1 Introduction

Who this manual is for

This manual is for people with the **SaaS Super Admin (platform)** role in Maal Help. Operates the Maal Help service for all subscribing companies: tenants, plans, feature flags, health, AI usage and support. Has no access to any company's operational data.

Maal Help is a warehouse operating system: stock by warehouse, location, batch and owner on a permanent ledger, plus purchasing, sales and fulfilment, billing, reports and an AI Copilot that answers from your own data.

Your role can

- ✓ View and manage tenants (companies) and their plans
- ✓ Edit plan limits and feature flags
- ✓ Monitor system health and AI usage/cost
- ✓ Handle support tickets

Your role cannot

- ✗ Open a company's products, stock, orders or finance
- ✗ Act as a company user

> Screens show the fictional demo company **ABC Trading & Warehousing**. Your company's names and numbers will differ. Menus show only what your role is allowed to use.

2 Access and navigation

Signing in

Maal Help runs in any modern browser on a computer, tablet or Android phone. Your company administrator creates your account and gives you a temporary password.

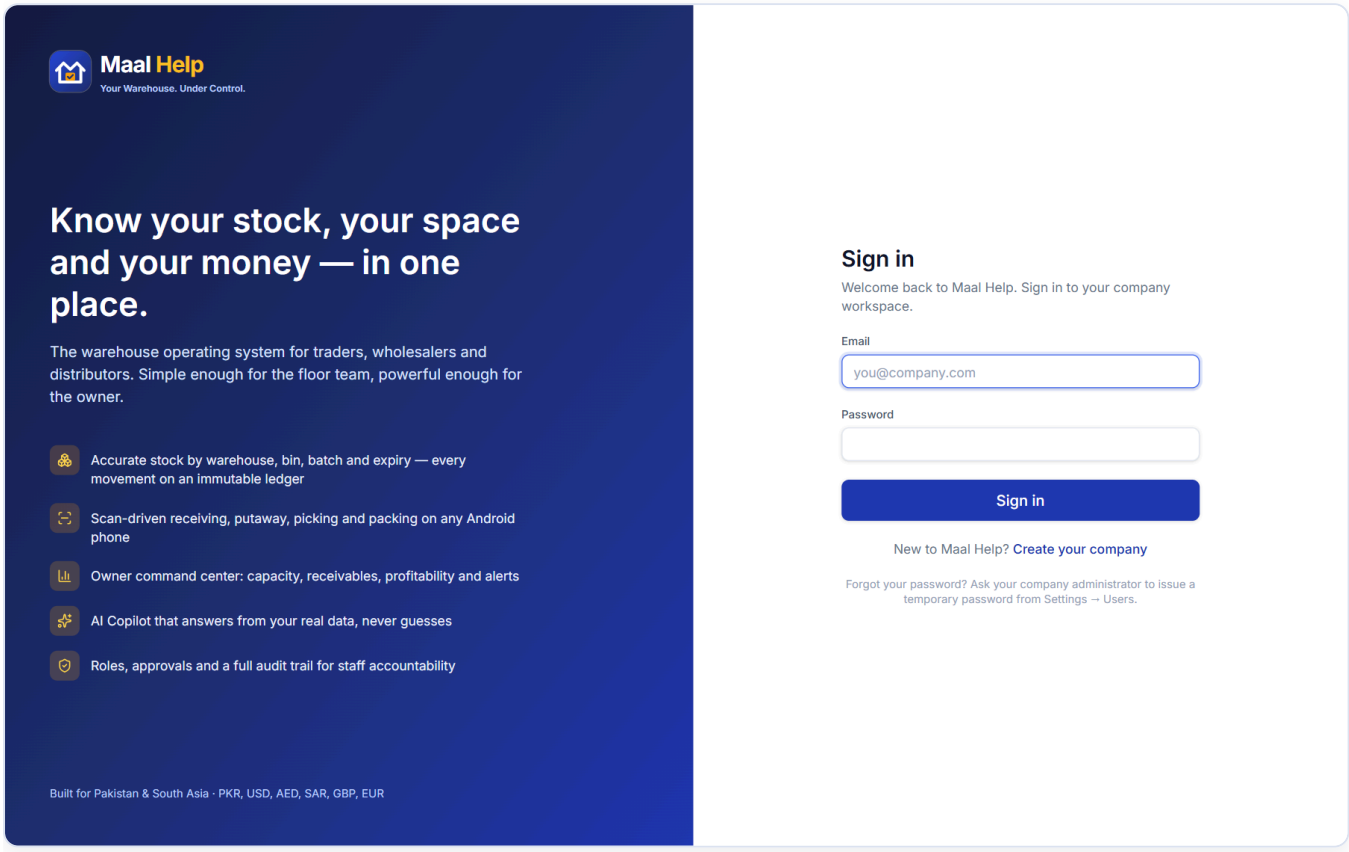

Figure 1. The Maal Help sign-in page.

1. Open the Maal Help address your company gave you.
2. Enter your work email and password, then select **Sign in**.
3. The first time, change your temporary password: **Settings** → **My profile** → **Change password** (at least 10 characters with letters and numbers).
4. Forgot your password? Ask your company administrator to issue a temporary one (**Settings** → **Users** → **Reset password**).

