1 Introduction

Who this manual is for

This manual is for people with the **Sales User** role in Maal Help. Manages customers and sales orders, checks stock availability and order status, and handles returns.

Maal Help is a warehouse operating system: stock by warehouse, location, batch and owner on a permanent ledger, plus purchasing, sales and fulfilment, billing, reports and an AI Copilot that answers from your own data.

Your role can

- ✓ Create and edit customers
- ✓ Create, confirm and cancel sales orders
- ✓ Check availability; process customer returns
- ✓ View inventory and operational reports; use the Copilot

Your role cannot

- ✗ See cost prices or margins
- ✗ Create purchase orders
- ✗ Pick, pack or dispatch

Screens show the fictional demo company **ABC Trading & Warehousing**. Your company's names and numbers will differ. Menus show only what your role is allowed to use.

2 Access and navigation

Signing in

Maal Help runs in any modern browser on a computer, tablet or Android phone. Your company administrator creates your account and gives you a temporary password.

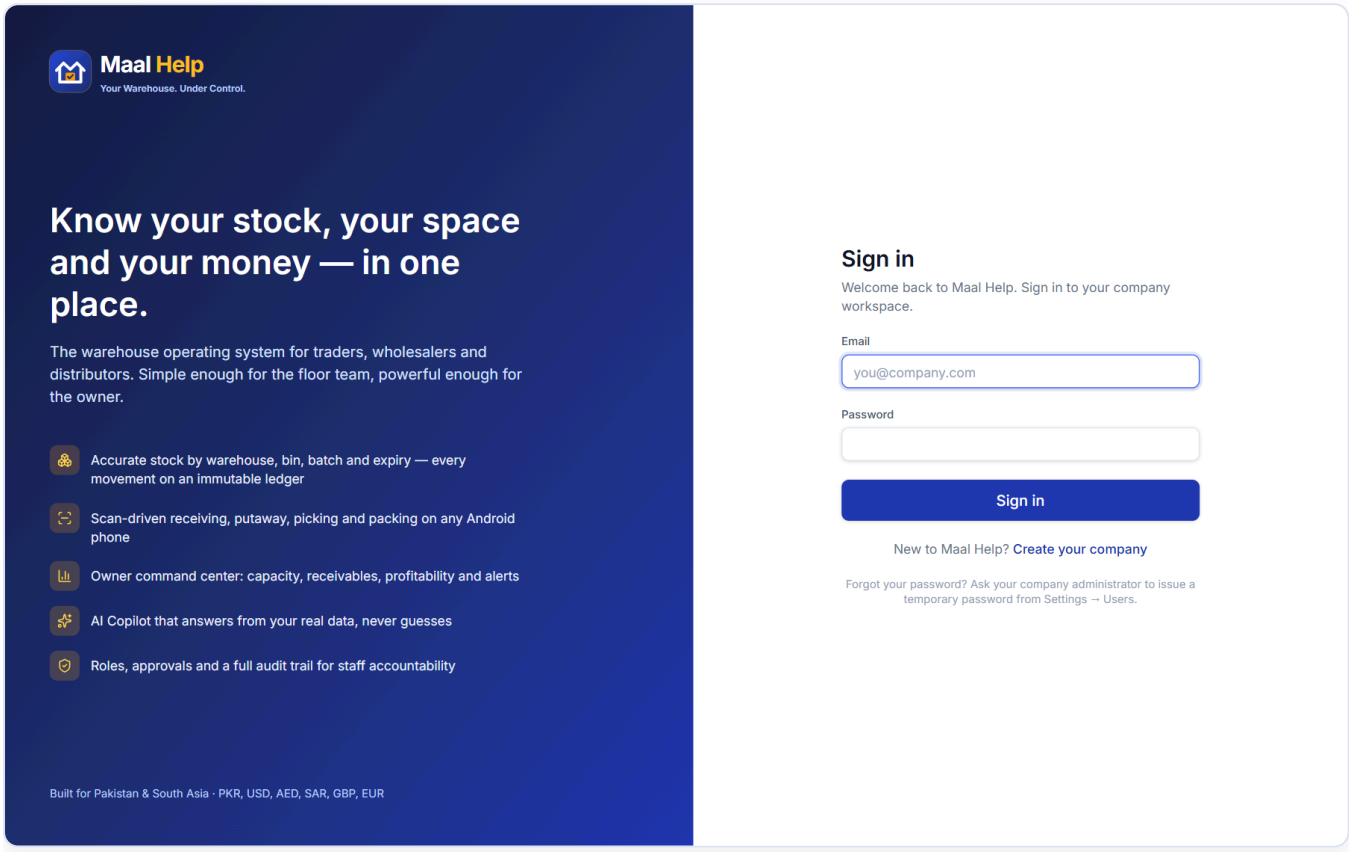

Figure 1. The Maal Help sign-in page.

1. Open the Maal Help address your company gave you.
2. Enter your work email and password, then select **Sign in**.
3. The first time, change your temporary password: **Settings** → **My profile** → **Change password** (at least 10 characters with letters and numbers).
4. Forgot your password? Ask your company administrator to issue a temporary one (**Settings** → **Users** → **Reset password**).

> After 8 wrong passwords the account is locked for a short time. Wait, then try again.

> Sign out on shared computers. Sessions also expire automatically.

Finding your way around

The left sidebar shows only the screens your role may use. Counts next to a menu item (for example Putaway 2) show open work.

