1 Introduction

Who this manual is for

This manual is for people with the **Warehouse Operator** role in Maal Help. Does the floor work on a phone: receive, put away, pick, pack, transfer, count and dispatch.

Maal Help is a warehouse operating system: stock by warehouse, location, batch and owner on a permanent ledger, plus purchasing, sales and fulfilment, billing, reports and an AI Copilot that answers from your own data.

Your role can

- ✓ All mobile tasks: receive, putaway, pick, pack, transfer, count, dispatch
- ✓ Look up stock by scanning
- ✓ View products, locations and order status

Your role cannot

- ✗ Adjust stock or approve anything
- ✗ See prices, costs or invoices
- ✗ Change products or settings

Screens show the fictional demo company **ABC Trading & Warehousing**. Your company's names and numbers will differ. Menus show only what your role is allowed to use.

2 Access and navigation

Signing in

Maal Help runs in any modern browser on a computer, tablet or Android phone. Your company administrator creates your account and gives you a temporary password.

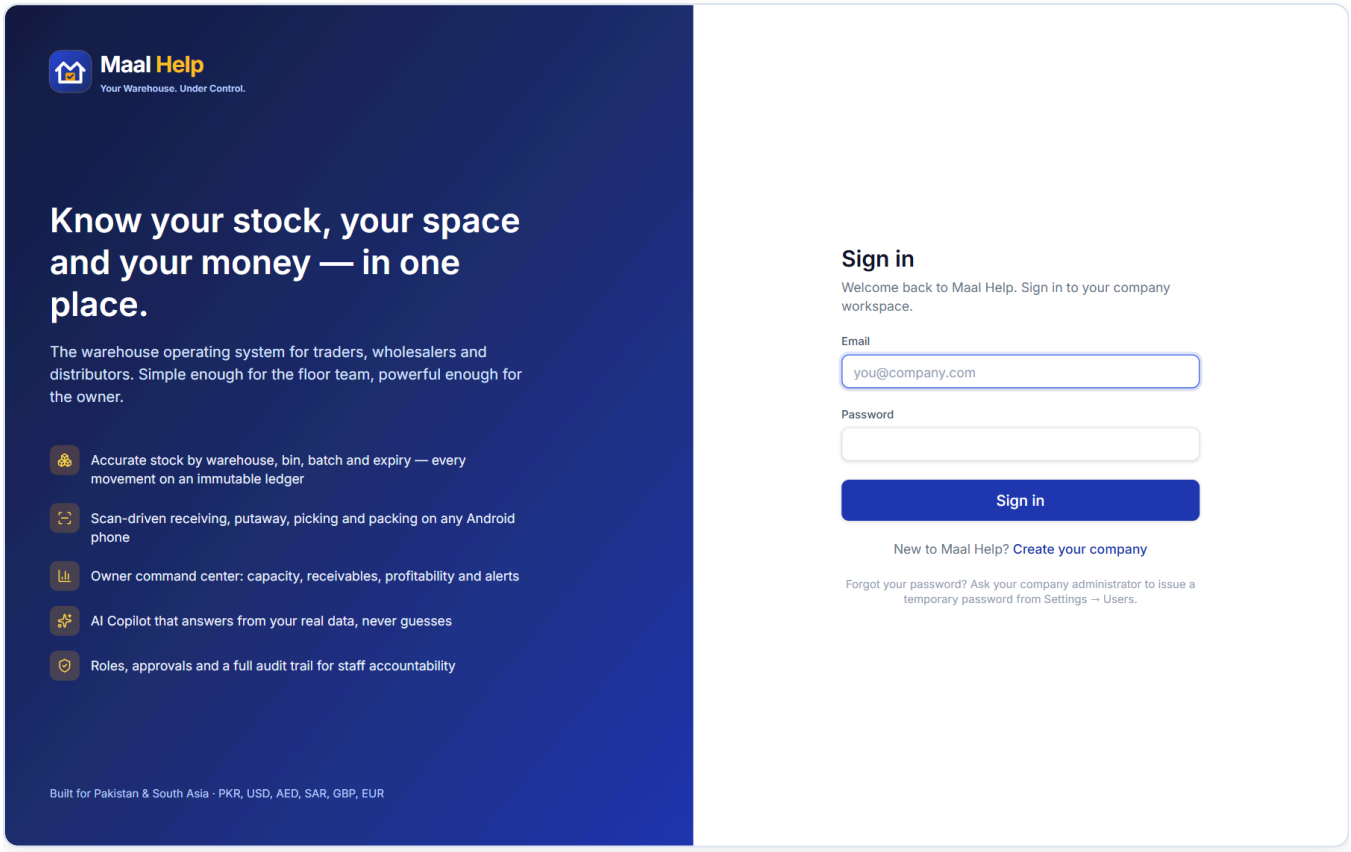

Figure 1. The Maal Help sign-in page.

