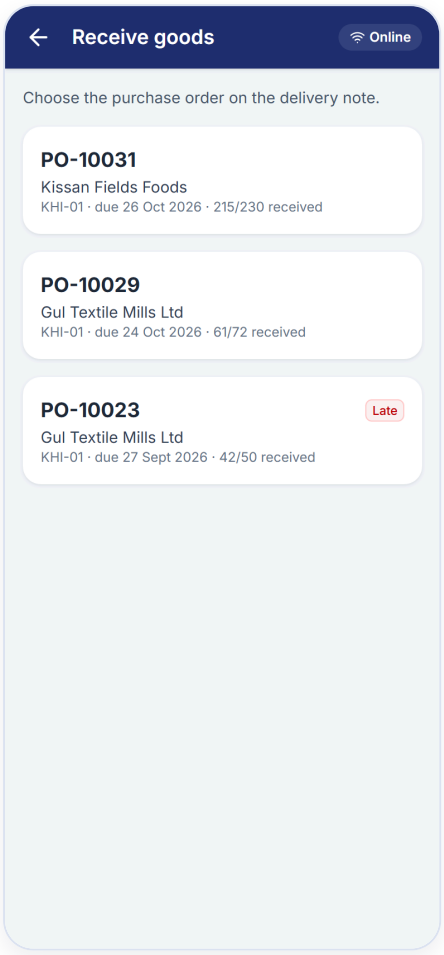

Figure 10. Open purchase orders to receive (late ones are flagged).

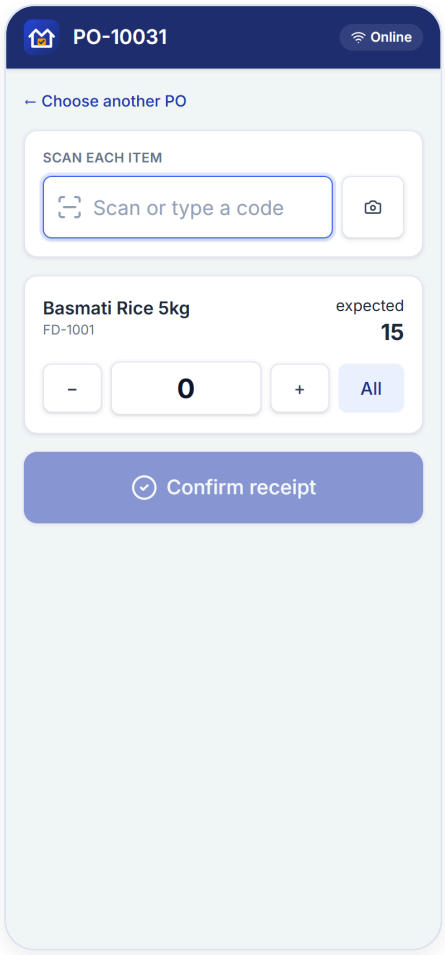

Figure 11. Receiving lines for the chosen purchase order.

1. Tap **RECEIVE** and choose the PO that matches the delivery note.
2. Scan each product (or type the code) and enter the quantity received; record damaged units separately.
3. Enter batch and expiry when asked.
4. Confirm. The goods go to the receiving dock and putaway tasks are created.

Put away on the phone

Each task tells you what to take and where to put it, and why.

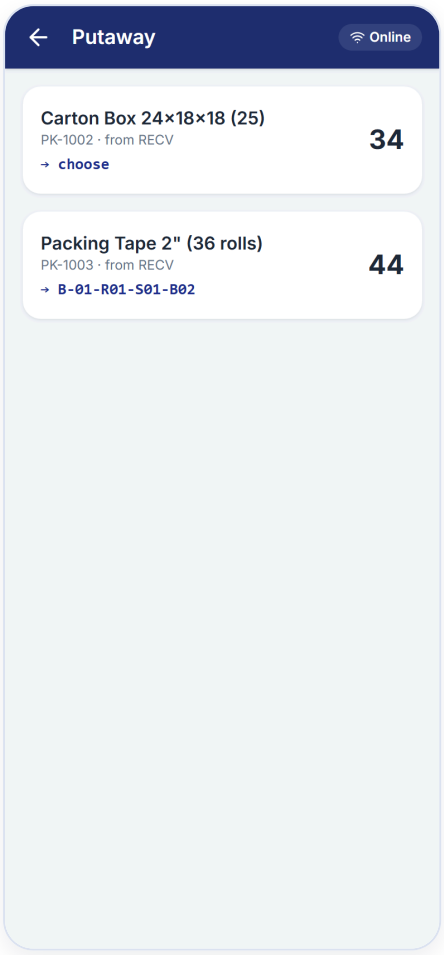

Figure 12. Putaway tasks with the suggested location.