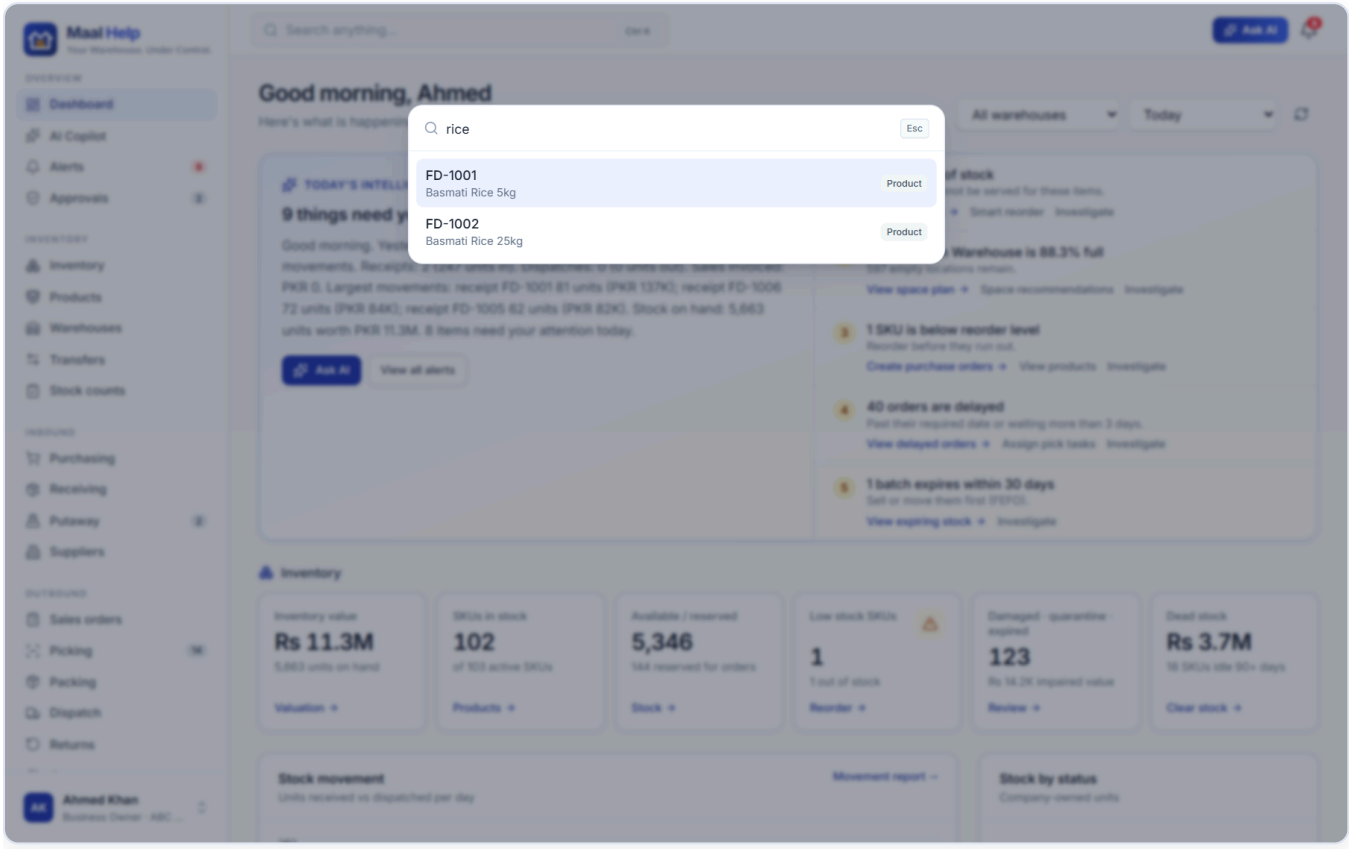

Figure 2. Press Ctrl + K anywhere to search products, orders, customers, locations and screens.

1. Use the **sidebar** to move between screens. Your name and role are at the bottom.
2. Use **Search anything...** at the top, or press **Ctrl + K**, then type a SKU, barcode, order number or name.
3. The **bell** opens your notifications. **Ask AI** opens the Copilot (if your role has it).
4. Tables support search, filters, sorting and paging. Click a row to open the record.

> If a screen or button you expect is missing, your role does not include that permission. Ask your administrator. The server enforces permissions, so hiding a menu is never the only control.

3 Your home screen

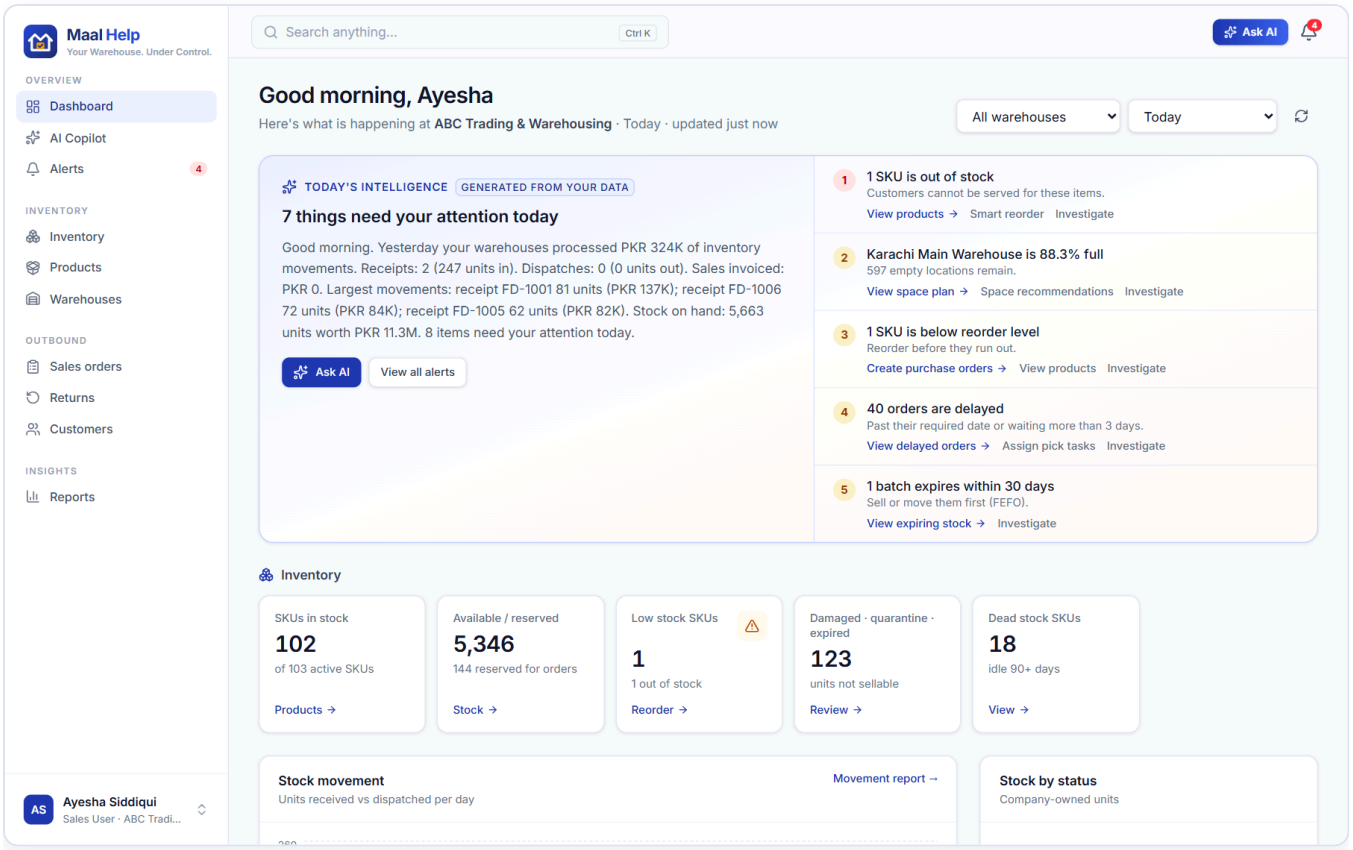

Figure 3. Sales User dashboard.

- Shows order backlog, delayed orders and stock signals relevant to selling.

4 Features step by step

Sales orders

Create orders, check availability and reserve stock first-expiry-first-out. You cannot sell what is not available.