> After 8 wrong passwords the account is locked for a short time. Wait, then try again.

> Sign out on shared computers. Sessions also expire automatically.

3 Platform overview

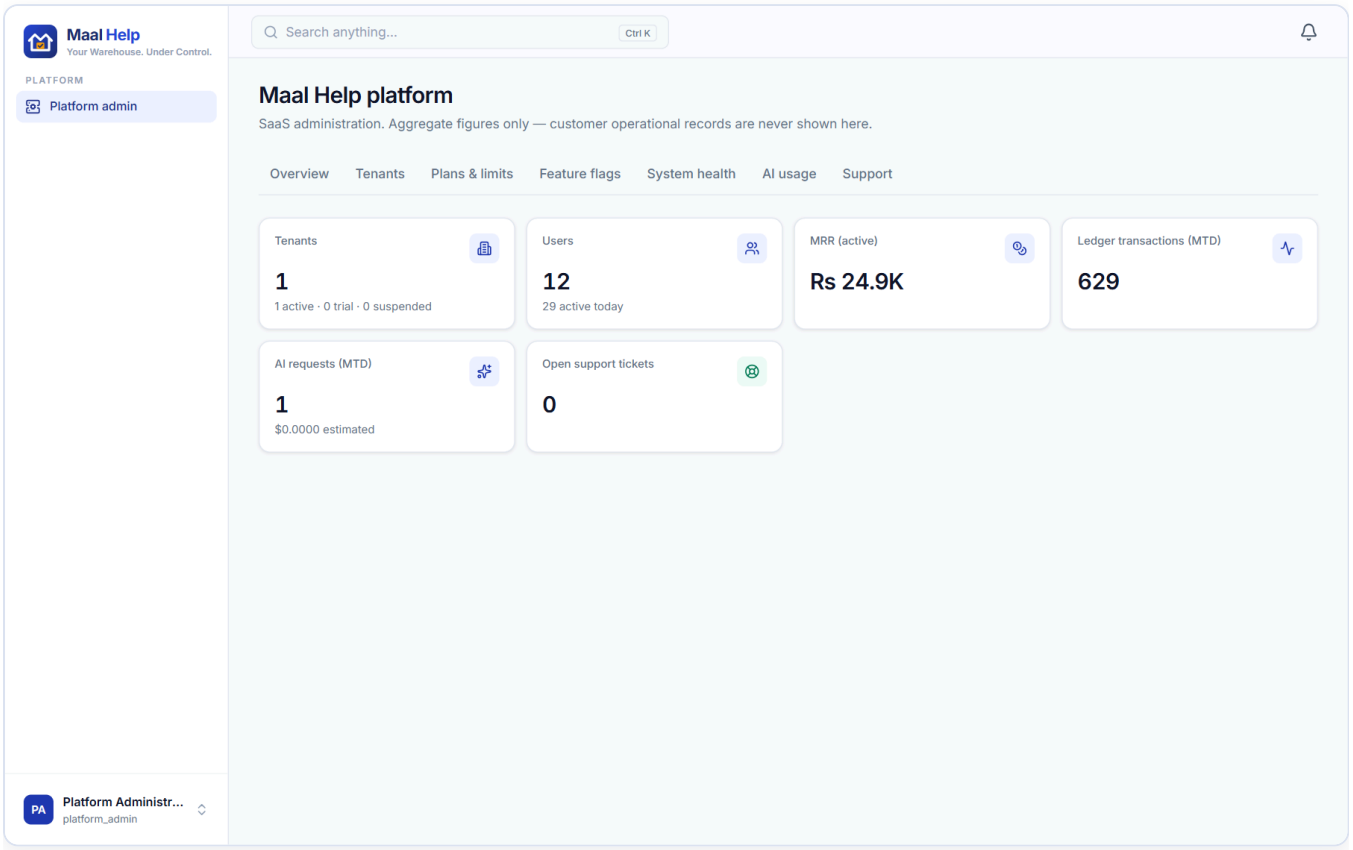

Figure 2. Platform overview: aggregate figures only.

- After sign-in you land on **Platform admin → Overview**.
- The tabs across the top are Overview, Tenants, Plans & limits, Feature flags, System health, AI usage and Support.

4 Features step by step

Platform administration

SaaS administration with aggregate figures only. Customer operational records are never shown here.