1. Open the Maal Help address your company gave you.
2. Enter your work email and password, then select **Sign in**.
3. The first time, change your temporary password: **Settings** → **My profile** → **Change password** (at least 10 characters with letters and numbers).
4. Forgot your password? Ask your company administrator to issue a temporary one (**Settings** → **Users** → **Reset password**).

> After 8 wrong passwords the account is locked for a short time. Wait, then try again.

> Sign out on shared computers. Sessions also expire automatically.

Finding your way around

The left sidebar shows only the screens your role may use. Counts next to a menu item (for example Putaway 2) show open work.

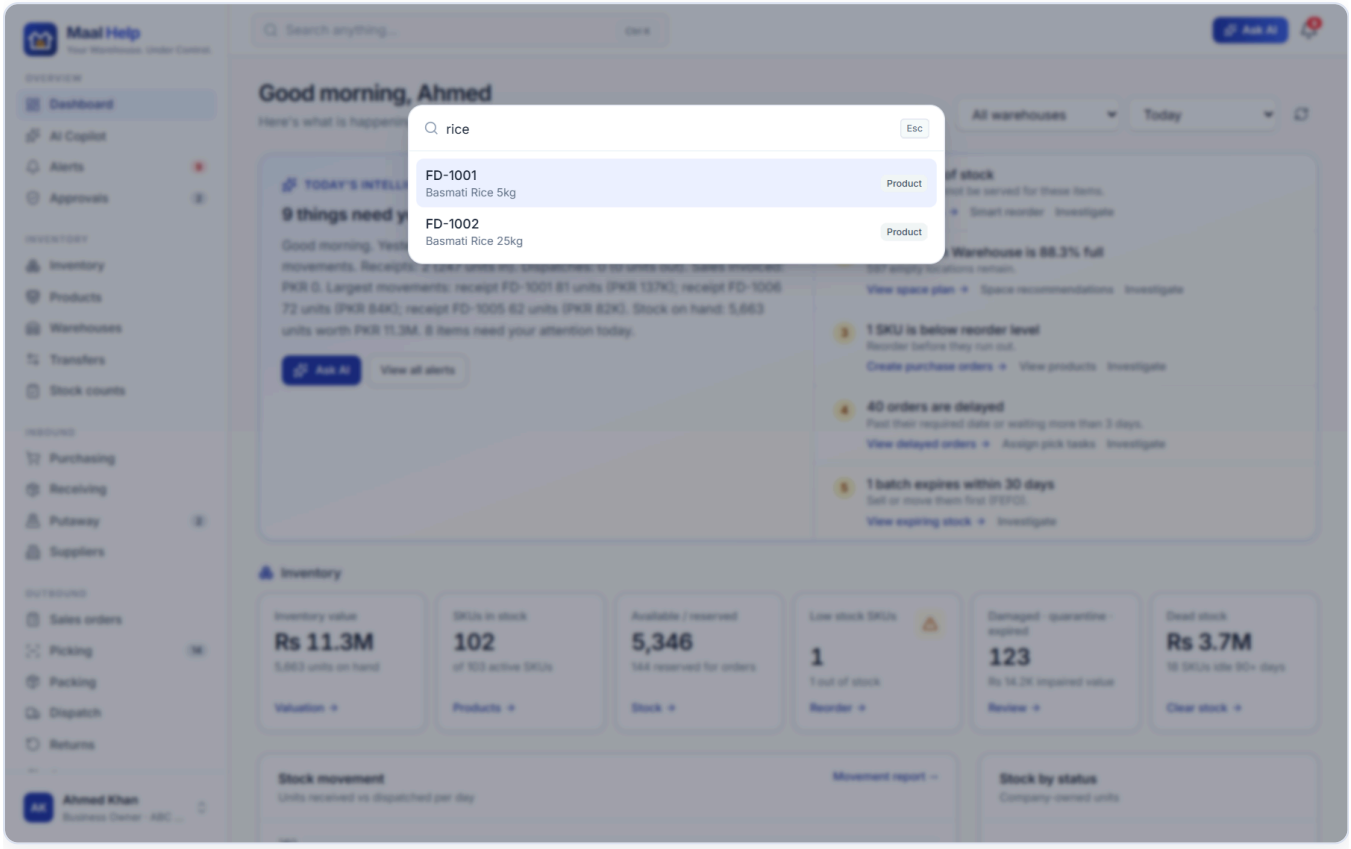

Figure 2. Press Ctrl + K anywhere to search products, orders, customers, locations and screens.

1. Use the **sidebar** to move between screens. Your name and role are at the bottom.
2. Use **Search anything...** at the top, or press **Ctrl + K**, then type a SKU, barcode, order number or name.
3. The **bell** opens your notifications. **Ask AI** opens the Copilot (if your role has it).
4. Tables support search, filters, sorting and paging. Click a row to open the record.

> If a screen or button you expect is missing, your role does not include that permission. Ask your administrator. The server enforces permissions, so hiding a menu is never the only control.

The mobile task app

Floor roles land on a simplified phone app with large buttons. Numbers on the buttons show waiting tasks.