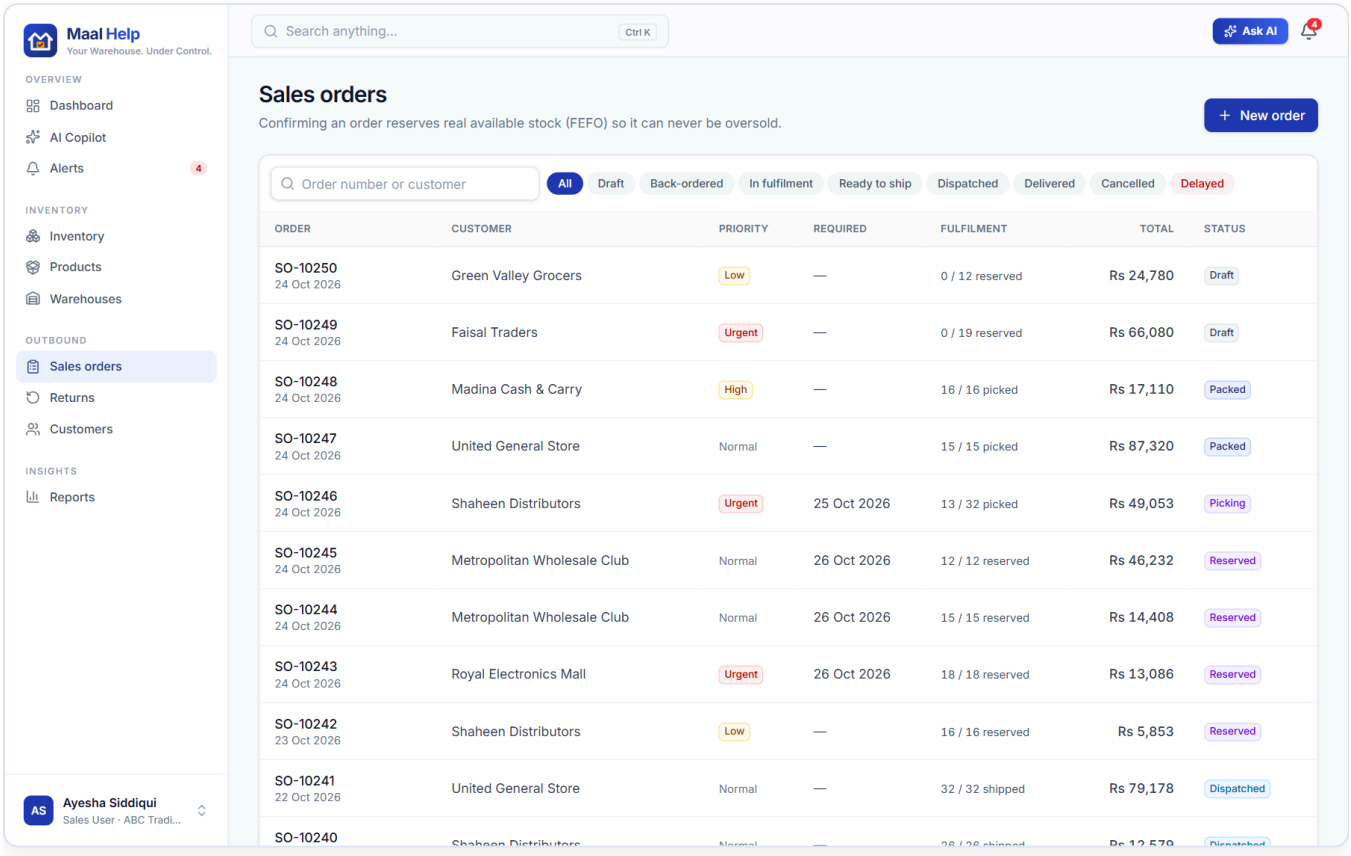

Figure 4. Sales orders by status.

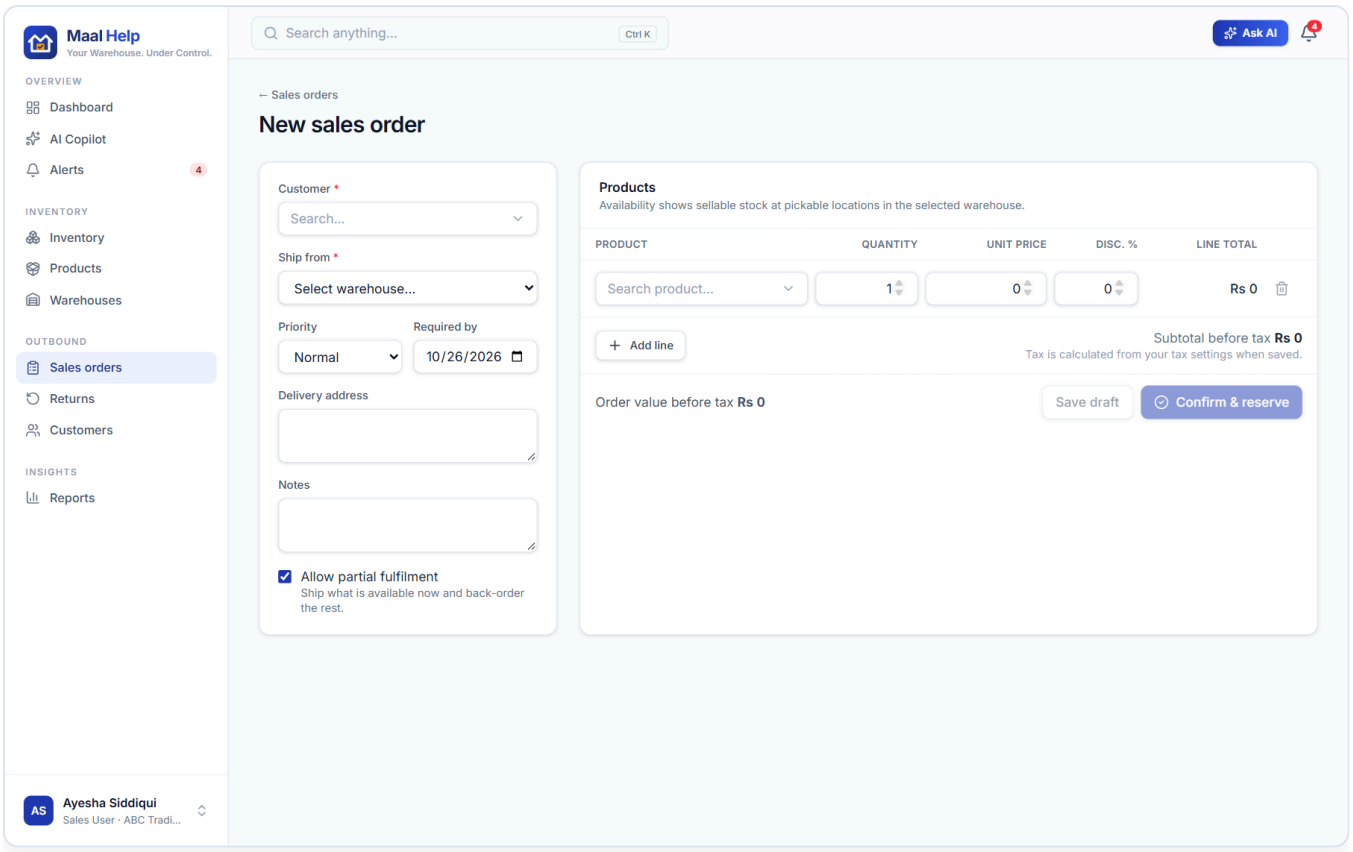

Figure 5. New sales order with availability per line.