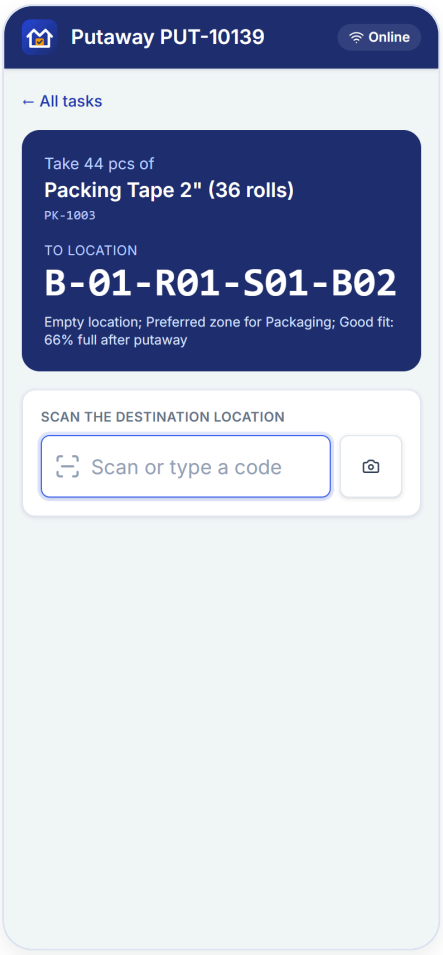

Figure 13. Task detail: product, quantity, destination and reason.

1. Tap **PUTAWAY** and choose a task.
2. Take the stated quantity to the **TO LOCATION**.
3. Scan the destination location label to confirm.

> If the suggested bin is full or blocked, scan another location and give a reason.

Scan lookup

Scan any product or location to see what is where.

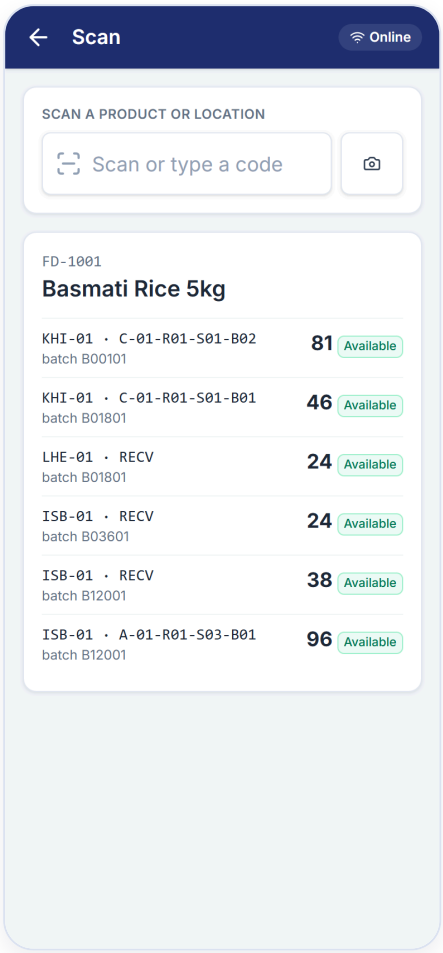

Figure 14. Scanning FD-1001 shows its stock by warehouse, location, batch and status.

1. Tap **SCAN** and scan a product or location label (or type the code).
2. Read the stock by location, batch and status.

Offline sync

If the network drops, your scans are kept on the phone and sent when it returns, without double posting.

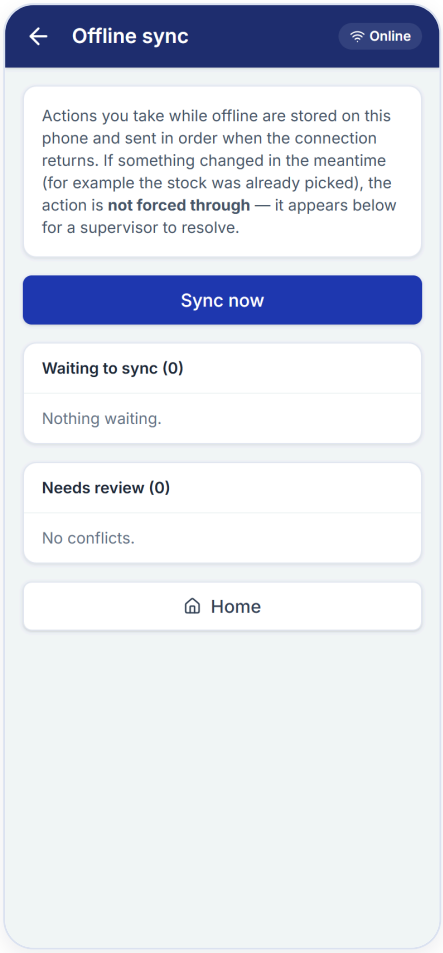

Figure 15. Offline sync: waiting items and conflicts.