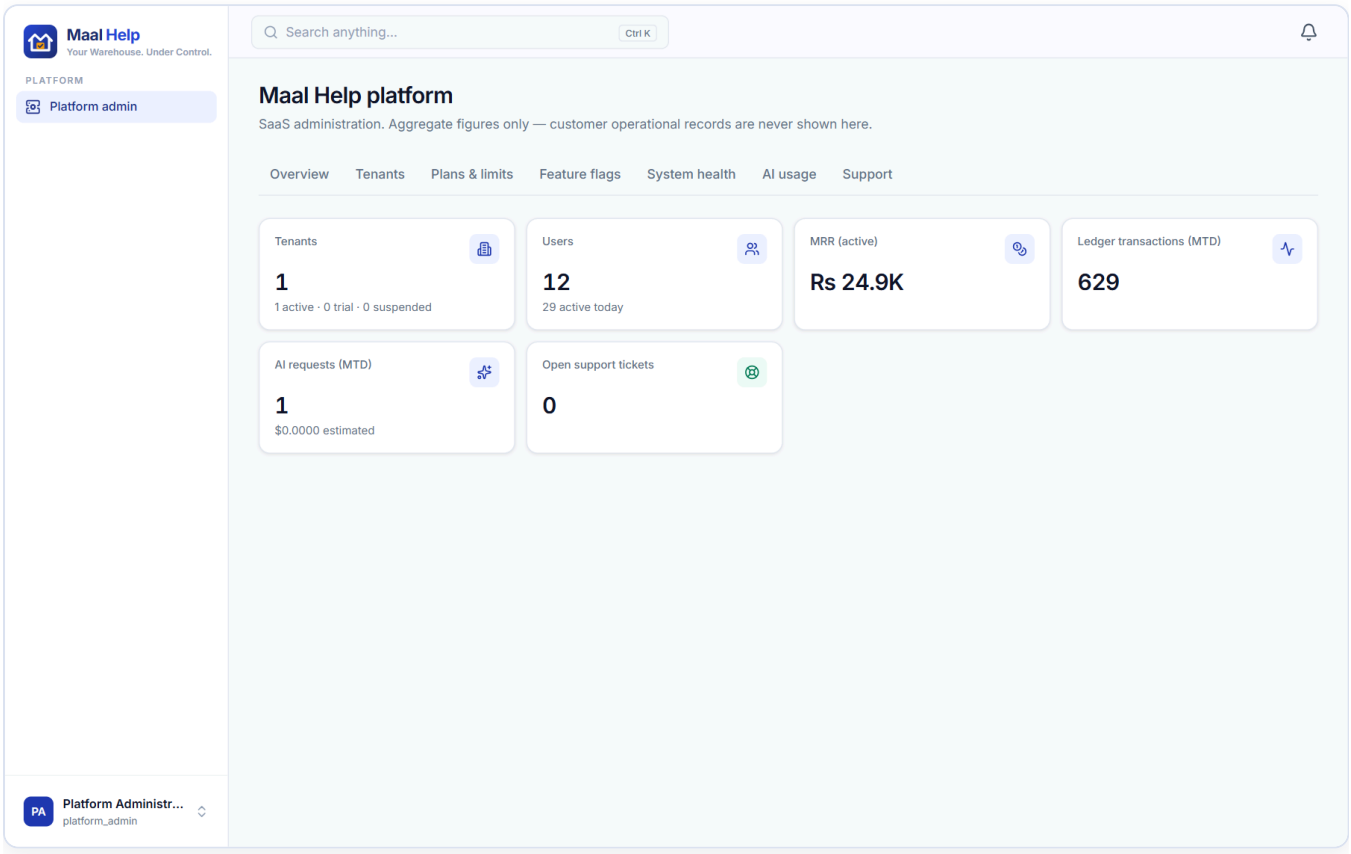

Figure 3. Platform overview.