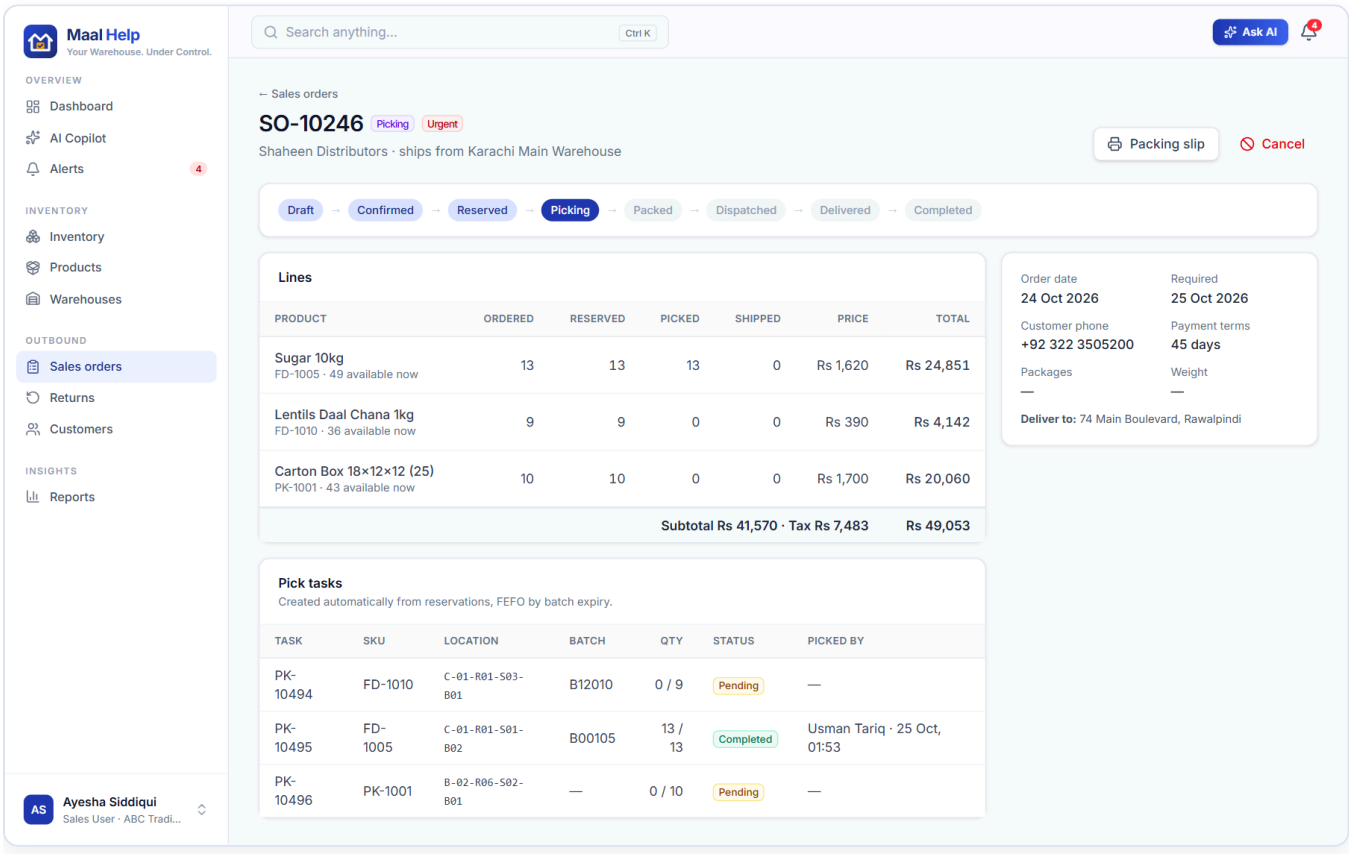

Figure 6. Order detail with the status path Draft → Confirmed → … → Completed.

1 **Sales orders → New**: choose customer, ship-from warehouse, priority and required date.

2. Add products. Availability shows sellable stock at pickable locations in that warehouse.
3. Tick **Allow partial fulfilment** to ship what is available and back-order the rest.
4. **Save draft**, or **Confirm & reserve**: stock is reserved (FEFO) and pick tasks are created.
5. Follow progress on the order: Picking → Packed → Dispatched → Delivered. Print the packing slip from the order.

> Confirmation is refused if the customer is over the credit limit.

> Cancelling before dispatch releases reserved stock.

Customers

Buyers and storage clients, with balances and credit limits.

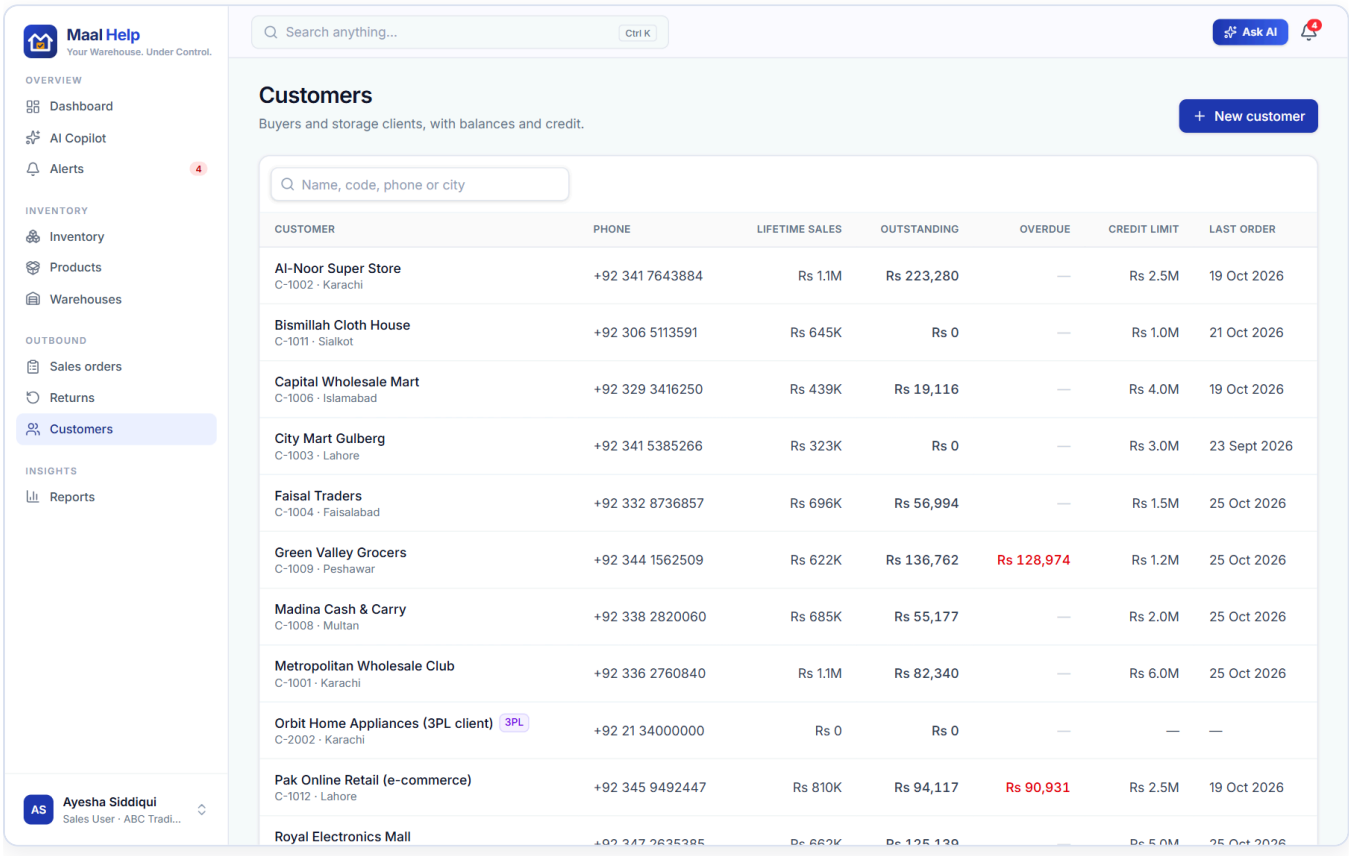

Figure 7. Customers with lifetime sales, outstanding, overdue and credit limit.