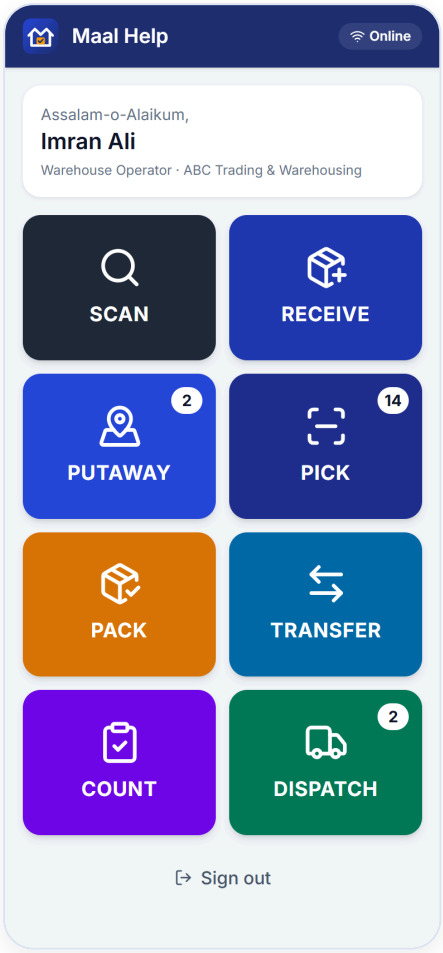

Figure 3. Mobile home for a Warehouse Operator.

1. Open Maal Help on your Android phone and sign in. Floor roles go straight to the task app.
2. Optional: use the browser menu **Add to Home screen** to install Maal Help like an app.
3. Tap a task button (RECEIVE, PUTAWAY, PICK, PACK, TRANSFER, COUNT, DISPATCH, SCAN).
4. Scan with a Bluetooth/USB scanner, or tap the **camera** button to scan with the phone camera, or type the code.

> The badge at the top right shows **Online** or **Offline**. Offline scans are queued and sent automatically when the connection returns (see Offline sync).

3 Your home screen

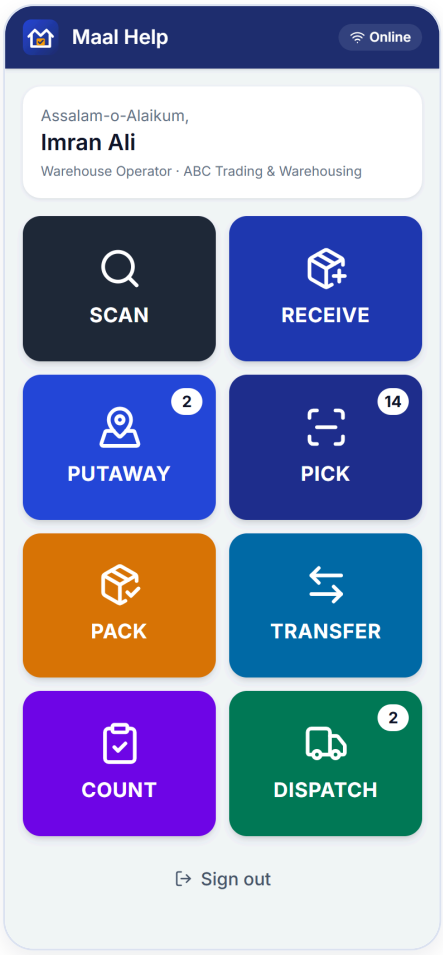

Figure 4. Operator mobile home.

- Big task buttons with counts of waiting work. Start with the button your supervisor assigns.

4 Features step by step

The mobile task app

Floor roles land on a simplified phone app with large buttons. Numbers on the buttons show waiting tasks.

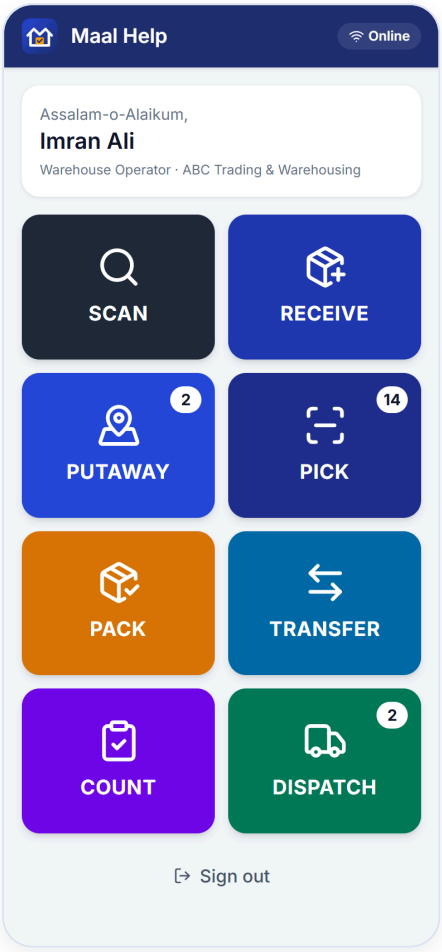

Figure 5. Mobile home for a Warehouse Operator.