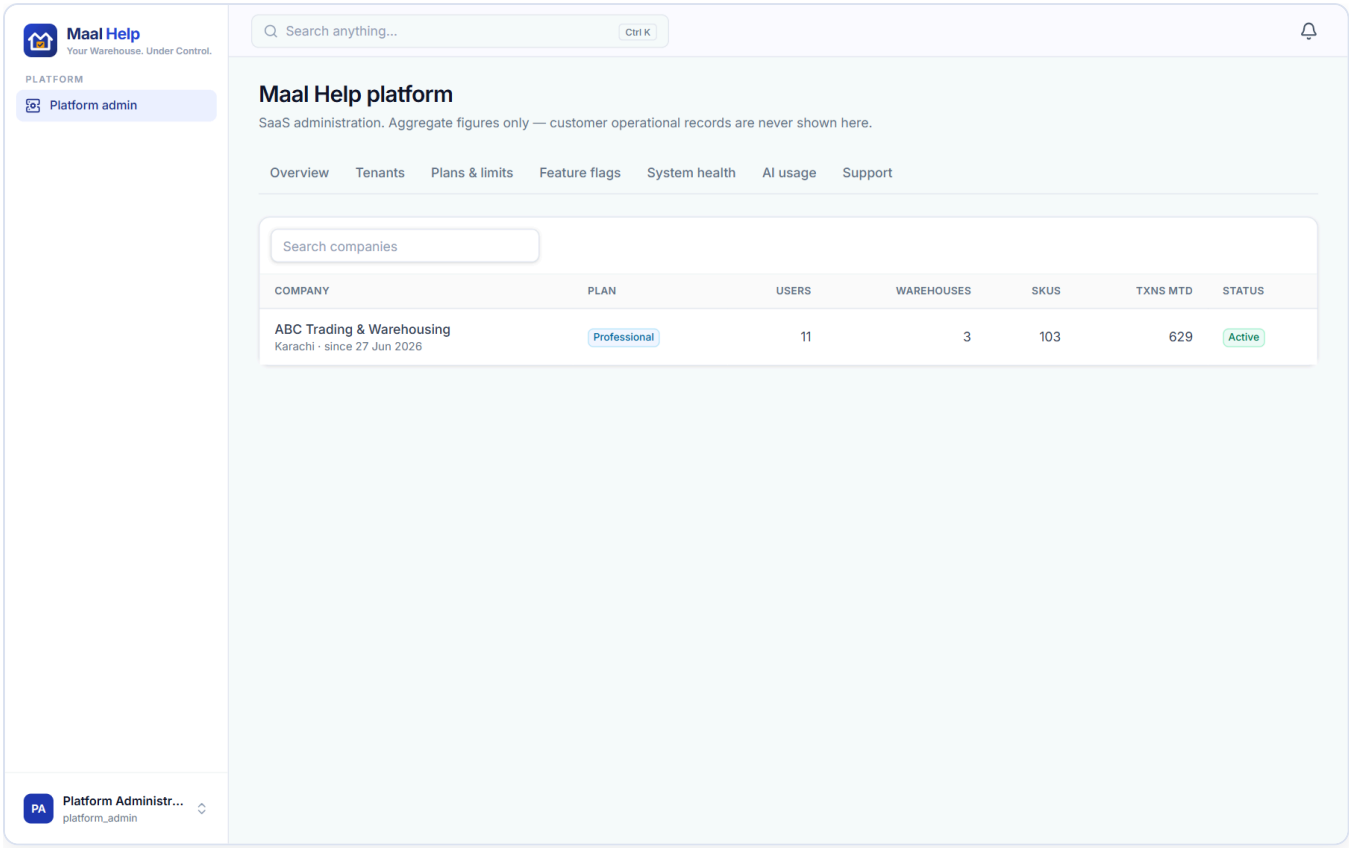

Figure 4. Tenants (companies) with plan and usage.

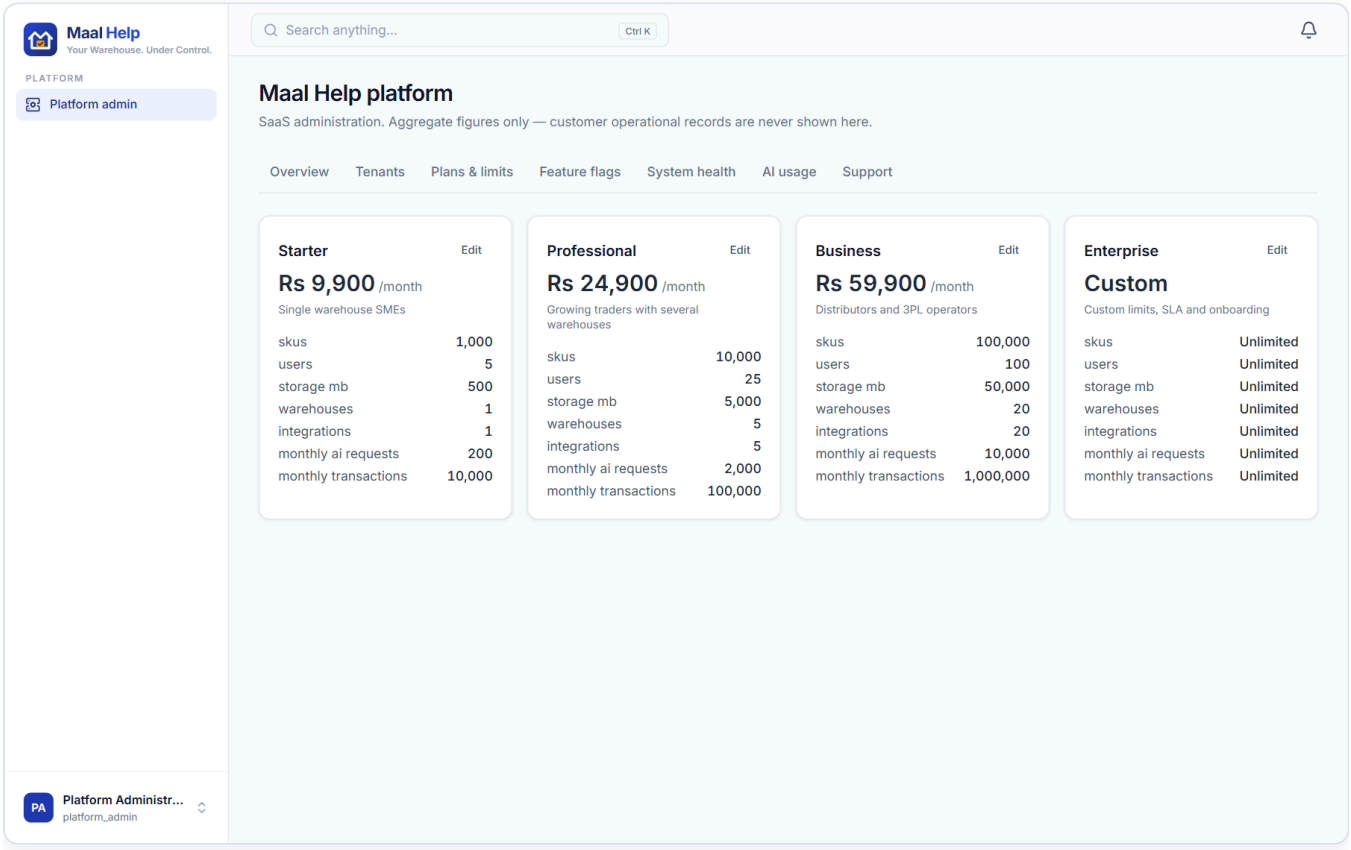

Figure 5. Plans and limits.