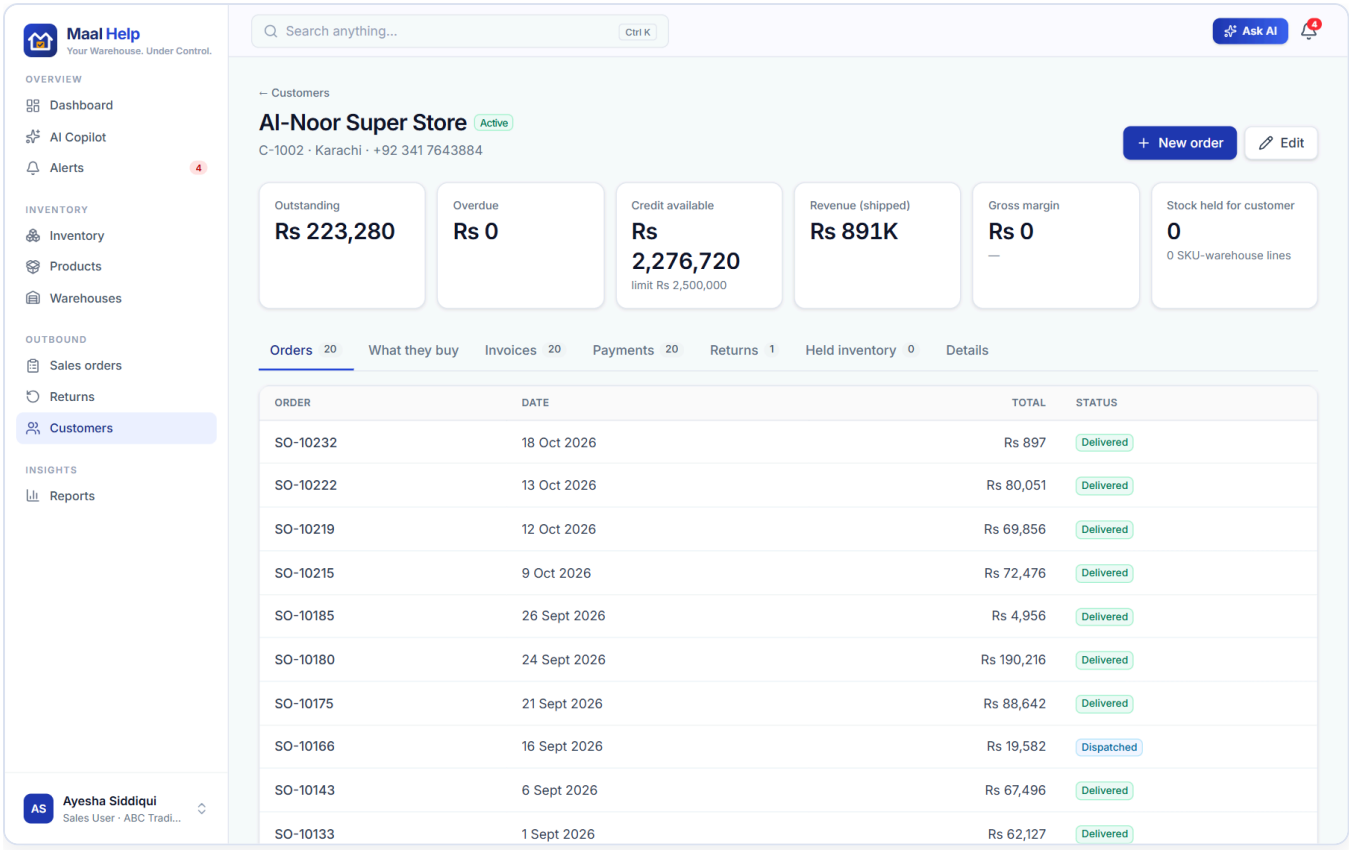

Figure 8. Customer 360°: orders, invoices, payments and stock held for them.

1. **Customers → New customer**: name, contact, phone, city, NTN/STRN, credit limit and payment terms. Mark storage (3PL) clients.
2. Open a customer to see orders, invoices, payments and balance.

Customer returns

Receive returned goods and decide where each unit goes: back to stock, damaged, quarantine, repair or write-off.

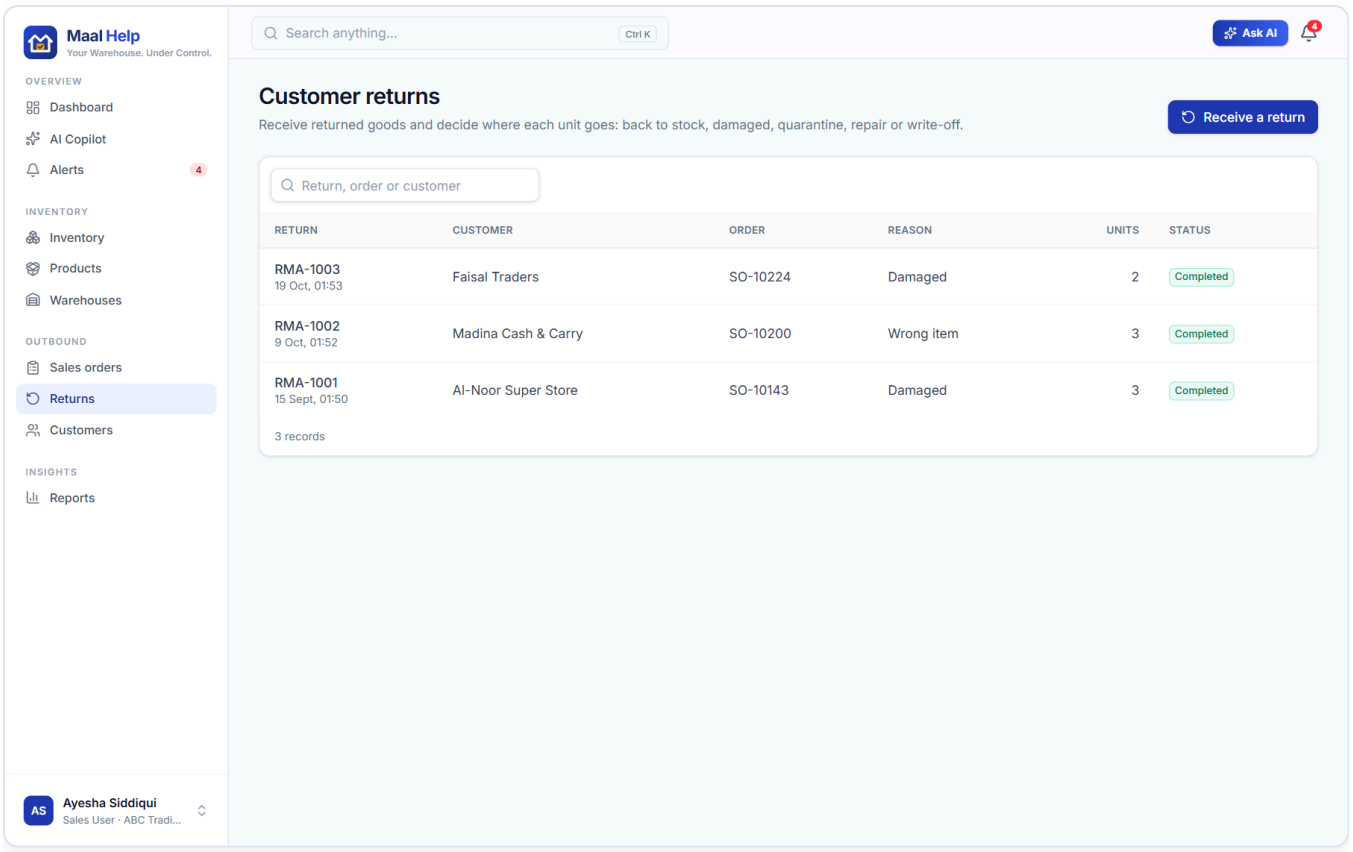

Figure 9. Customer returns with reason, units and credit.