1. Open Maal Help on your Android phone and sign in. Floor roles go straight to the task app.
2. Optional: use the browser menu **Add to Home screen** to install Maal Help like an app.
3. Tap a task button (RECEIVE, PUTAWAY, PICK, PACK, TRANSFER, COUNT, DISPATCH, SCAN).
4. Scan with a Bluetooth/USB scanner, or tap the **camera** button to scan with the phone camera, or type the code.

> The badge at the top right shows **Online** or **Offline**. Offline scans are queued and sent automatically when the connection returns (see Offline sync).

Scan lookup

Scan any product or location to see what is where.

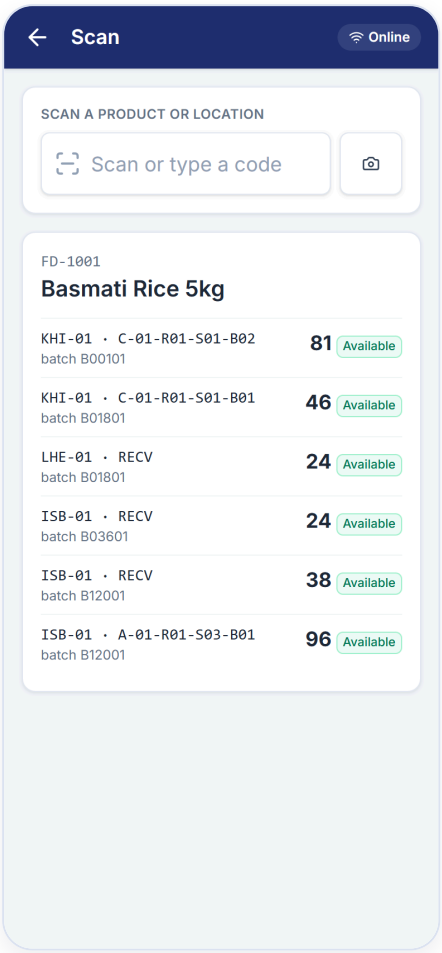

Figure 6. Scanning FD-1001 shows its stock by warehouse, location, batch and status.

1. Tap **SCAN** and scan a product or location label (or type the code).
2. Read the stock by location, batch and status.

Receive on the phone

Choose the purchase order on the delivery note, then scan what arrived.

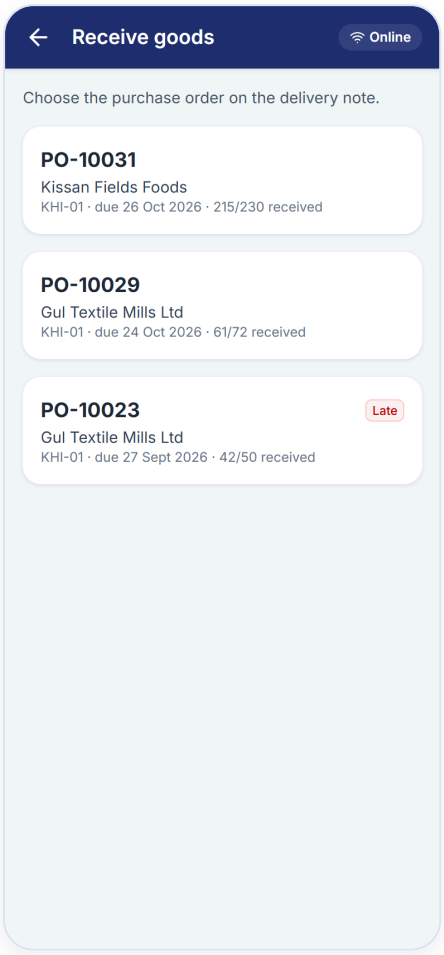

Figure 7. Open purchase orders to receive (late ones are flagged).

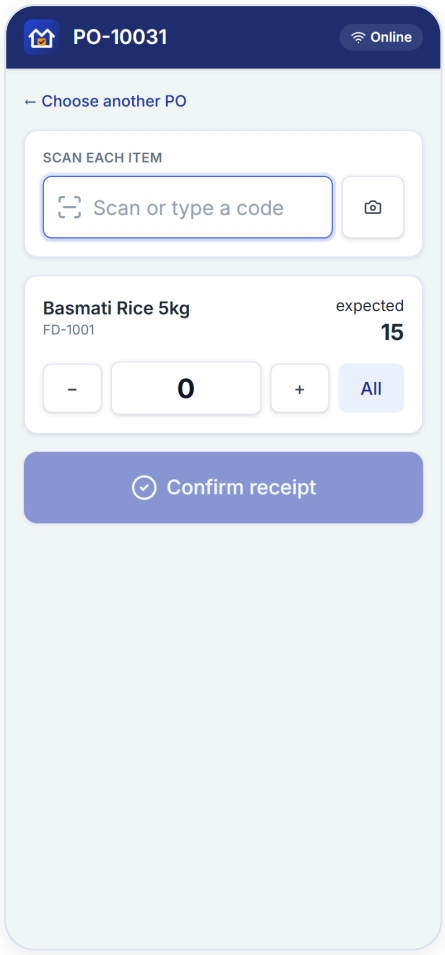

Figure 8. Receiving lines for the chosen purchase order.