1. Watch the **Online/Offline** badge.
2. When back online, open **Sync** and tap **Sync now** (it also syncs automatically).
3. If something could not be applied (for example the stock was already moved), it appears under conflicts. Read it, fix the situation and **Dismiss**.

> Offline mode covers short outages. Do not work offline for a whole shift.

Barcode labels and printing

Print product, location and shipping labels from the browser.

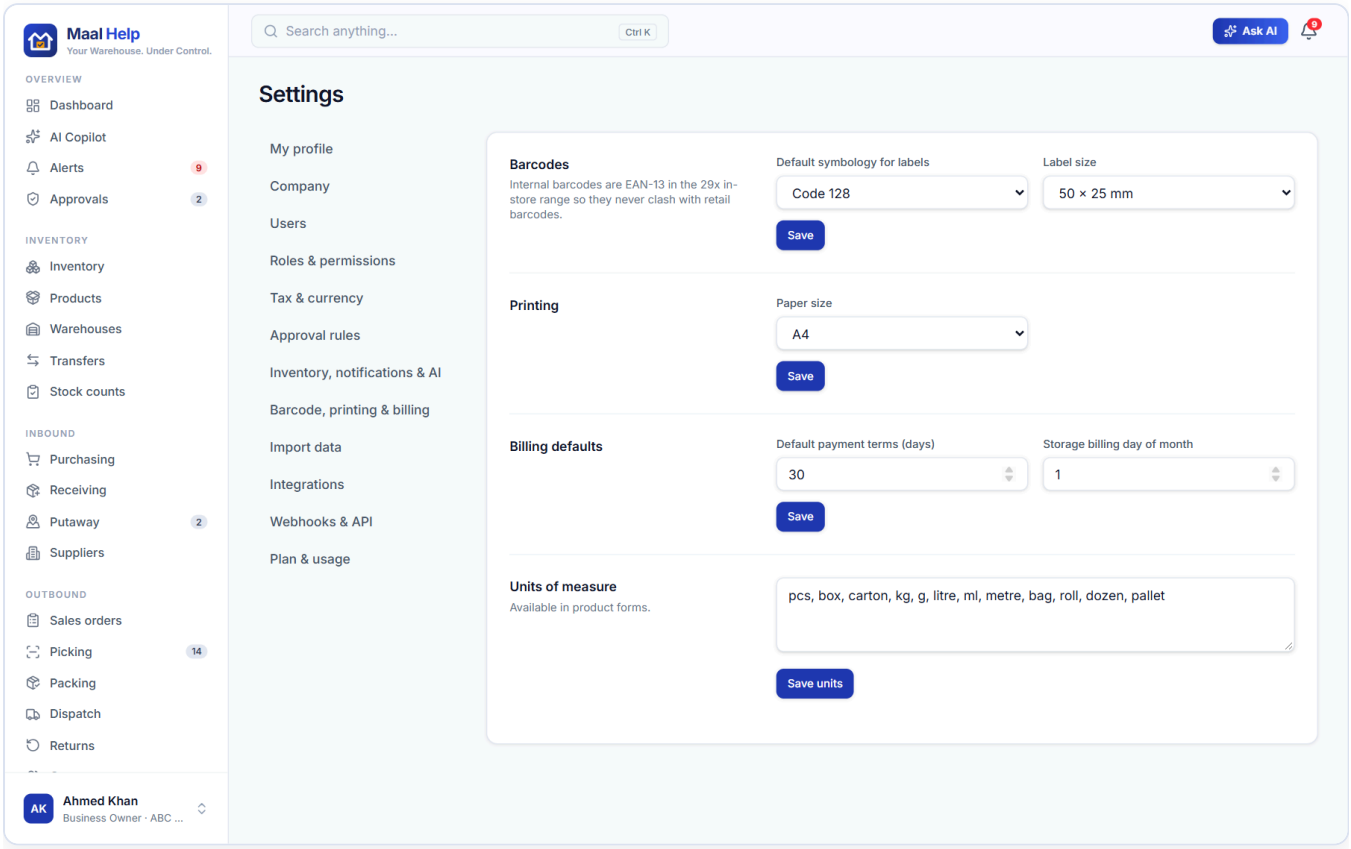

Figure 16. Settings → Barcode, printing & billing: symbology, label size and paper.