1. **Returns → Receive a return**: choose the customer and original order.
2. Enter quantities and the reason for each product, and inspect each unit.
3. Choose the outcome for each line. Only units returned to **available** can be sold again.
4. Confirm. Stock movements and any customer credit are recorded.

Inventory: stock on hand and ledger

Every unit, by warehouse, location, batch, owner and status, backed by a ledger that nobody can edit or delete.

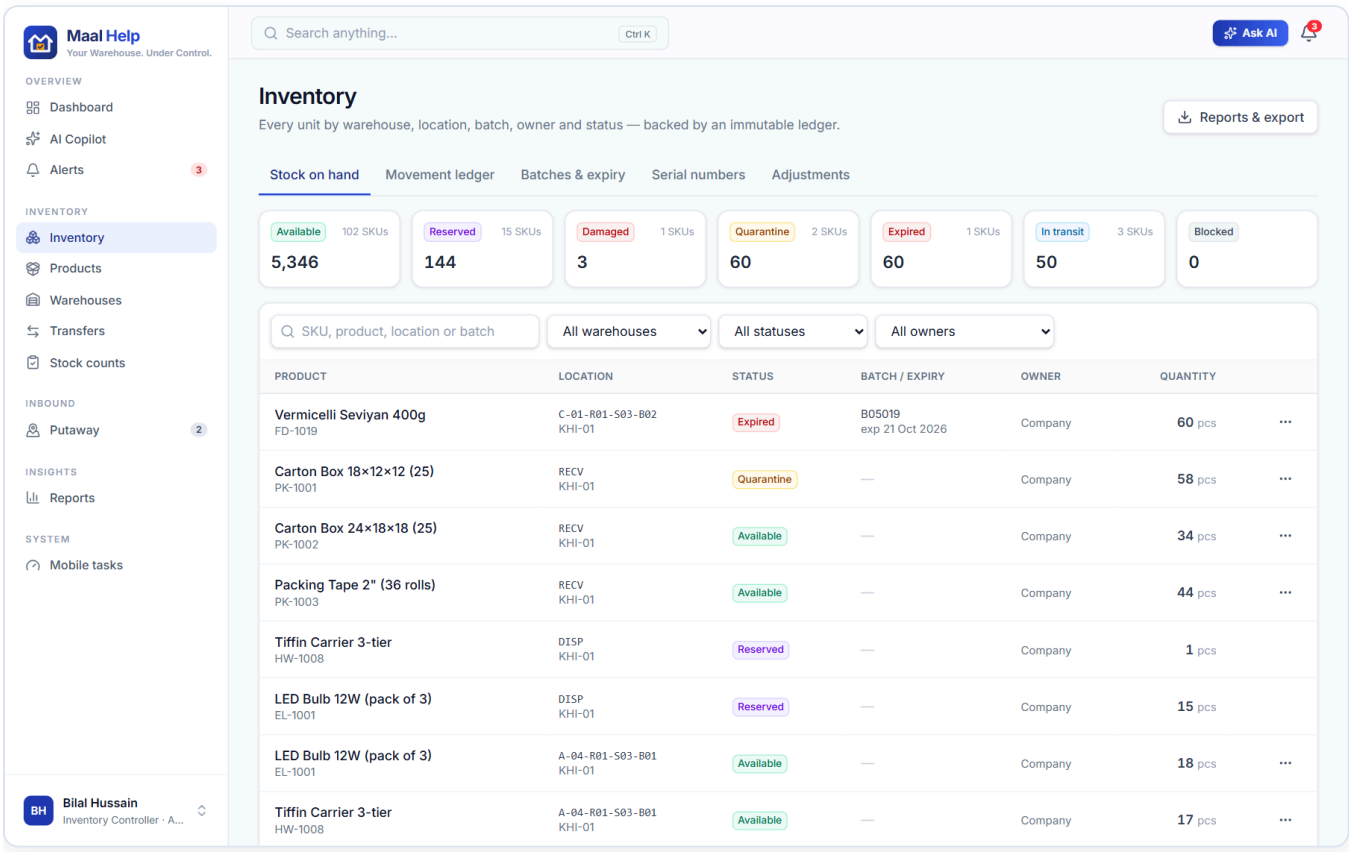

Figure 10. Stock on hand with status totals (Available, Reserved, Damaged, Quarantine, Expired, In transit, Blocked).

1. Open **Inventory**. Click a status card to filter, or search by product, SKU or location.
2. Tabs: **Stock on hand**, **Movement ledger** (every receipt, move, pick, dispatch, adjustment), **Batches & expiry**, **Serial numbers**, **Adjustments**.
3. Click a product to see its stock by location and its full movement history.
4. **Reports & export** opens the matching reports with Excel/CSV/PDF export.

> Stock can never go negative. Corrections are new transactions (adjustments, reversals), never edits.

> Roles without finance access do not see values or costs.

AI Copilot

Ask questions in plain English. The Copilot looks up facts with read-only tools limited to what your role may see, and shows its sources. It can recommend; you decide.