1. Tap **RECEIVE** and choose the PO that matches the delivery note.
2. Scan each product (or type the code) and enter the quantity received; record damaged units separately.
3. Enter batch and expiry when asked.
4. Confirm. The goods go to the receiving dock and putaway tasks are created.

Put away on the phone

Each task tells you what to take and where to put it, and why.

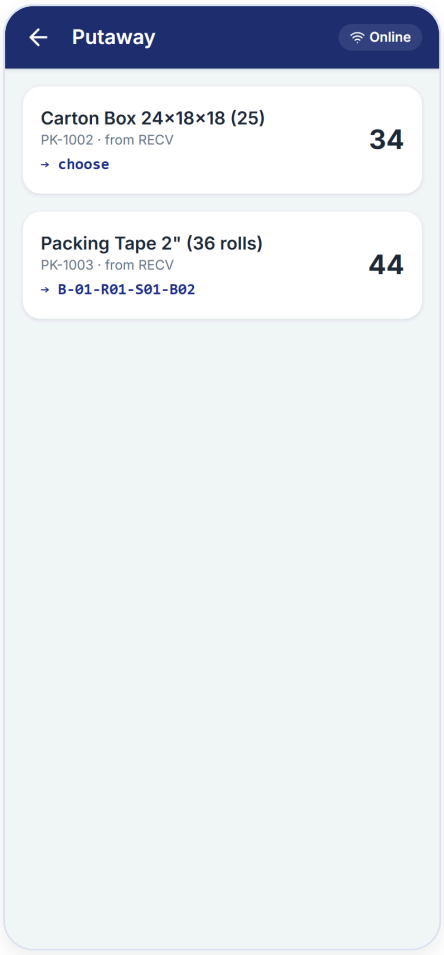

Figure 9. Putaway tasks with the suggested location.

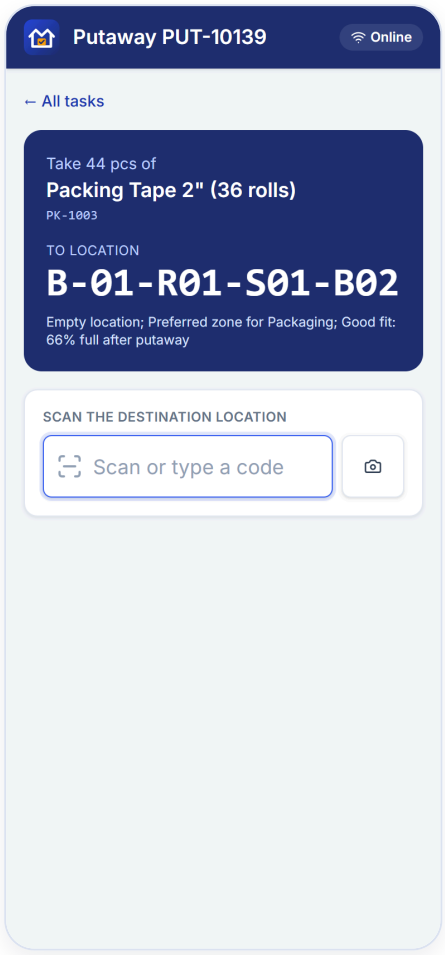

Figure 10. Task detail: product, quantity, destination and reason.

1. Tap **PUTAWAY** and choose a task.
2. Take the stated quantity to the **TO LOCATION**.
3. Scan the destination location label to confirm.

> If the suggested bin is full or blocked, scan another location and give a reason.

Pick on the phone

Three steps per task: 1. Scan location · 2. Scan product · 3. Quantity.

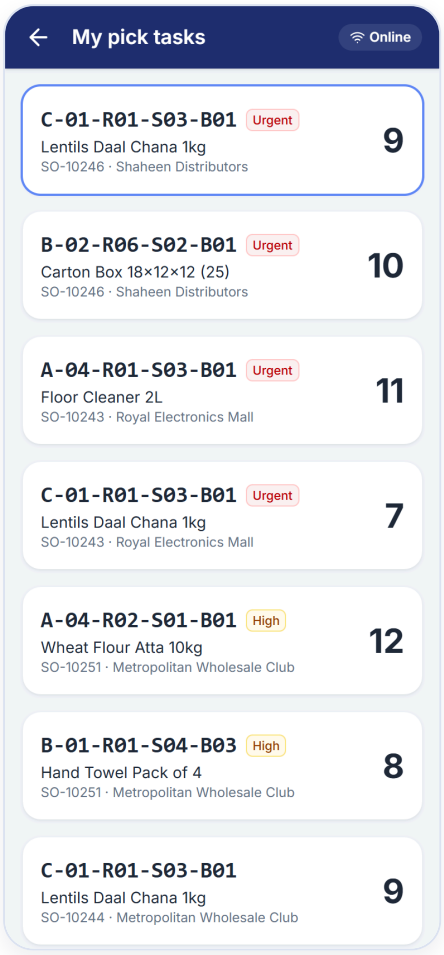

Figure 11. My pick tasks, urgent first.