1 **Overview**: companies, users, activity and health at a glance.

2. **Tenants**: each company's plan, users, warehouses, SKUs, transactions this month and status. Change plan or suspend a company.
3. **Plans & limits**: edit plan limits (users, warehouses, SKUs, monthly transactions, AI requests, storage, integrations).

Feature flags, health, AI usage and support

Run the service safely.

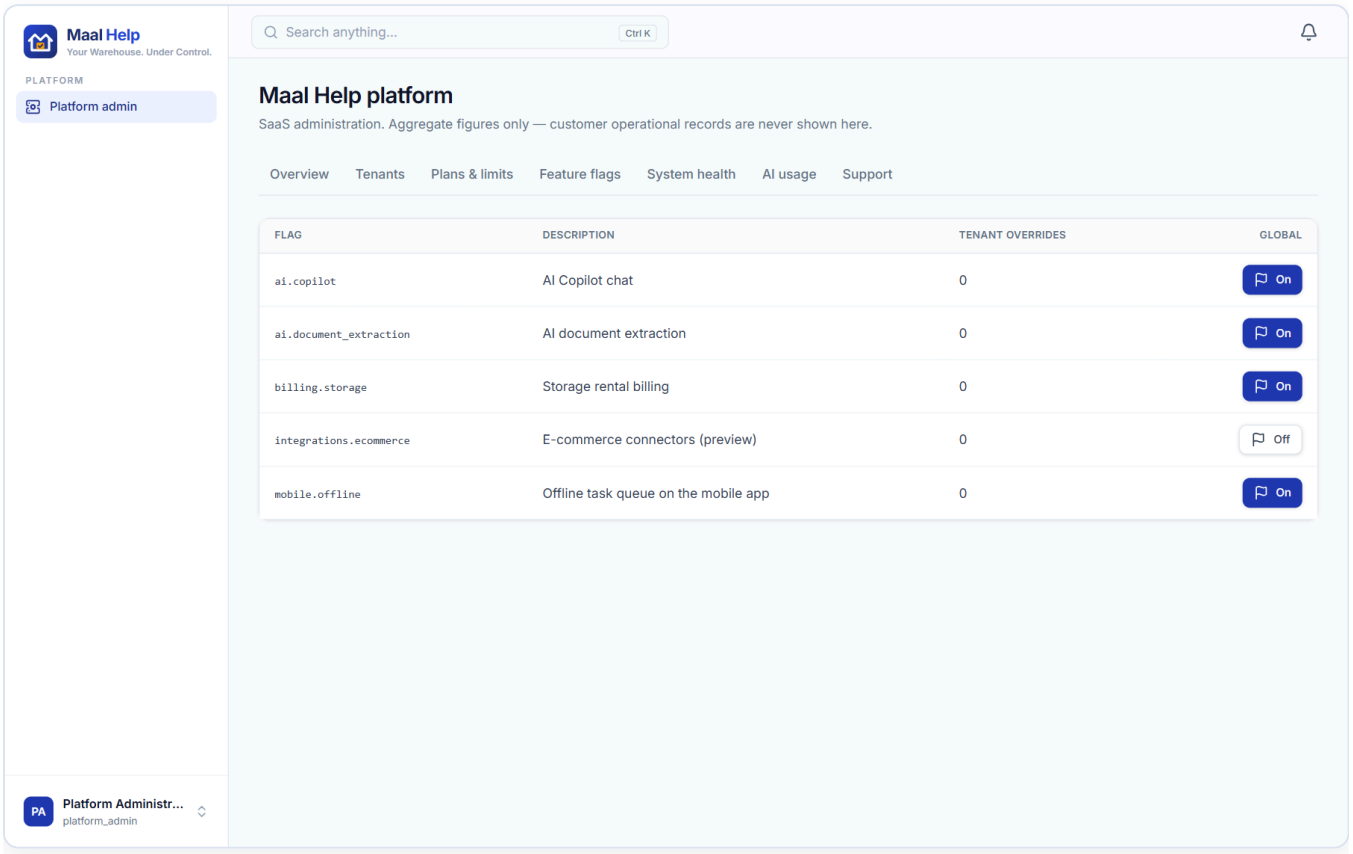

Figure 6. Feature flags.