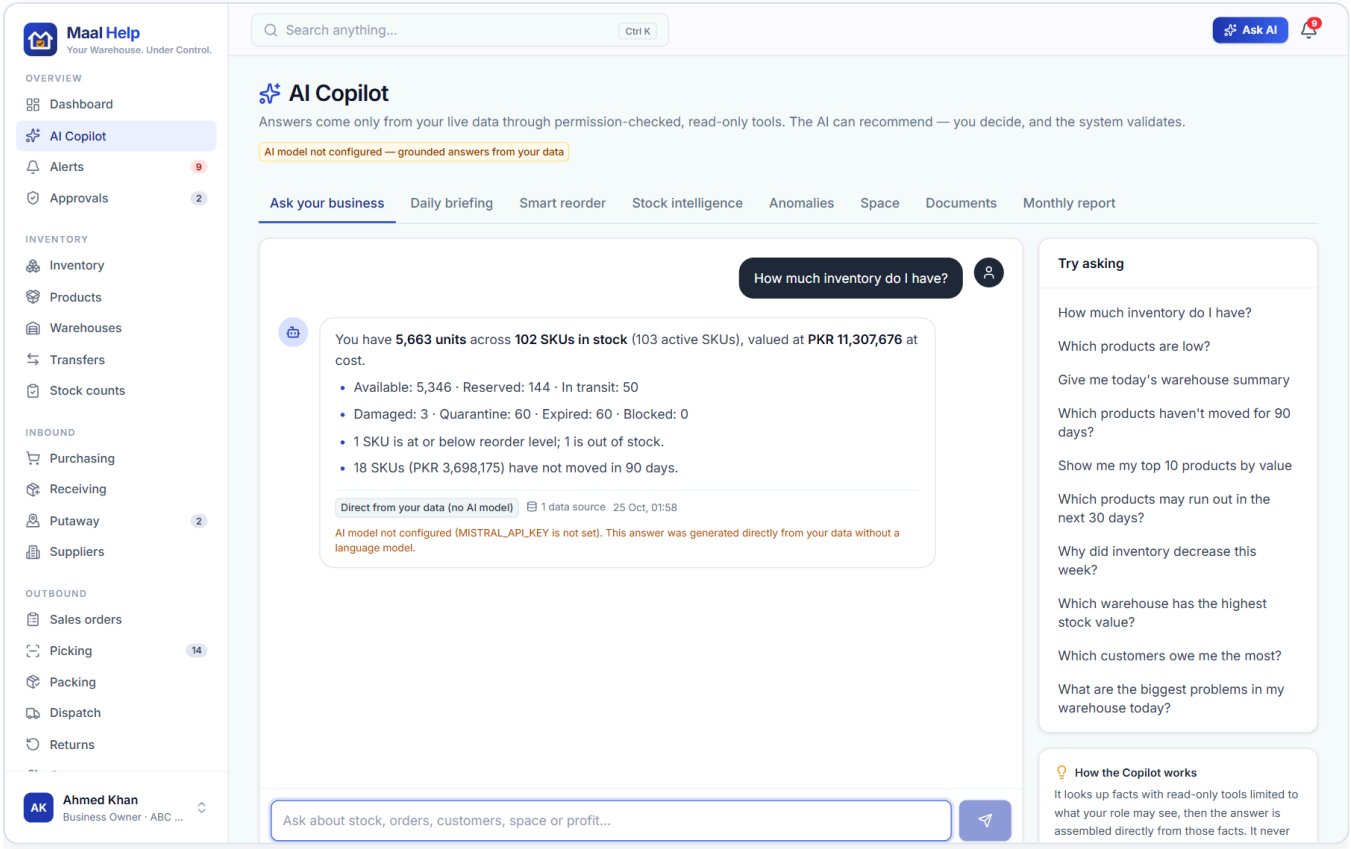

Figure 11. An answer built from live data, with its data source and mode shown.

1. Open **AI Copilot** (or select **Ask AI**).
2. Type a question, for example *How much inventory do I have?*, *Which products are low?* or *Which customers owe me the most?*, or tap a suggestion.
3. Check the badge under the answer: **Mistral AI · from your data** or **Direct from your data (no AI model)**. Open *data sources* to see what was used.
4. Other tabs: **Daily briefing**, **Smart reorder**, **Stock intelligence**, **Anomalies**, **Space**, **Documents**, **Monthly report**.

> The AI never changes stock, approves anything or posts financial entries. Suggested purchase orders open as drafts that a person must review and save.

> If your company has not configured the AI model, answers are assembled directly from your data and are clearly labelled.

> Anomalies are flags for review, never accusations. Write your findings when you mark one reviewed.

Reports and exports

35 reports in five groups: Inventory, Warehouse, Sales, Purchasing and Financial. Every report supports filters, search, sorting, paging, Excel/CSV/PDF export and printing.

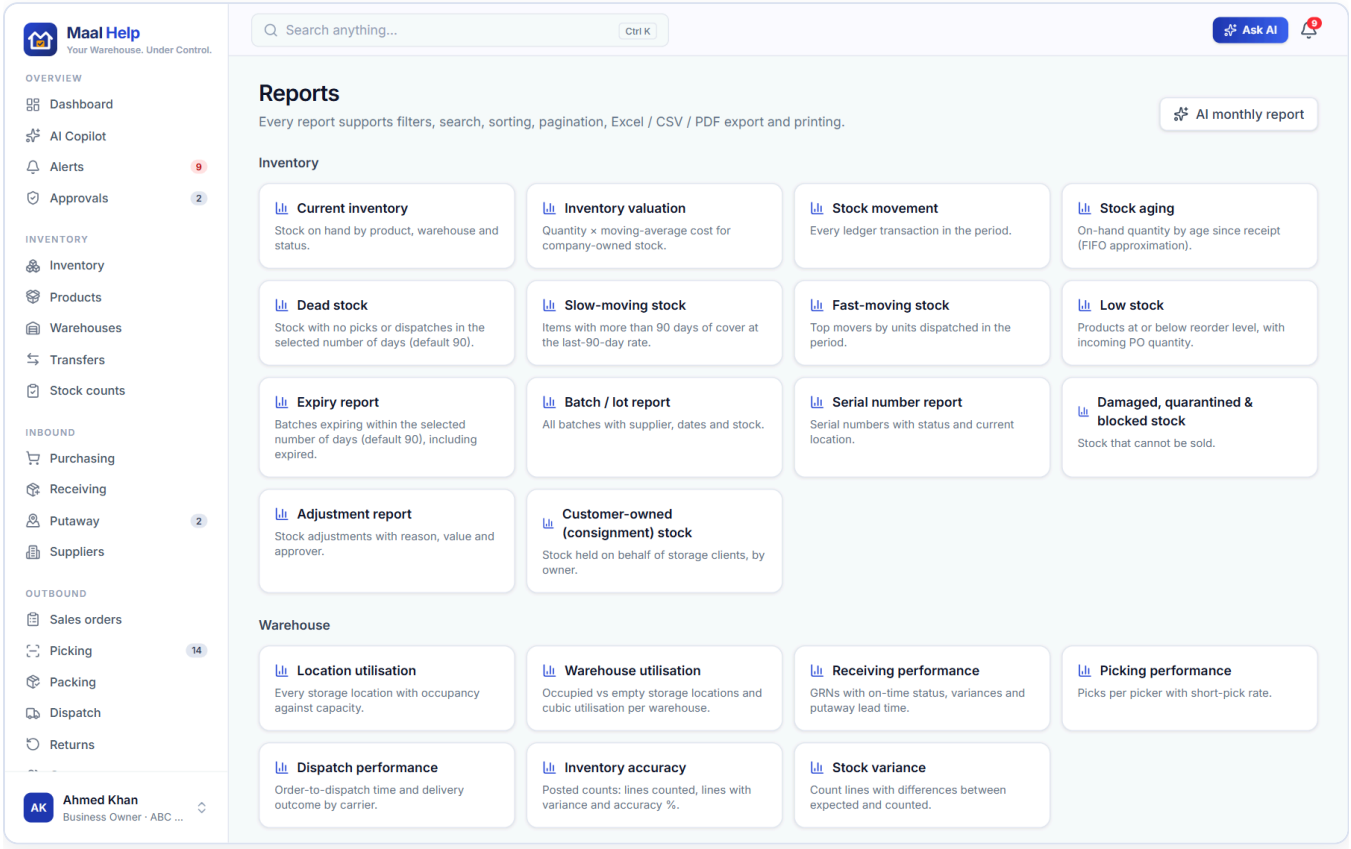

Figure 12. The report library.