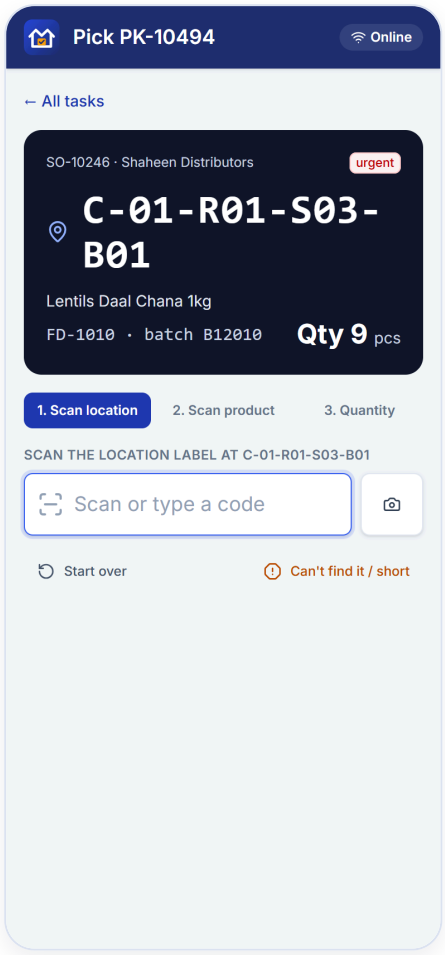

Figure 12. A pick task: location, product, batch and quantity.

1. Tap **PICK** and open the first task.
2. Go to the location shown in large letters and scan its label.
3. Scan the product barcode.
4. Enter or confirm the quantity, then continue to the next task.
5. If you cannot find the stock, tap **Can’t find it / short**. **Start over** clears the scans for this task.

Pack on the phone

Orders appear here when all picks are finished.

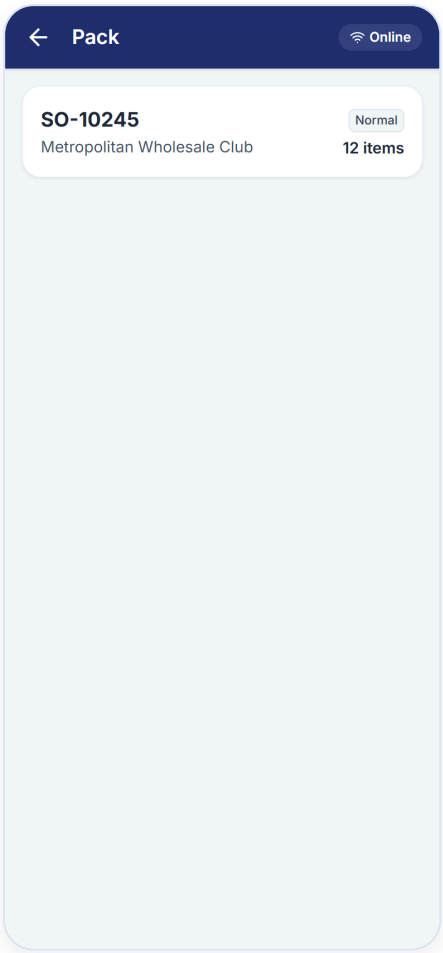

Figure 13. Orders waiting to be packed.

1. Tap **PACK** and choose the order.
2. Scan each item into the carton until every line is complete.
3. Enter the number and weight of boxes and complete packing.

Move stock on the phone

Move stock between locations in four scans.

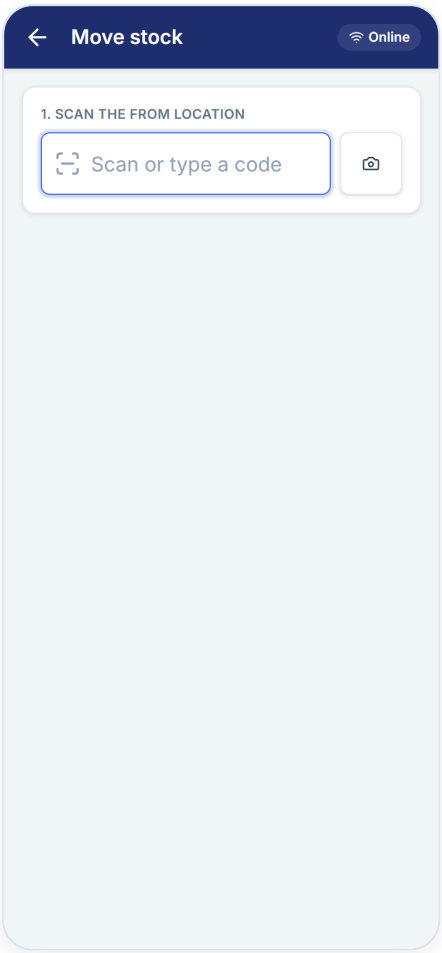

Figure 14. Move stock: start by scanning the FROM location.