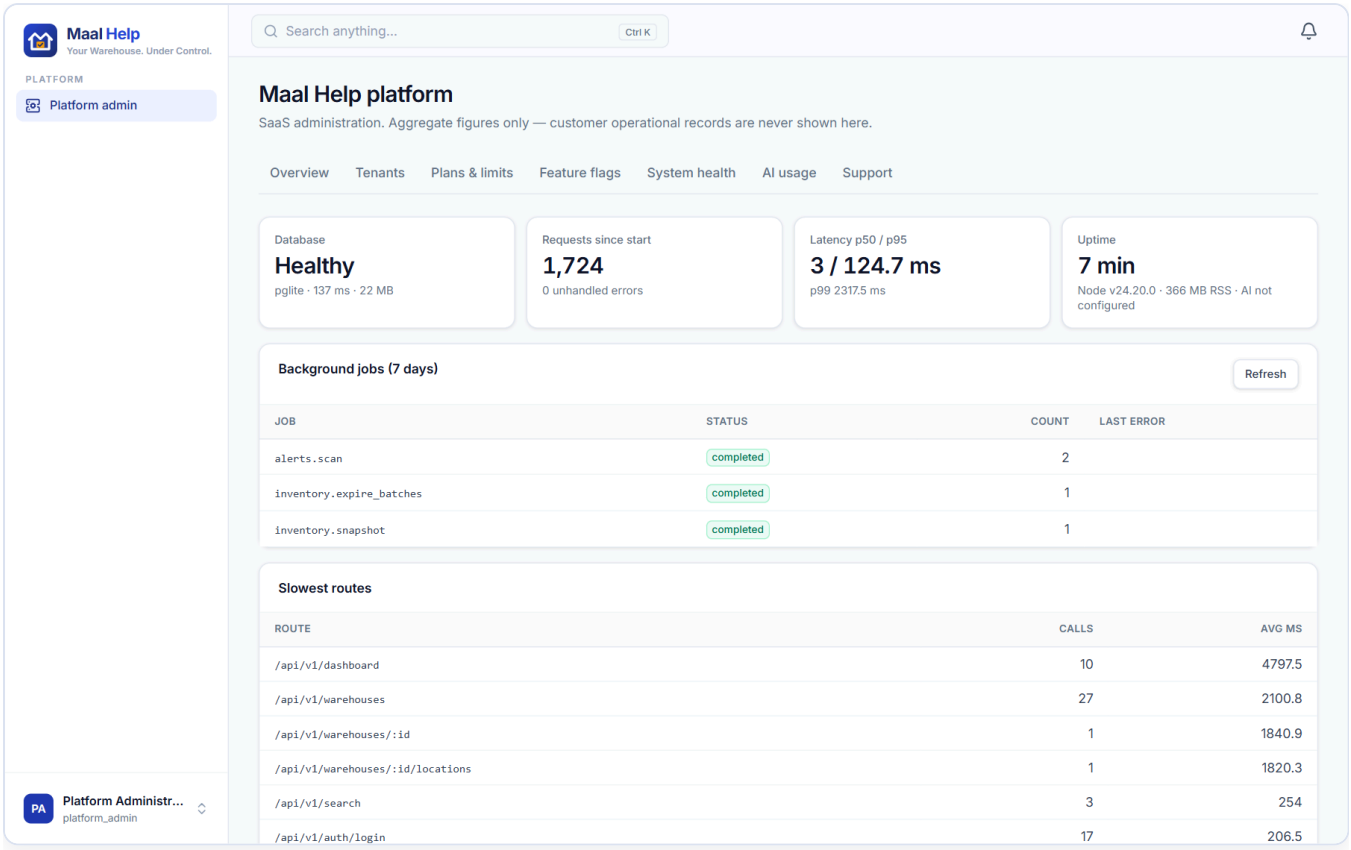

Figure 7. System health.