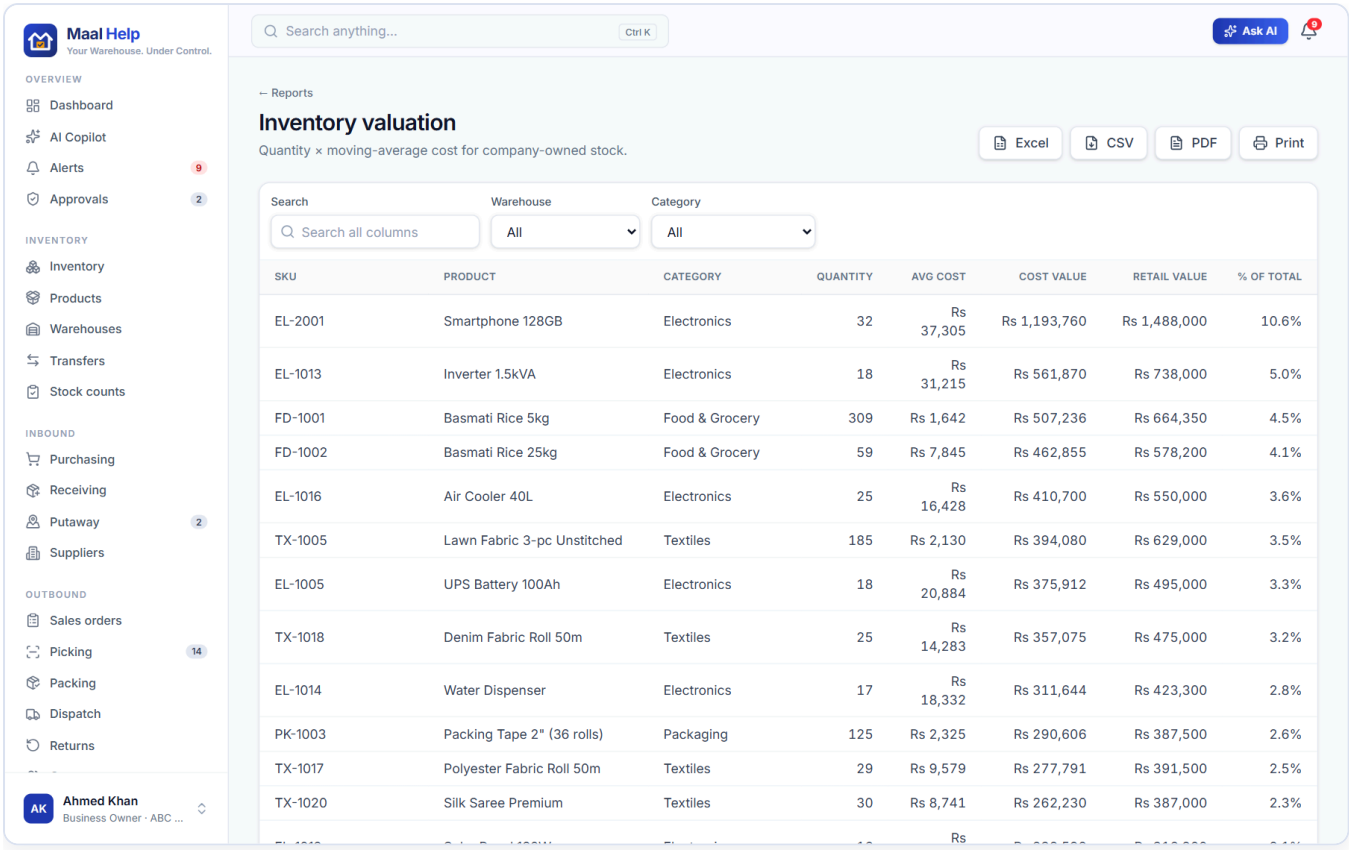

Figure 13. Inventory valuation with filters and export.

1. Open **Reports** and choose a report. You see only reports your role may view.
2. Set filters (dates, warehouse, product, customer…) and search or sort the table.
3. Export with **Excel**, **CSV** or **PDF**, or print. PDFs carry the Maal Help letterhead.
4. **AI monthly report** gives a written business summary for a month.

5 End-to-end workflows

Take an order

1. Check availability for the customer's warehouse.
2. Create the order; allow partial fulfilment if the customer agrees.
3. **Confirm & reserve**; tell the customer the expected dispatch date.
4. Track the order until Delivered.

Customer over credit limit

1. Confirmation is refused with a credit-limit message.
2. Ask accounts to record pending payments, or the owner to raise the limit.

6 Reports, notifications and exceptions

Reports and exports

Sales by customer, product, warehouse and date; Current inventory; Low stock.

Open **Reports**, choose a report, set filters and export to Excel, CSV or PDF, or print. You see only the reports your role may view.

Notifications and alerts

Delayed orders and back-orders.

The bell at the top right lists new notifications. In-app alerts are always on; email and WhatsApp alerts depend on your company's settings.

When something is refused

Message	Meaning	What to do
Insufficient stock	Not enough *available* units at that place	Check reserved, quarantine or dock stock; choose another location or wait
Wrong location / wrong product	The scan does not match the task	Go to the right place or item and scan again
Quantity exceeds the task	More than required	Enter the task quantity
Pending approval	Above the company threshold	An approver must approve; nothing is posted yet
You don't have permission	Your role lacks the action	Ask your administrator
Credit limit exceeded	Customer balance too high	Collect payment or ask the owner

7 FAQ and troubleshooting

Frequently asked questions

Why is available lower than on hand?

Some units are reserved, at the dock, in quarantine or damaged.

Why can’t I see a menu or button?

Your role does not include that permission. Ask your administrator. Permissions are checked by the server.

Can I edit or delete a posted stock movement?

No. History is permanent. Corrections are new transactions (an adjustment or reversal) with a reason, so the audit trail stays complete.

Why does the screen say stock is not available?

It may be reserved for another order, in quarantine, damaged, expired, in transit or still at the receiving dock waiting for putaway.

Is my data visible to other companies?

No. Every company’s data is isolated, and requests for another company’s records are refused.

Troubleshooting

Problem	Solution
Cannot confirm: insufficient stock	Allow partial fulfilment, choose another warehouse, or wait for incoming purchase orders.
“Missing anti-forgery header” or 403 when saving	Refresh the page. If it persists, you may lack permission for the action.
Account locked	Too many wrong passwords. Wait a few minutes or ask your administrator to reset your password.

> Still stuck? Note the screen, the record number (for example SO-10245) and the exact message, and contact your company administrator.

8 Glossary and quick reference

Quick reference

I want to...	Go to
New order	**Sales orders → New**
Customer balance	**Customers → (customer)**
Return	**Returns → Receive a return**
Search anything	**Ctrl + K**

Glossary

Term	Meaning
SKU	Stock-keeping unit: one product code.
GRN	Goods received note: the record of a delivery received.
PO	Purchase order to a supplier.
SO	Sales order from a customer.
Putaway	Moving received goods from the dock into a storage location.
FEFO	First-expiry-first-out: older-expiry batches are reserved and picked first.
Reserved	Units promised to a confirmed order; not available for other orders.
Quarantine	Units held for inspection; not sellable.
In transit	Units dispatched on a transfer but not yet received.
Ledger	The permanent, append-only list of every stock movement.
Wave	A group of pick tasks picked together (batch or zone).
Back-order	The part of an order that could not be reserved yet.
3PL / storage client	A business whose goods you store and bill for storage and handling.
NTN / STRN	Pakistan national tax number / sales tax registration number.
Blind count	A count where the counter does not see the expected quantity.