1. Tap **TRANSFER**.
2. 1. Scan the **FROM** location.
3. 2. Choose what you are moving from that location.
4. 3. Enter the quantity.
5. 4. Scan the **TO** location to complete the move.

Count on the phone

Counts assigned to you appear under COUNT.

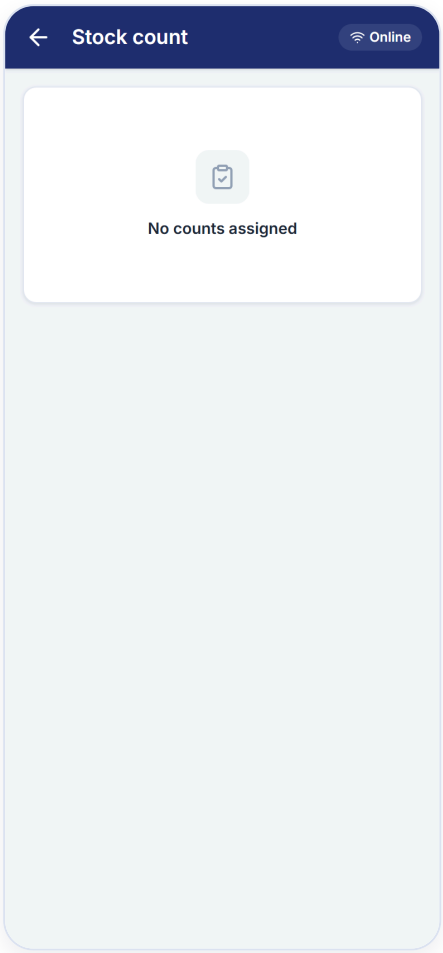

Figure 15. Stock count screen (no counts assigned in this example).

1. Tap **COUNT** and open an assigned count.
2. Scan the location, then the product.
3. Enter the **Counted quantity** and **Save count**. Repeat for every line under *To count*.

> Count what you see. In blind counts the expected quantity is hidden on purpose.

Dispatch on the phone

Packed orders ready to leave.

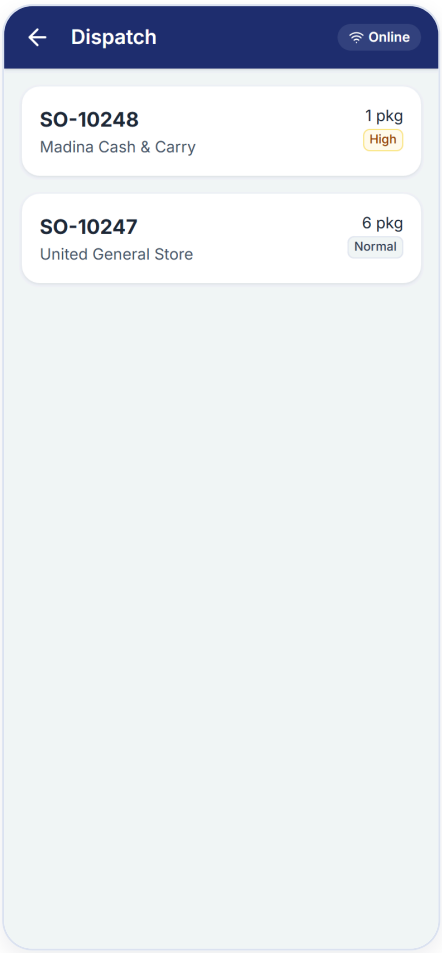

Figure 16. Orders ready to dispatch with package count and priority.

1. Tap **DISPATCH** and choose the order being loaded.
2. Enter vehicle, driver and phone (or courier and tracking number) and confirm.

Offline sync

If the network drops, your scans are kept on the phone and sent when it returns, without double posting.