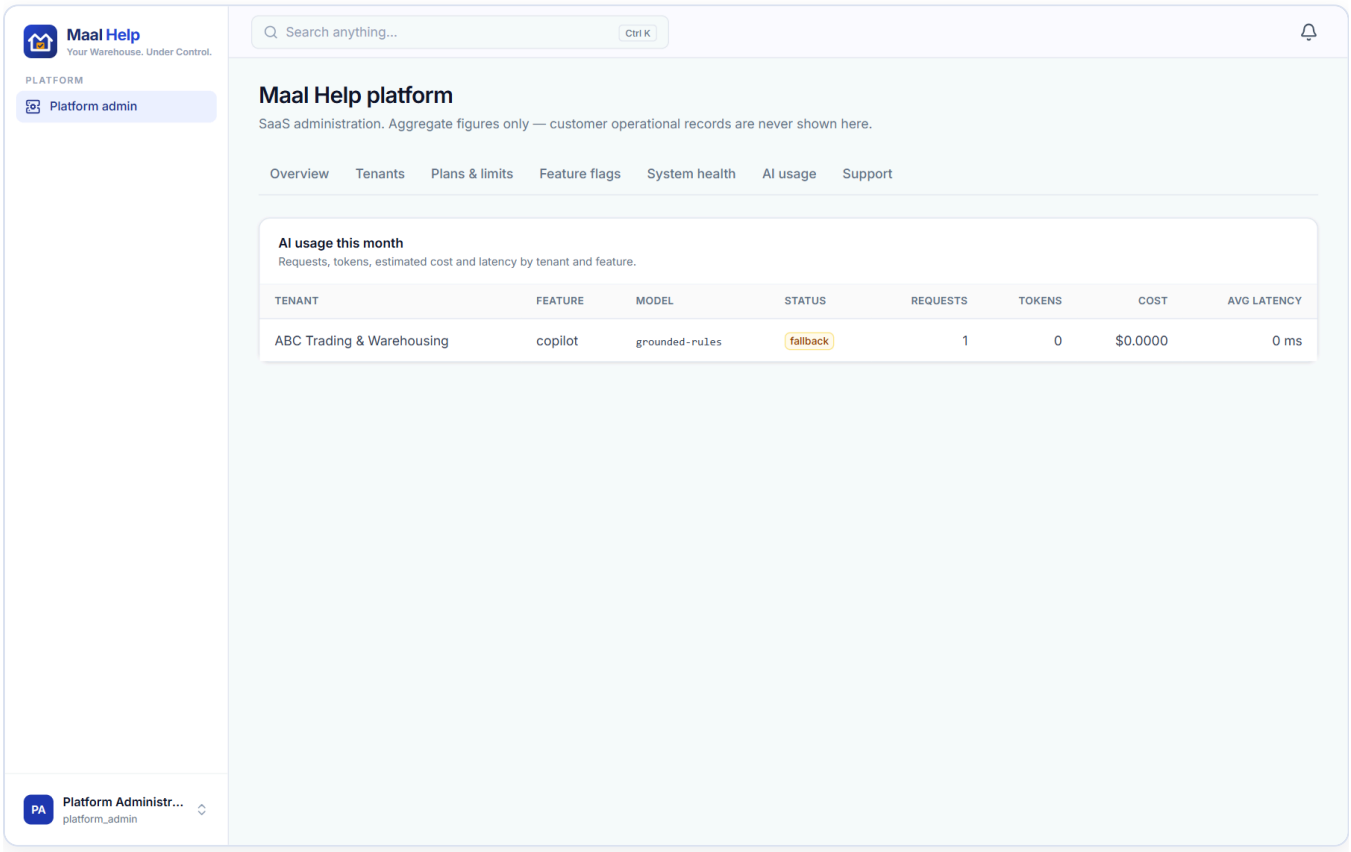

Figure 8. AI usage and estimated cost.