1. Set defaults in **Settings** → **Barcode, printing & billing**: symbology (Code 128, EAN-13, QR), label size (50×25, 100×50, 100×150 mm) and paper (A4/Letter).
2. From a product, location or packing screen choose the label/print action, then print with your label printer selected in the browser print dialog.

> For thermal printers, set the printer's paper size to the label size and margins to none.

5 End-to-end workflows

Truck arrives

1. Check the delivery note against the PO number.
2. Receive: scan each product, count, record damage, batch and expiry.
3. Put failed-QC goods on hold or into quarantine.
4. Confirm the receipt; then put away everything at the dock before the end of the shift.

6 Reports, notifications and exceptions

Reports and exports

The Receiving list and receipt details. Managers use the Receiving performance report.

Open **Reports**, choose a report, set filters and export to Excel, CSV or PDF, or print. You see only the reports your role may view.

Notifications and alerts

Over-receipt warnings (more than 10% above the PO) need confirmation; short deliveries are recorded automatically.

The bell at the top right lists new notifications. In-app alerts are always on; email and WhatsApp alerts depend on your company's settings.

When something is refused

Message	Meaning	What to do
Insufficient stock	Not enough *available* units at that place	Check reserved, quarantine or dock stock; choose another location or wait
Wrong location / wrong product	The scan does not match the task	Go to the right place or item and scan again
Quantity exceeds the task	More than required	Enter the task quantity
Pending approval	Above the company threshold	An approver must approve; nothing is posted yet
You don't have permission	Your role lacks the action	Ask your administrator
Credit limit exceeded	Customer balance too high	Collect payment or ask the owner

7 FAQ and troubleshooting

Frequently asked questions

The product is not on the PO

Do not add it to the PO receipt. Receive it **Without PO** only if your manager agrees, or refuse it.

The supplier sent more than ordered

Up to 10% is accepted; above that the system asks you to confirm the over-receipt.

Why can’t I see a menu or button?

Your role does not include that permission. Ask your administrator. Permissions are checked by the server.

Can I edit or delete a posted stock movement?

No. History is permanent. Corrections are new transactions (an adjustment or reversal) with a reason, so the audit trail stays complete.

Why does the screen say stock is not available?

It may be reserved for another order, in quarantine, damaged, expired, in transit or still at the receiving dock waiting for putaway.

Is my data visible to other companies?

No. Every company’s data is isolated, and requests for another company’s records are refused.

Troubleshooting

Problem	Solution
Barcode not found	Type the SKU, or check the product has that barcode (Products). Ask a manager to add it.
Camera scanning does not start	Allow camera access for the site in the browser settings; use HTTPS; or type the code.
Scanner types into the wrong field	Tap the scan box first. Most scanners act as a keyboard and send Enter after the code.
Offline badge appears	Keep working on short tasks. Scans are queued and synced when the connection returns. Check Sync for conflicts.
“Missing anti-forgery header” or 403 when saving	Refresh the page. If it persists, you may lack permission for the action.

Account locked	Too many wrong passwords. Wait a few minutes or ask your administrator to reset your password.

Still stuck? Note the screen, the record number (for example SO-10245) and the exact message, and contact your company administrator.

8 Glossary and quick reference

Quick reference

I want to...	Go to
Receive	**Receiving → Receive goods / RECEIVE**
Put away	**Putaway / PUTAWAY**
Look up	**SCAN**
Search anything	**Ctrl + K**

Glossary

Term	Meaning
SKU	Stock-keeping unit: one product code.
GRN	Goods received note: the record of a delivery received.
PO	Purchase order to a supplier.
SO	Sales order from a customer.
Putaway	Moving received goods from the dock into a storage location.
FEFO	First-expiry-first-out: older-expiry batches are reserved and picked first.
Reserved	Units promised to a confirmed order; not available for other orders.
Quarantine	Units held for inspection; not sellable.
In transit	Units dispatched on a transfer but not yet received.
Ledger	The permanent, append-only list of every stock movement.
Wave	A group of pick tasks picked together (batch or zone).
Back-order	The part of an order that could not be reserved yet.
3PL / storage client	A business whose goods you store and bill for storage and handling.
NTN / STRN	Pakistan national tax number / sales tax registration number.
Blind count	A count where the counter does not see the expected quantity.