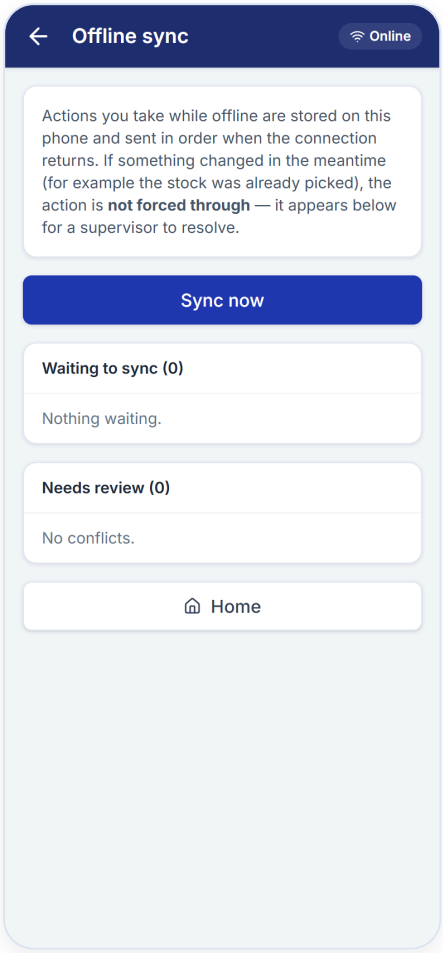

Figure 17. Offline sync: waiting items and conflicts.

1. Watch the **Online/Offline** badge.
2. When back online, open **Sync** and tap **Sync now** (it also syncs automatically).
3. If something could not be applied (for example the stock was already moved), it appears under conflicts. Read it, fix the situation and **Dismiss**.

> Offline mode covers short outages. Do not work offline for a whole shift.

5 End-to-end workflows

A typical shift

1. Sign in; check the Online badge.
2. Do assigned tasks in order: receive and put away deliveries, then pick urgent orders.
3. Scan every location and product; never type a code you have not checked.
4. Before leaving, open **Sync** and make sure nothing is waiting.

6 Reports, notifications and exceptions

Reports and exports

Operators do not use reports. Use **SCAN** to look up stock.

Open **Reports**, choose a report, set filters and export to Excel, CSV or PDF, or print. You see only the reports your role may view.

Notifications and alerts

Error messages appear in red on the phone. Read them. Usually the scan was the wrong location or product.

The bell at the top right lists new notifications. In-app alerts are always on; email and WhatsApp alerts depend on your company's settings.

When something is refused

Message	Meaning	What to do
Insufficient stock	Not enough *available* units at that place	Check reserved, quarantine or dock stock; choose another location or wait
Wrong location / wrong product	The scan does not match the task	Go to the right place or item and scan again
Quantity exceeds the task	More than required	Enter the task quantity
Pending approval	Above the company threshold	An approver must approve; nothing is posted yet
You don't have permission	Your role lacks the action	Ask your administrator
Credit limit exceeded	Customer balance too high	Collect payment or ask the owner

7 FAQ and troubleshooting

Frequently asked questions

I scanned the wrong product

It is rejected. Scan the right one. Nothing was posted.

The location is empty

Use “Can’t find it / short”. Your supervisor will arrange a count.

Why can’t I see a menu or button?

Your role does not include that permission. Ask your administrator. Permissions are checked by the server.

Can I edit or delete a posted stock movement?

No. History is permanent. Corrections are new transactions (an adjustment or reversal) with a reason, so the audit trail stays complete.

Why does the screen say stock is not available?

It may be reserved for another order, in quarantine, damaged, expired, in transit or still at the receiving dock waiting for putaway.

Is my data visible to other companies?

No. Every company’s data is isolated, and requests for another company’s records are refused.

Troubleshooting

Problem	Solution
“Missing anti-forgery header” or 403 when saving	Refresh the page. If it persists, you may lack permission for the action.
Account locked	Too many wrong passwords. Wait a few minutes or ask your administrator to reset your password.
Camera scanning does not start	Allow camera access for the site in the browser settings; use HTTPS; or type the code.
Scanner types into the wrong field	Tap the scan box first. Most scanners act as a keyboard and send Enter after the code.
Offline badge appears	Keep working on short tasks. Scans are queued and synced when the connection returns. Check Sync for conflicts.

Still stuck? Note the screen, the record number (for example SO-10245) and the exact message, and contact your company administrator.

8 Glossary and quick reference

Quick reference

I want to...	Go to
Find stock	**SCAN**
Delivery arrived	**RECEIVE**
Goods at dock	**PUTAWAY**
Order to pick	**PICK**
Move a pallet	**TRANSFER**
Pending offline scans	**Sync**
Search anything	**Ctrl + K**

Glossary

Term	Meaning
SKU	Stock-keeping unit: one product code.
GRN	Goods received note: the record of a delivery received.
PO	Purchase order to a supplier.
SO	Sales order from a customer.
Putaway	Moving received goods from the dock into a storage location.
FEFO	First-expiry-first-out: older-expiry batches are reserved and picked first.
Reserved	Units promised to a confirmed order; not available for other orders.
Quarantine	Units held for inspection; not sellable.
In transit	Units dispatched on a transfer but not yet received.
Ledger	The permanent, append-only list of every stock movement.
Wave	A group of pick tasks picked together (batch or zone).
Back-order	The part of an order that could not be reserved yet.
3PL / storage client	A business whose goods you store and bill for storage and handling.

NTN / STRN	Pakistan national tax number / sales tax registration number.
Blind count	A count where the counter does not see the expected quantity.