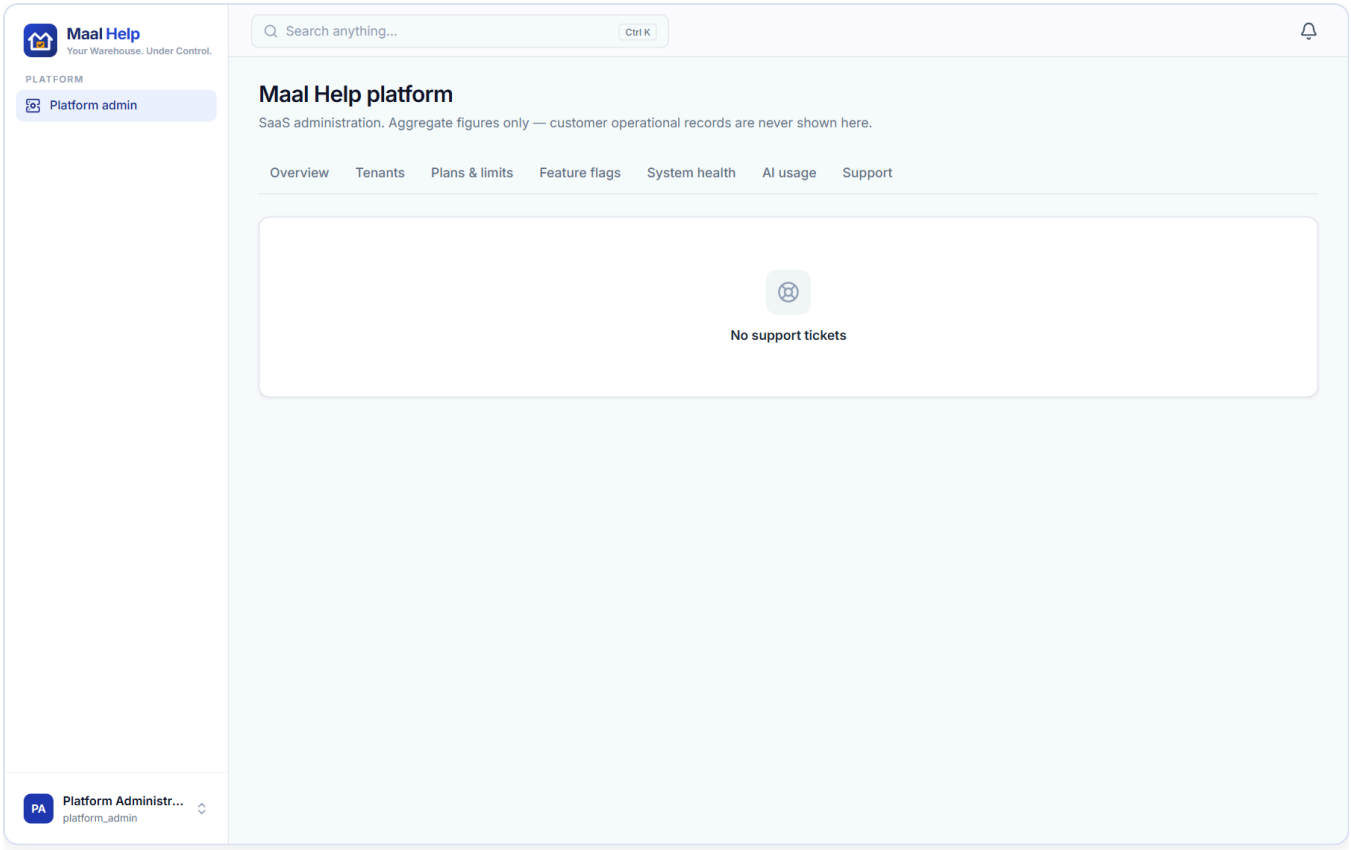

Figure 9. Support tickets.

1. **Feature flags**: switch platform features on or off (for example preview integrations).
2. **System health**: database, job queue, error rate and response times.
3. **AI usage**: calls, tokens, estimated cost, latency and errors per company.
4. **Support**: tickets raised by companies.

> Platform admins cannot open a company's products, stock or orders. This is enforced by the server and verified by automated tests.

5 End-to-end workflows

Onboard a new company

1. The company registers itself at **Create your company** on the sign-in page (owner account + company).
2. In **Tenants**, check the new company and its plan; change the plan if agreed.
3. The company owner completes onboarding (warehouses, products, users) in their own account.

Respond to a quota problem

1. A company reports *plan limit reached*.
2. Check **Tenants** for usage against the plan.
3. Upgrade the plan or adjust limits in **Plans & limits**.

Investigate an AI cost spike

1. Open **AI usage**, sort by cost.
2. Check calls and errors per company.
3. Lower that plan's monthly AI requests or contact the company.

6 Reports, notifications and exceptions

Reports and exports

Platform screens are the reports for this role: tenant usage, AI usage, system health.

Notifications and alerts

Watch **System health** for errors or slow responses, and **AI usage** for unusual spikes.

The bell at the top right lists new notifications. In-app alerts are always on; email and WhatsApp alerts depend on your company's settings.

When something is refused

Message	Meaning	What to do
Insufficient stock	Not enough *available* units at that place	Check reserved, quarantine or dock stock; choose another location or wait
Wrong location / wrong product	The scan does not match the task	Go to the right place or item and scan again
Quantity exceeds the task	More than required	Enter the task quantity
Pending approval	Above the company threshold	An approver must approve; nothing is posted yet
You don't have permission	Your role lacks the action	Ask your administrator
Credit limit exceeded	Customer balance too high	Collect payment or ask the owner

7 FAQ and troubleshooting

Frequently asked questions

Why can’t I open a company’s inventory?

By design. The platform role sees aggregates only, so customer data stays private.

How is the platform admin created in production?

With the server command `npm run admin:create`, using credentials supplied through environment variables. No default password exists in production.

Why can’t I see a menu or button?

Your role does not include that permission. Ask your administrator. Permissions are checked by the server.

Can I edit or delete a posted stock movement?

No. History is permanent. Corrections are new transactions (an adjustment or reversal) with a reason, so the audit trail stays complete.

Why does the screen say stock is not available?

It may be reserved for another order, in quarantine, damaged, expired, in transit or still at the receiving dock waiting for putaway.

Is my data visible to other companies?

No. Every company’s data is isolated, and requests for another company’s records are refused.

Troubleshooting

Problem	Solution
A company cannot sign in	Check the tenant status is active in **Tenants**. Password resets are done by the company’s own administrator.
“Missing anti-forgery header” or 403 when saving	Refresh the page. If it persists, you may lack permission for the action.
Account locked	Too many wrong passwords. Wait a few minutes or ask your administrator to reset your password.

> Still stuck? Note the screen, the record number (for example SO-10245) and the exact message, and contact your company administrator.

8 Glossary and quick reference

Quick reference

I want to...	Go to
See all companies	**Platform → Tenants**
Change limits	**Platform → Plans & limits**
Turn a feature on/off	**Platform → Feature flags**
Check service health	**Platform → System health**
AI cost	**Platform → AI usage**
Search anything	**Ctrl + K**

Glossary

Term	Meaning
SKU	Stock-keeping unit: one product code.
GRN	Goods received note: the record of a delivery received.
PO	Purchase order to a supplier.
SO	Sales order from a customer.
Putaway	Moving received goods from the dock into a storage location.
FEFO	First-expiry-first-out: older-expiry batches are reserved and picked first.
Reserved	Units promised to a confirmed order; not available for other orders.
Quarantine	Units held for inspection; not sellable.
In transit	Units dispatched on a transfer but not yet received.
Ledger	The permanent, append-only list of every stock movement.
Wave	A group of pick tasks picked together (batch or zone).
Back-order	The part of an order that could not be reserved yet.
3PL / storage client	A business whose goods you store and bill for storage and handling.
NTN / STRN	Pakistan national tax number / sales tax registration number.

Blind count	A count where the counter does not see the expected quantity.
